## CHASING LIFE.

Surgeons have recently transplanted the lens of one man's eye on the diseased eye of another. The man who gave up the lens couldn't use it any way as his eye was too badly affected with another ailment. The marvels of surgery fascinate the mind. We seem to be moving toward the age in which there will be almost no physical task too great for medical science to undertake. But the life spark, the life principle, life itself—that eludes research. It is here and it is gone. Where does it go? Or does it go at all? The processes of life are studied and learned in the minutest degree. Life itself eludes.

## HAZARDS OF BEAUTY.

A Chicago judge has ruled that women who want permanent waves must abide by the consequences, if any. In the case in point the burned beauty could not collect a dollar in damage. Nothing worth having is altogether cheap and there is no doubt that beauty is very much worth having. There are few hazards in the acquirement of good looks, even when the subjects gets a bad start. And doubtless any woman would spend vastly more time and endure much more torture for the glittering results.

The province of Nova Scotia claims to have had 165,906 summer visitors between June 30th and September 30th of this year. Of this number 73,000 entered by train and steamer and 92,900 by motor car. The number who travelled overland by cars is estimated at 73,046, which means that the remainder brought their autos in by boats landing at Yarmouth, Digby and Halifax. Those motoring overland of course must have travelled via New Brunswick, as the only gateway to the province for this class of travellers is by way of Amherst. The total number of motor cars which entered the province during the season is put down at 23,215, and it is claimed that the visitors left \$13,000,000 in behind them.

Telegraph-Journal: Some observations made by Mr. W. W. Hubbard at the Maritime Board of Trade regarding the potato situation are worthy of attention by the potato growers of this province. Mr. Hubbard pointed out that a careful survey of the situation early this year would have revealed the fact that the potato crop in Canada and the United States, judging from the acreage which it was announced would be planted, would in all probability be very large. A more careful study of the crop prospects and a greater degree of co-operation among potato growers would seem to be desirable. There are years when a larger devotion to mixed farming would be in the general interest.

The C. P. R., has in course of construction a splendid new hotel at Digby, N. S., which will be ready for business at the beginning of the next tourist season. With a hotel at St. Andrews, another at McAdam, the Pines at Digby and the Lord Nelson at Halifax the C. P. R. will be in a very good position to take care of the visitors it brings to the Maritimes. It is safe to say that during the next tourist season the company will see to it that their hotels do a capacity business.

A few rum runners are still functioning in this province but they are having a hard time dodging the provincial police. The task of landing the stuff on the coast is not so difficult as transporting it to the thirsty ones in Maine. The manufacturers have not yet been able to produce auto tires that will run over a row of sharp pointed spikes and get by with a whole skin.

The Federal Government is expending \$5,000,000 on harbor improvements

and it is announced that \$4,000,000 will be expended at Halifax. This will have a tendency to strengthen the belief which has long existed in some quarters that Saint John and Halifax are the whole thing. The only government which considers it worth while expending money in Fredericton is the provincial administration.

The recent birthday of Right Hon. W. S. Fielding recalls the fact that he is one of only three of the famous Laurier Cabinet of 1896 still living. The others are Sir William Mulock of Toronto and Sir Clifford Sifton of Ottawa.

That New York play that ran two years to no attendance always reminds us of the halfback who races 80 yards with the ball after the whistle blows for offside.

It probably wouldn't cheer up a gentleman in the middle of a Missouri River flood to know that Sir Oliver Lodge thinks the earth will last forever.

Little Willy's latest in the line of insurmountable problems is as follows: What kind of a sickness is per capita consumption?

The older proverbs offer a wide choice: For instance, truth "crushed to earth will rise again," and also "lies at the bottom of a well."

The Harvard library now numbers over 2,780,000 volumes. It must keep a Harvard man busy reading all those books in a short course of four years.

Purdue has opened a poultry course. Waitaminnit 'til we look it up . . . h'm . . . yes, Purdue is a co-educational school.

Note to Dietitians: Some of our most stalwart types were brought up in homes where a pan of white bread was left back of the stove to "raise."

We are happy to say that, after all, Ramona was the kind of a girl that men forget.

Conscience is that still, small voice that will never record very well in the talking movies.

Dobbin had his weaknesses, but never thought he could negotiate a turn on two legs.

**May Play in States**  
The University of New Brunswick hockey team will have a busy season if reports current are properly founded. As matters now stand, the management are planning outside games, and two of these may be played in Boston, Mass. Negotiations have been made with Harvard College, Boston University and Boston College for games sometime in January. If the plan materializes the games will prove interesting and will show conclusively where the local university stands in hockey circles in the east. The American college teams are reputed to have strong outfits and are fast turning to hockey as their chief winter sport.

**Progress at Rink**  
The management of the Arctic Rink are working hard these days preparing for the opening of the skating season which will commence some time near Christmas. Already a number of floods have been put on the surface of the rink and the management are of the opinion that if the weather continues as the past few days the ice will be ready for skating at a not very distant date. Though there has not been any good outdoor skating to date, several places have been frequented by the more impatient of the ice fans, one place, the Wilmet Park being fairly good for a day or two.

**Midweek Market**  
The market space at Phoenix Square this morning was not overly filled with farmers, though there were a number of buyers on hand at an early hour. Meat was the prevalent produce, with pork being the chief seller at 15 and 19 cents per pound. Chicken sold at 35 cents per pound. Other prices were as follows: butter, 45 cents per pound; mutton 12 and 14 cents per lb.; apples \$2 to \$3 per barrel; fowl 25 cents per pound; carrots \$2 per barrel; potatoes \$1 per barrel.

It is charged that modern mince pie is not up to the old fashioned standard. Neither are modern stomachs.

When a man is awakened in the morning by the sound of milk wagons creaking in the snow he makes a wild dash for the furnace.

It is misplaced affection when a husband rushes home and lovingly peels potatoes before his wife returns from an afternoon card club and then receives a calling down because he left so much potato on the peelings.

## PRINCE MAY CURTAIL HIS EMPIRE DUTIES

**Will Return Home and Assist His Father in Some of His Work in Britain.**

By HERBERT BAILEY,  
British United Press Staff Correspondent  
London, Nov. 28.—The belief that the Prince of Wales will curtail his mission as Empire Ambassador in order to relieve the King of many of his duties in Britain are current today. The Daily News says: "The Prince's speedy return will inevitably assist the King's recovery and everywhere it will be regarded as an earnest indication of the Prince's intention to relieve His Majesty in the immediate future of such duties as can be vicariously performed and to train himself with greater assiduity than ever for the position of high responsibilities which he recently acknowledged in striking phrases.

**LATE ALEXANDER GULLIVER**  
Large Number of Mass Cards and Flowers at Funeral of Late Alex. Gulliver—Largely Attended—  
Rev. Father Donahue Conducted Service.

The funeral of the late Alexander Gulliver, who passed away at Montreal on Saturday and whose remains were brought to this city for burial took place this morning from the home of the parents in South Devon Mr. and Mrs. William Gulliver at 8.45 o'clock. High Mass of Requiem was celebrated at the St. Anthony's church at Devon, with Rev. Father Donahue conducting the service. The funeral was largely attended and there was a quantity of mass cards and beautiful flowers. Interment was made at the Sunnybank cemetery. The pall bearers were Harold Evans, Thomas Boyd, C. Hedley Forbes, Kenneth H. Staples, Jack Love and Fred Sansom. The list of mourners is as follows: William Gulliver, Sr., Currie Gulliver, William Gulliver, Jr., John Currie, Robert Keaughan, Edgar MacDonald, Ellis MacDonald, William MacSorley.

**Senate Meeting**  
The senate of the University of New Brunswick met in annual session yesterday at noon in the Education Office with the following members present: Dr. W. S. Carter, Chancellor C. G. Jones, J. E. Page, Col. W. H. Harrison, M.L.A., C. McN. Steeves, Chief Justice Barry, and Havelock Coy, the registrar. Among other things discussed at the meeting was the induction of the Lady Beaverbrook gift residence to the university. A special committee composed of Chancellor Jones, J. E. Page and Miss Hazen Allen was named to report upon the most satisfactory procedure of ceremonies at the induction.

## NOWADAYS YOU PRESS A BUTTON

Or perhaps a switch, or some little gadget, and a lot of things happen around home that lighten labor and banish trouble.

A Whirling Fan brings a cooling breeze, and a little copper, dish-like affair throws out a sizzling blast that warms the room in no time.

Another button boils coffee, toasts bread and cooks waffles. Another does a better job than a broom. Another makes a happy laundress out of a dismal washwoman. Another one cools the ice-box. Another—but why go on?

Labor and time saving devices have come and are today within the reach of the humblest home.

And one of the chief reasons why they have come and why they are within the reach of the humblest home is the power of advertising.

Advertising has carried the news of these better ways of doing things to every home. It has created a desire to possess them, and countless thousands have purchased them, and live better because of them.

Reading advertising not only tells you about new, helpful mechanical devices for the home, but it is an unfailing guide to reliable products.

READ ADVERTISING REGULARLY. IT POINTS THE WAY TO BETTER LIVING.
