

## INVESTIGATION OF ALBERT CO. COPPER ORES

Cupric Occurrences in Southern Albert Co. to be Prospected by English Company — Drilling Expected.

W. E. McMullen, chief mining engineer for the province, who returned yesterday from Albert County, where he has been in touch with the engineers of the Huronian Belt Company, made a statement to the Mail this morning that this company had commenced operations in the southern part of Albert County. H. A. Steven is the engineer in charge of the operations and the Chief Engineer of the company is W. M. Goodwin, of Montreal.

### English Company

The Huronian Belt Company is an English company which is conducting work in N. B. and N. S. In Albert county the operations are for copper. Surface investigations have been begun and it is probable that drilling will soon be commenced. If the investigations show a rich enough ore in large enough quantities mining operations will be started and mineral development on a large scale will be carried on. It is thought that all refining and other allied industries will be carried on in the province if active mining operations are begun.

### Lead and Zinc

This same company is also carrying on investigations on the property of George Gilbert, near Bathurst, in the hope of finding rich deposits of lead and zinc ores such as occur in southern British Columbia. This company has not bought and land here, but is taking options on lands where rich deposits of ores are thought to exist.
