PROCLAMATION

SILVER JUBILEE KING GEORGE V.

Monday, May 6th, having been proclaimed a public holiday throughout Canada to be observed as a day of general thanksgiving and rejoicing on the occasion of the Jubilee, it is therefore requested that the citizens of Fredericton join heartily in the ceremonies here on that day, and display flags and suitable decorations on their buildings.

W. G. CLARK, Mayor.

GERMANY SEEKS TO CRUSH CHURCH PRESS

Afraid of the truth, the Hitler government is taking steps to abolish the church press.

The move is not only vicious, but stupid. Able tyrants than Hitler have failed at that game.

For a while, the Hitler government may think it has the lid clamped on religion and on religious utterances. Through such a period the clergy and laity of the churches will be drawn together in even greater strength. Inevitably they emerge stronger than ever.

Whether it be Germany or Russia or Mexico, the story always is the same. For a time the anti-religious minorities, by force of arms, by reigns of terror, seem to hold the whip hand, whereas they are simply occupying the limelight in a drama which ends in their own downfall.

In the parade of the centuries the transitory antics of madmen challenging eternal truths mean less than the sting of a gnat.

WATER POWER IN CANADIAN INDUSTRY

According to a recent review of Canada's water power resources issued by direction of Hon. Thomas G. Murphy, Minister of the Interior, the results of studies conducted by the Dominion Water and Hydrometric Bureau indicate that the present recorded water power resources of the Dominion will permit of a turbine installation of about 43,700,000 horsepower. On the first of January, 1935, the total turbine installation in Canada was reported as 7,547,035 h. p., which represents the development of only a little more than 17 1-4 per cent of the present recorded resources.

By far the greater part of the development of power to date has been for central electric stations, the industry engaged in the sale of electricity to meet the general industrial, commercial, municipal, agricultural, and domestic demands of the public. The total installation in central electric stations amounts to 6,589,941 h. p. or 87 1-3 per cent of the Dominion's total. Pulp and paper mills have an aggregate installation of 605,346 h. p. or 8 per cent of the total, while installations for other purposes, such as mines and mineral reduction works, electro-chemical plants, saw, grist, and grinding mills, machine shops, municipal pumping plants, and for electric railway operation, totalled 351,748 h. p. or 4 2-3 per cent.

The "Output of the Central Electric Stations in Canada" issued by the Dominion Bureau of Statistics, reveals the great preponderance of water power in the generation of electricity for public distribution. The 87 1-3 per cent of Canada's total hydraulic installation in central electric stations represents more than 95 per cent of the main plant of the total electricity produced by Canada's central electric stations.

A point of major interest to consumers of power is the low cost of hydro-electricity as indicated by the average revenue per kilowatt hour generated. After deducting revenue received from inter-station sales, the average revenue per k. w. h. received

from the actual consumers is only .703 cent. This low cost has resulted in its widespread distribution and a constantly increasing diversity of uses in domestic, commercial and industrial life.

The pulp and paper industry is the largest individual consumer of industrial power and its outstanding position as the predominant manufacturing industry of the Dominion is largely due to the proximity of supplies of growing pulpwood to readily developable power. In addition to a turbine installation of 605,346 h. p., the pulp and paper industry also purchases hydro-electricity from central stations to operate a motor installation of more than 1,031,000 h. p. so that the hydraulic installation to supply motive power to the industry totals more than 1,636,000 h. p., which represents approximately 90 per cent of the total power equipment of the industry. Large amounts of electricity are also purchased for use in electric steam boilers.

Industries, other than central electric stations and pulp and paper mills, provide a broad market for hydro-electric power generated by central electric stations as they maintain a motor installation for operation by such power of some 1,650,000 h. p. The mines and mineral reduction works and the electro-chemical industry are among the largest users of this power and many of them maintain a considerable generating equipment of their own. The needs of hundreds of scattered communities throughout Canada are met from water-driven saw, grist and grinding mills.

DOLLARS IN BILLIONS

Christian Science Monitor: Chicago money transfer experts estimate that with the \$4,800,000,000 work-relief fund in gold, 90 trucks and a pushcart could carry it. To check this, one starts by knowing \$5,000 in gold weighs 18 1-2 pounds. In \$1,000 bills the tidy sum would fill nine bushel baskets. On a woodyard basis, the sum in \$1 bills would run 924 cords of currency. If the bills blew away and 1,000 men each recovered one bill per second, working eight hours a day, they would gather it all in 16 years. But what's the use dreaming Frank A. Vanderlip, financier, said it during the war—"Neither I nor any other man has the faintest idea what \$1,000,000,000 is like."

SNAPSHOTS

Are the munition workers and news syndicates linked up. Can we believe all the scare-heads regarding naval construction and war preparations.

St. Andrews men served a good supper on Saturday. When someone asked them about decorations, they said the men do not pay much attention to the decorations. It is the food that appeals to them. Good stuff.

A droll situation is where the news behind the news behind the news turns out to be the story the regular reporter sent in in the first place.

A scientist puts forward a theory that our universe was born in a fog. In a time of crisis, it is a comfort to know we are holding our own.

School tests were waived for young Ananda, King of Siam, which is probably unwise if he ever has to take a civil service exam for his job.

In the year in which she has been a princess Barbara Hutton dropped 13 millions. There is, it seems, a royal road to poverty.

A \$5,000 portable house now on sale, comes covered with cellophane. Printing the mortgage on the cellophane would be a pretty touch.

Says Lawyer Frank J. Hogan, of Washington, in a moment of candor: "The ideal client is a man of unlimited resources who is easily scared."

Having the mouth open in one's sleep is the cause of snoring, according to a health writer. As it is the cause of talking when one is awake also, there seem to be no arguments in favor of the open mouth.

LATE FLASHES

ST. JOHN'S, Nfld., April 29—Any anxiety for the safety of some 30 men aboard the crippled English freighter Titanian was allayed today with receipt of a wireless message that the sealer Imogene had reached the side of the ice-locked steamship.

NEW YORK, April. 29—Louis. N. Hammerling 61, noted journalist and statesman, was killed today when he dropped from a window of his apartment on the 19th floor of the Hotel Windsor, apparently the victim of a heart attack.

JOHANNESBURG, S. A., April 29—One European and two natives were found alive in the new Machavie gold mine near Potchefstroom today as rescuers renewed hope for some of the 45 trapped last Wednesday.

DRUMMONDVILLE, Quebec, April 29—Two young boys were burned to death as fire swept through their home at St. Pierre. The victims, trapped in their bedrooms, were Guy Poulin, nine, and Yvon Poulin, seven.

WASHINGTON, April 29—A sharp gain in United States foreign trade during March with imports jumping to the highest level in nearly four years was reported today by the Department of Commerce.

ST. LOUIS, April 29—Three laborers were dead, seven were seriously injured and two men were under arrest today as the aftermath of an explosion and fire that trapped 13 workers in a sewer.

TOKIO, April 29—The official trade council of Japan has appointed a committee to regulate trade with Canada.

Greeks Promised Vote on Monarchy

ATHENS, Greece, April 29—The Government announced last night that it was prepared to hold a referendum on the restoration of the monarchy as soon as the people "become sufficiently calm".

The statement was issued by General George Condylis, War Minister with the approval of Premier Panagioti Tsaldaris.

It said: "When urgent questions arising from recent disturbances are settled, when the country and people are sufficiently calm and in a frame of mind to study the question dispassionately then, if a majority of the people so desire, the Government will not hesitate to put the question of a change of regime before the country and loyally abide by the verdict."

Panic In Ottawa Basilica Averted

OTTAWA, April 29—Rev. Father Onesime Lalonde is credited with averting a serious panic over the past week-end when smoke poured through the Basilica and numerous persons stampeded to the front door, where they became jammed and helpless to get out.

Father Lalonde ordered them back to their seats. They returned and the fire which they feared was discovered to have been merely a short circuit in an electric motor in the basement.

Nazis Issue Final Jewish Decree

BERLIN, Germany, April 29—Henceforth Jews will be deprived of their German citizenship, Dr. Wilhelm Frick, Interior Minister, stated today in an interview appearing in the Berlin Nachtausgabe.

The Interior Minister is quoted as declaring:

"Non-Aryans hereafter cannot be German citizens". By "Non-Aryan", it was understood Dr. Frick would include all present citizens either one of whose grandparents were Jewish.

ON THE AIR

Miss Aida McAnn and Miss Muriel Lutes of Moncton, have arrived in the city to spend several days during which they will take part in a programme on the air.

Don't forget the Home and School meeting tonight at Wilmot Church Vestry.

SCOUT NEWS

During the Easter Holidays the St. Anthony's Second Devon Troop enjoyed its first hike. They hiked about three miles to Poplar Hill. The troop was accompanied by the scout-master, the assistant, Hugh McElligott, and members of the troop committee, Joseph McManus, Russell Grover, and Phillip Grover, who showed keen interest in the work of the boys. During the hike the scouts procured staves for themselves. The thrill of cooking a meal in the open for the first time was keenly enjoyed by the boys. Games in tracking were played during the afternoon, and a game of road side cribbage played on the way home brought the day to a pleasant close. On Friday evening the troop met in the parish hall Commissioner Good and Field Commissioner Pugh were present. Further work in the tenderfoot, tests took up the greater part of the evening. The meeting was brought to a most impressive close by the investiture by Field Commissioner Pugh, of the Assistant Scoutmaster, Hugh McElligott. The ceremony of investiture was explained by the Commissioner.

MATINEE SATURDAY AFTERNOON

The Community Concert held under the auspices of the Home and School Association was repeated on Saturday afternoon at a well attended matinee. The children were warmly applauded and a candy sale did good business.
