**NOTICE OF SALE**

To Frank L. Thomas of the Parish of Douglas in the County of York and Province of New Brunswick and James R. Thomas of the same place and Annie A. Thomas, his wife, and to all others whom it may concern.

Notice is hereby given that under and by virtue of the powers of sale contained in a mortgage bearing date the first days of April, A.D. 1931, registered in Book 214 of the York County Records at pages 264-268 as Number 83475 made between James R. Thomas and Annie A. Thomas, his wife, and Frank L. Thomas as mortgagors and Bertha McMullin, wife of Roy McMullin, as mortgagee, there will, for the purpose of realizing the monies secured by the said mortgage, default having been made in the payment thereof, be sold at Public Auction in front of the Post Office in the City of Fredericton on the 14th day of November A. D. 1936, at the hour of twelve o'clock noon, all the lands and premises described in the said mortgage as follows:

FIRST: All those lands and premises conveyed by Gustave Grandame to the said James R. Thomas under the name of James Thomas by indenture bearing date the twentieth day of September, 1916, registered in Book 164 of the York County Records at pages 23 and 24 as Number 67054 and therein bounded and described as follows: All that certain part or parcel of land situate, lying and being in the Parish of Douglas and County of York, Province of New Brunswick, and known as part of lots number ten, eleven, twelve, being on the east side of the Cardigan Great Highway Road bounded as follows, to wit: Beginning on the east side of the said highway road at the centre of lot number twelve (12) upper or north side of said lot twelve being owned by William Davidson) thence east along said line of lot number twelve one hundred and forty-seven rods to a cedar post, thence southerly at right angles to a cedar fence, (said fence being the centre line of lot number ten, the southern side being owned by David L. Evans) thence west along said fence to the highway road, thence north along the highway road to place of beginning, containing one hundred and fifty acres more or less. Being the same lands and premises deeded by William S. Ray and wife to the said Grantors by deed registered in Book A-7, pages 497 and 498.

Saving and excepting thereout and therefrom that portion of the above described lands conveyed by the said James R. Thomas et ux to Kenneth Bird by Indenture bearing date the third day of July, 1919, registered in Book 173 of the said Records at Pages 18 and 19 as Number 7065, bounded and described as follows: Beginning at a point where the dividing line between land owned by the late David L. Evans and the aforesaid James Thomas intersects the aforesaid Cardigan Highway Road and running along said line easterly one hundred and forty-seven rods to a cedar post, thence in a southerly direction 80 rods to a stake, thence westerly and parallel with the first line one hundred and forty-seven rods to the aforesaid road, thence southerly along said road to the place of beginning forty rods.

SECOND: All those lands and premises conveyed by Kenneth G. Bird et ux to the said Frank L. Thomas by deed bearing date the thirteenth day of May, 1927, registered in Book 202 of the York County Records at Pages 542 to 544 as Number 79810 and therein bounded and described as follows: All that certain lot, piece or parcel of land situate, lying and being in the Parish of Douglas, County and Province aforesaid on the west side of Cardigan Road so called, bounded as follows: Beginning at the said Cardigan Road where the upper line of land formerly owned by Thomas E. Griffiths, now occupied by Merinda Monteith, strikes the said Road and running in a westerly direction along said line to a stake, thence in a southerly direction 80 rods to a stake on the lower line of land formerly owned by Dr. Jacobs, now owned by Thomas Evans, thence along said line in an easterly direction till it strikes the said Cardigan Road, thence along said Road to the place of beginning, the same being part of number eleven being the Daniel Davis lot, containing one hundred acres more or less, being part of the same lands and premises conveyed by deed from William James Monteith and wife to the said Kenneth G. Bird and registered in York County Records in Book 175, pages 386 and 387 under official number 71571 bearing date the 29th day of May, A.D. 1920.

Together with all the buildings and improvements thereon and the rights and appurtenances to the said lands and premises belonging or in any way appertaining.

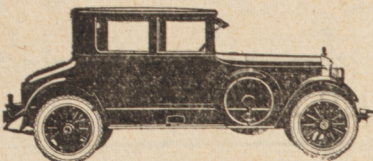

Dated this 10th day of October, A.D. 1936. (Sgd.) BERTHA McMULLIN, (Sgd.) J. J. F. WINSLOW Mortgagee, Solicitor for Mortgagee.

ELECTRICITY (Continued)

Acknowledging the fact that this indiscernible something in lodestone that had magnetic power might be put to some use, scientists, including Volta, Ohm, Henry, Stople, Holtz, Daniels, Leyden decided, in their respective periods to utilize, in some way, this magnetic force. Of course, this is before Edison's time, who might be considered the greatest genius the world has ever known in harnessing this mysterious force.

The first step was to create magnetism in some other form, and so eliminate the necessity of using so ponderous a body to give the required power, as lodestone. This then, was achieved by chemical reaction from one body or liquid to another or from one liquid to some defined body or substance. In other words, it was found that even two solids, working in some specific manner, would cause magnetism, first, perhaps, by the fact that celluloid (as it is called today), rubbed briskly on wool, would create magnetism in the celluloid.

You may try this for yourself by taking an ordinary hair comb and rubbing it briskly upon some woollen substance and then holding it close to a very small piece of paper. The result obtained will be that the magnetic flux created by friction in the comb will pick up the piece of paper or attract the piece of paper to it so that it will readily adhere to the comb—this is electricity. The only shock you will get from this is the fact that I have told you the truth.

From this infinitesimal creation or nucleus came our gigantic dynamos and generators, our radio, our photo-electric cell, in fact our everything that applies to human existence today. By this I mean, that the world has so become converted to electricity and lives in this electrical era, that without it we must die.

The mere fact of combing your hair keeps your hair alive, and I could go into the subject so deeply that it would become monotonous to show you just how dependent we are upon this mysterious force.

My next article will, step by step, show the development from this nucleus to electricity as we know it today.

**QUESTIONS AND ANSWERS**

Q.—I wrote to you before about testing a condenser, and found that you are quite right, and think that these articles really help a man who is trying to understand the electrical points of a motor car. Would you mind telling me what a cut-out really does? I mean the cut-out on a generator.—K. F. Marysville.

A.—Thank you so much for your commendation, and I am always glad to give you any helps that I can. You are free to write at any time.

A cut-out, or a circuit-breaker is simply an electro-magnet in series with the battery and generator. The magnet or core actuates at seven volts, which is a fraction of a volt higher than the battery. In other words, it takes seven volts, with its relative amperage, to magnetize the core enough to attract the armature or point blade. Any voltage below this, the spring tension on the blade will cause the points to open. It is for the purpose of protecting the battery against drain when the motor is not running. It will describe this more fully in an article.

**ADVANCE NOTE ON STYLES**

From Paris, as might be expected, there comes no hint of mechanical advances to be expected in the 1937 cars in this country, but the first indication of color trends, observed at the Concours d'Elegance held recently in the French capital, may be regarded as authentic. Of the cars exhibited, the popularity of the colors shown ranked in the following order: black 21, ivory 11, blue 10, maroon 8, green 6, yellow 4, red and beige 3 each, and brown, gray and white 2 each. The cars exhibited did not offer any sug-

**For a new delight in Tea try Salada Orange Pekoe Blend****"SALADA" TEA****WOMEN'S PART IN OLYMPICS GAMES STRONGLY OPPOSED****Wellesley Physical Culture Teacher Says Competition Making Masculine Types**

MONTREAL, Oct. 13 — Women should not take part in the Olympic Games, Miss Ruth Elliott, a widely-known American physical education authority, declared at the Teachers' Convention this morning. She attacked Olympic sports on the ground that they develop a masculine type of woman.

The convention of the Provincial Association of Protestant Teachers split up into 13 groups for its morning session. All the teachers came together for the official convention luncheon afterwards at the Windsor Hotel.

Physical Trainer Gives Views  
Miss Elliott, who is director of physical education at Wellesley College, told of the modern trends in that sphere in the United States. Addressing the physical education teachers' group, she said that the modern training for their profession was of a much less masculine kind than formerly. Physical education for women, she said, is no longer based on that for men and should avoid any tendency to produce the masculine type of woman, as has been done by the fierce competition for the Olympic team.

Physical education in modern schools has come a long way from the days when the teacher read out directions from a card in the class room, Miss Elliott said. There is a growing practice of periodic examinations. She urged that the examinations should not be merely to discover diseases or abnormalities but should be a general health measure.

There should be some provision for rest and relaxation in the school, Miss Elliott declared. The tension of modern life is great on the pupils and every effort should be made to lessen it.

Swimming has been found to be the most popular sport in American women's colleges, followed by golf and tennis. Mixed recreation carried on by boys and girls together is being encouraged.

gestion of change in the present streamlining popularity, and also there was no accentuation of this principle.

**ONE-LUNGER KEEPS GOING**

A valve rod for a 1903 single-cylinder was shipped recently to an owner who explained that the original rod, although still in daily service, was becoming worn and bent.

"We receive about one request of this type each month," said the Cadillac manager of parts and service. "If we cannot provide the replacement from stock, we usually are able to make it up from the original blue prints. That happened to be the case with this valve rod, which was sold at the original 1903 replacement quotation of \$2.50, although it cost many times that amount to manufacture."

F. B. Osborne, Principal,  
Fredericton, N. B.

Formal gymnastics had formerly been over-emphasized, Miss Elliott said, but are now giving way to more informal activities and rhythm work. She urged that boys should be given some sort of rhythmic training and said that if properly handled they could be stimulated to take an interest in dancing of different kinds.

Criticism of the over-crowding of classes came in two addresses in different sections this morning, from Miss Jessie Norris, in the English and History section, and from L. N. Buzzell, speaking from the parents' point of view in the School and Society section.

Miss Norris argued that it is impossible to give children proper individual attention and develop his particular abilities when there are 35 or 40 pupils in a class. It is especially difficult in English literature classes where the receptiveness of children must be carefully taken into account. The importance of a good command of language in activities of all kinds was brought out by Miss Norris. With the greater use of stenography, dictaphones, the radio and the telephone an ability to compose orally is becoming increasingly important.

"Training in oral expression is the outstanding need in modern life. I believe that Canadians generally speak five thousand words for every one they write. How much time would be saved by business men if the chiefs could dictate rapidly and fluently their correspondence without the necessity for extensive revision?" she said.

Speaking as a taxpayer Mr. Buzzell said that education must be treated as a community problem in which one man cannot refuse for another's child what he desires for his own. Education should be compulsory. Each school board should have full jurisdiction over its particular areas without regard to purely arbitrary municipal lines.

"I feel that too great emphasis cannot be placed upon the necessity of the provincial education authorities constantly taking the lead to improve educational standards," he said.

Ratepayers must realize that the school systems must have sufficient money to meet proper educational requirements, Mr. Buzzell said. At present 94 per cent. of the funds of the Montreal Protestant Central School Board are derived from real estate taxes. Since real estate cannot bear a larger burden than at present the only solution is an increase in government grants.

The present system is too unfair, Mr. Buzzell continued, because it allows the assessment of properties for school taxes to vary from municipality to municipality.

"I personally can see no method for providing for education the funds which it requires to produce a system as I as a parent demand until the whole taxation framework is analyzed and revised," he said.

Speaking in the School and Social section, Stanley Allen, of Sir George Williams College, urged the teachers to stand up for their own ideas, to be leaders in the formation of public opinion, and to inculcate into the minds of the children a proper understanding of the social, economic and political system under which they live. Professor John Hughes, head of the Education Department at McGill University also spoke.

Speakers at the geography section were H. J. C. Darragh, assistant superintendent of schools in Montreal, and H. Carl Goldenburg, who spoke on "The Geographical Basis of Some European Problems."

**THANKSGIVING WAS OBSERVED IN CHURCHES****Many Present on Sunday as Ministers Expressed Note of the Season --- Evangelism of Canadian Life Campaign Gets Underway.**

Thanksgiving was the theme of the sermons in the various churches in the city and locality on Sunday, when the preachers referred to the day as one in which thanks should be offered. In a number of the churches the Evangelism of Canadian Life Campaign was observed, and this will be observed throughout October and November, being arranged by the Ministerial Association.

At Brunswick Street Baptist church Rev. G. W. Guiou spoke on this theme in the evening, and in the morning the annual Thanksgiving sermon was delivered.

At St. Paul's United Church in the absence of Rev. George Telford in Montreal, Rev. Ralph Barker, M.A. S.T.B., Commissioner to the General Council of the United Church of Canada, spoke at both services, and gave his impressions of the recent meeting of the General Council in Ottawa. Prof. Wade, the choir-master, directed a double male quartet at the evening service.

At Wilmot United Church, the Evangelism of Canadian Life campaign was under way with Rev. J. W. Bartlett preaching at both of the Sunday services. In the afternoon at the Men's Brotherhood meeting, W. J. West, the new leader, inaugurated a series of discussions on the teachings of Christ. In the evening at seven o'clock there was a choral service by the choir, which was a song sermon on The Great Survey. At St. Andrew's Presbyterian church, Rev. Dr. G. E. Ross, the regular minister, spoke at all services, and many attended.

At Christchurch Cathedral, Very Rev. Dr. Dean Moorhead was the speaker at all the services.

The usual services were held at St. Dunstan's church and at the George Street Baptist church, with the congregations during all services being large.

Services were held at Devon, Nashwaakisis and Kingsley in the Gibson Memorial United church, with Rev. D. R. Chowen preaching in the morning, and Rev. W. A. Burge, the pastor at Nashwaakisis at three o'clock. Rev. A. D. MacLeod, former pastor, spoke in the evening, and in the afternoon a quartet from the choir of Wilmot church, led the singing. Rev. M. C. Burt spoke at all services of the Advent Christian church in North Devon.
