## Maugerville Sea Wall and Other **Public** Works

It Is Time for Permanent Construction to Prevent Damage From Freshets

#### Major Law son Moves

Daily Mail's Suggestion Re Extension of Richibucto Road Also Taken Up

An effort is being made by Major SAW LITTLE W. C. Lawson, M. P. P. for Sunbury to have construction of a permanent nature made along the river between the turn of the road Maugerville and McGowan's Wharf at Sheffield-a distance of between twelve and difteen miles. Major Lawson wants to see, and is trying to impress upon the government, the matter of having a hard-surfaced road built through the Maugerville-Sheffield section, and what is of greater importance still, he wishes to have a sea-wall erected to shut out the ice freshet and a large measure of the water E. Robertson and Alfred Scadding freshet that has been a yearly menace

SALUTE FOR THE

**Quick Action Not Talk Wanted** 

If it is true, as suggested at the Board of Trade meeting last evening, that certain influences at Halifax are being brought to bear upon the Federal authorities at Ottawa, to prevent our C. N.R. bridge being built the sooner that local people get busy the better.

It is stated that if the bridge is not built that grain and other exports may be routed down the C.N.R. via Moncton and on to Halifax. If the bridge is built the traffic comes via McGivney and Fredericton and on down the valley to the seaboard at Saint John. This traffic down the valley will provide work for the railway men and for others at Devon, Fredericton and elsewhere in this section.

What are we doing as people to impress upon W. G. Clark, M.P., and the authorities at Ottawa that we have the natural outlet to the sea and that this bridge built to standard size, and the road bed put in condition form the keystone and the connecting link to this outlet. There is no use in saying that Mr. Clark said this or somebody else said that. WHAT WE WANT IS THE POSITIVE AND DEFINITE ASSURANCE THAT THE CONSTRUCTION OF THIS BRIDGE HAS BEEN DECIDED UPON AND THAT IT WILL GO THROUGH AS EARLY AS POSSIBLE. No indefinite statements should satisfy us in view of the rumors regarding outside sources

There was no mention of the bridge in the estimates brought down at Ottawa yesterday. Why not? This bridge will take a year or two to build. We should know now where we are at.

The bridge went out in March-a month ago. Tenders for removing the obstructions across the river channel closed on April 8. The progress made in clearing the river has been altogether too slow and we have been altogether too slow in allowing it to be so slow.

If there is anybody interested in this section in a practical way -not all talk-let them get interested actively and start moving. If we don't get busy and do things in a practical way, we will all fall asleep some day and we will have to get dug out. Action, not "bull," is what is wanted.

### **GAMBLING IS** AN EVIL IN THE PROVINCE

Mail

**Proposes to Ask Outside Vendors to Pay** License

(By Mrs. J. L. Neville) The house in committee of the whole considered a bill in regard to the assessment valuation of the Swift Canadian Co.

Reported as amended.

Mr. Porter asked the committee to reconsider the bill respecting the levying and assessment of rates and taxes in the city of Saint John. A bill to provide for the govern-

ment of the city of Saint John by an elective committee was recommended with amendments.

Third readings were given several bills.

The whole house committee considered a bill in respect to gambling devices and slot machines.

The attorney general stated the slot machine is an evil. An act to deal with slot machines and gambling devices must be such as to suppress the gambling business.

Mr. Melville wanted to know if this amendment covered any other form of gambling to which the attorney general answered, in the negative.

General administration of the province will be administered by the R. C.M.P., stated Mr. McNair, and will not enter cities and towns where there is police service.

taxes act was discussed and reported as amended.

ed now provides for a one member commission and a deputy commission sioner cannot act. The deputy would be paid during the time actively en Cross citizens constantly inquired if gaged.

An Act respecting licensing of son and Alfred Scadding of Toronto would not justify leave to appeal. While the facts in support of the third Transien brought some from the mine at Moose River, N. S.

AT EACH END OF **ROAD THIS YEAR** 

A lively but inconsequential flurry occurred in committee of the whole early yesterday concerning the projected road from the Tobique to the Miramichi, during which Premier Dysart stated that this year it was proposed to complete 20 miles at each end of the highway to reach the heart of the hardwood areas.

The standard would be that of secondary roads, and would cost abut \$10,000 a mile, including grading. bridges, etc., he said. The road would be about 22 feet from shoulder to shoulder and narrower than the regular standard.

freedom from the big city's traffic.
