## Phillips & Pringle, Ltd.

The 1937 Chrysler has 54 improvements and refinements over the 1936 models, while the 1937 Plymouth has 66.

The models now on display are probably the most handsome, roomiest and most comfortable riding cars ever imported into Fredericton.

You always get the best things first in Chrysler built cars.

That the Canadian public is fast realizing this is conclusively proven by the fact that Chrysler built cars sold second among all Canadian groups in 1936.

From a 1925 start to second Canadian position in 1936.

Such progress is marvelous and is only possible because of the Supreme Value in

### THERE IS A WOMAN RULES EVERY MAN

Eve offered Adam the golden fruit, Urged him to take it, and he did eat; Abraham harkened to Sarah's suit; Cast Hagar out in the desert heat; Delilah brought Samson to her feet; Constance won over D'Artagnan; Abeldard deemed his Heloise sweet— There is a woman rules every man.

Any man Socrates could confute, But Ventippe's tongue was hard to beat;

Kings and captains of brave repute Have cowed when a woman chirped, "Tweet, tweet"; Even Zeus nods should Hera entreat; And there was a mistress for Caliban.

Satan got Faustus through Margarite; There is a woman rules every man.

Bluebeard, whom ladies would call a brute, Was brought at last to his winding-sheet

By a woman who was too nice to shoot

But not to play on his self-conceit. There was King Minos who reigned in Crete—

Think you, he bowed to no court-ezan? My tally can never be made complete; There is a woman rules every man.

L'Envoi

Prince, the beggar who walks the street,

The lord and miser and charlatan. Even you, prove my contention neat— There is a woman rules every man.

(Continued from Page Eight)

The criticism by a local physician regarding the want of requirements at the hospital does not extend to the nurses who are as obliging and efficient as may be found anywhere. Those who have had experience at the hospital have always been heard to express themselves as being entirely satisfied with the services of the young ladies who are on the hospital staff.

## Our Educational

(Continued from Page Eight)

al education and now principal of the Vocational school in Saint John, has been offered the position and that he is undecided whether to accept or not. It is generally understood, also, that a movement will be made at as early a date as possible to have a shakeup in the educational department of this province. The shakeup cannot come any too soon.

Dr. A. S. McFarlane, chief superintendent of education, has been in Saskatchewan attending a conference of the Canadian Education Association, which is meeting at Regina. Amongst the numbers on the programme will be reports on educational movements and changes in the educational policies of the various provinces since 1934. It is not likely that Dr. McFarlane will be able to report any advancement in our system since that date. But if he will keep his ear to the ground, and is not too stiff-necked, he will probably be able to learn a lot. One man who might be able to teach Dr. McFarlane a lesson is G. Fred McNally, deputy minister of education for Alberta, and a former New Brunswick boy, who would probably be able to give Dr. McFarlane a lot of pointers. Before the convention is over he will probably hear the New Brunswick system discussed and he will also hear that our system is trailing many years behind that of the other provinces. If he listens to the address of H. H. Trimble, superintendent of schools for Moncton, N. B., who will address the gathering tomorrow, he might also learn a wrinkle.

Another department of our educational system which, it is understood, is to be brought up to date, and made to serve the needs of these democratic times, is the University of New Brunswick. It is understood that an effort will be made to have extension courses and to have the university reach out to give some system of Adult Education along the same lines as is now being given by nearly all the universities in Canada. It is felt that the farmers' sons and others should be able to take any course which would help them in their work, at the university, without the need of preparatory training or matriculation. This does not mean that the present university courses, which are good in their line, may not be continued.

That New Brunswick is due for a thorough shakeup in her educational system is something that all persons, irrespective of politics, and who have the interests of our educational system at heart, will agree upon.
