

## Fredericton Junction

The Sunbury County L. O. L. met in Geary Orange Hall on Saturday evening, Sept. 12, the County Master in the chair and delegates present from five lodges—Tracy, Lincoln, Patterson Settlement, Fredericton Junction and the Geary district, which embraces French Lake and Waterville. Increased membership was reported during the quarter. Messages of condolence were tendered relatives of the late Fred Boone of Victoria and John McCracken of Juvenile Settlement.

After routine was disposed of, a number of addresses were given for the good of the order, and supper was served by the local brethren. The meeting broke up with a hearty vote of thanks for the Geary Lodge. The annual meeting will be held at Tracy on the afternoon and evening of October 13th.

1 bloom only, any other color—1st, Gordon Foster; 2nd, Leonard Box.

Antirrhinum—2 spikes each—1st, Gordon Foster; 2nd, J. W. Arnold.

## BRISK TOURIST SEASON IN PARIS

Hotels Are Full and the Famous Coast Resorts Also Enjoy Unusual Prosperity.

PARIS, Sept. 18.—For reasons that nobody, from Government officials down, seems able to explain, Paris is getting many more American tourists this year than at any time since 1930.

All conditions appeared to be unfavorable to a large influx of tourists this summer. Exaggerated reports of social disturbances, consequent to the victory of the Leftists in the Parliamentary elections in May, the epidemic of strikes that swept the country a few weeks later, the sporadic rioting of Fascist groups, all seemed to combine to frighten tourists away.

When the fact is added that France has neither devaluated her currency in the shape of "tourist" francs, as Italy and Germany have done, and that, as a result, prices here are considerably higher than in most other countries, the wave of tourists that has swept over Paris and the French resorts in the past month or so is surprising.

American banks here and branch offices of international tourists agencies have been swamped. Many large Paris hotels, which for the last four or five seasons have had slim pickings, and on many occasions have been reported on the verge of closing, are now full and turning customers away.

The Channel Coast resorts, headed by Deauville and Le Tourquet, after a bad start due to the cold and rainy weather that persisted throughout July, are unable to accommodate the thousands who are flocking there to escape the heat wave. Americans, who have been conspicuously absent in recent years, are again to be seen in great numbers on the beaches and around the roulette tables at the casinos.

On the Riviera, which has had a succession of disastrous seasons, I am informed that more business is being done than at any time since the war. King Edward VIII's decision to take a yachting tour instead of a holiday at Cannes was expected to put a blight on the Azure Coast, but nothing of the sort has happened. The harbor at Cannes is full of private yachts, every villa along the coast has been let, the hotels are jammed and tables at night clubs have been reserved days in advance. Getting a cocktail at any of the popular Riviera bars at the dinner hour is like trying to buy something at a "bargain basement" on a busy Saturday afternoon.

American families who have to get back by Labor Day to put children in school are out of luck unless they reserved their cabins in advance. Ships are leaving European ports almost daily with full passenger lists, and at both the French Line and the Cunard-White Star I am told that if the Normandie and Queen Mary were twice as big as they are they could be filled up without difficulty.

## DEMAND IN CHINA FOR ASBESTOS

Industrialization of a country draws in its train demand for an expanding variety of products. This is the case with China where there is an increasing industrialization, which, among other items, has resulted in a growing demand for asbestos fibre. Deposits of asbestos are known to exist in China but the total production is small compared with other producing countries, and while some of it is remarkably high-grade, that found in many places has a short fibre and is brittle. 22,200 pounds of asbestos were imported last year of which Japan supplied 17,800 pounds, Italy 2,700 pounds, Great Britain 1,100 pounds, other countries the remainder, according to the Industrial Department of the Canadian National Railways. The chief articles produced are asbestos cloth, sheet, packing, wired tape, the big buyers being the Chinese Government railways, Chinese shipping firms, industrial plants, dockyards and engineering works, heating installation contractors, and dealers in hardware and building materials. The great bulk of the domestic asbestos products are manufactured by two factories in North China, one at Tientsin and the other at Tsingtao. There are one or two small factories in Shanghai.
