PREMIER DYSART COMMENDS THE EXPANSION MOVEMENT OF PORT ROYAL P. AND P. CO.

Big Expansion of Port Royal Pulp And Paper Plant

Will Employ 60 to 75 Additional With Nearly \$100,000 Jump in Payroll

Movement Highly Commended by Premier

Work Will Start Immediately Says Manager A. J. Lacroux

As previously announced in the columns of The Daily Mail, the Port Royal Pulp and Paper plant in Saint John is to be considerably increased.

SAINT JOHN, Sept. 21-A. J. Lacroix, manager of the Port Royal Pulp Company, Limited, has announced an extensive plant expansion to start immediately which will enable the company to boost production by the Port Royal Pulp and Paper Co. from 85 tons to 125 tons daily, enlarge the number employed by 60 to 75 men and increase annual disbursements of the company by half a million annually. rangements with the government of fairs into one Department of Mines New Brunswick to insure an adequate and Natural Resources have been ansteady supply of electric power, and anticipating a satisfactory understand ing with the City of Saint John regarding increased water supply, the Port Royal Pulp and Paper Company Limited will start immediately on the installation of a new plant for the

Hon. T.A. Crerar Heads New Combination at Ottawa

OTTAWA, Sept. 21-Plans to absorb the Department of Interior, Mines, Immigration and Indian Afabout since those old departments were first organized and the new setup will be designed to accommodate these changes

Effective Dec. 1

The new department will be presided over by Hon. T. A. Crerar, with base, it is announced by A. J. Lacroix Dr. Charles Camsell his Deputy Minmanager of the company, The new development will be completed by fect Dec. 1, and meanwhile the new

U. N. B.

The one hundred and thirty-sixth annual opening of the old college on the hill took place this morning with a much larger freshman class than last year. The college first opened its doors in 1820. It had been in existance eight years before the first class was graduated in 1828. During the long period of its existance U.N.B. has gradated many thousands of men and women who received during their course the necessary equipment to enable them to face the battle of life. Many of these sons and daughters have carried the fame of their Alma Mater into other parts of the universe, and have made for her and for themselves a reputation that will go down in history. The example of those who have in one walk and another brought credit to U.N.B. is worthy of emulation, and should be an inspiration to the young men and women who have climbed the college hill today for the first time.

To the young men and young women who are today entering college, a new world is opening before them, and the success or failure of their college career rests in a large measure with themselves. They will come in contact with hard-working, earnest professors, everyone of whom is trying to do his best. They will receive many opportunities for advancement. How the students make use of these opportunities depends upon themselves. At the University of New Brunswick the student is left in a large measure on his own, as far as application to work is concerned. When the student comes to the University of New Brunswick he or she is supposed to be man or woman enough to do the right thing. If the student does not do this it is his hard luck and he will generally fall by the wayside.

The University will put before the students the best it has to offer as a means of preparing them for the journey of life. It is the wish of all that they may reap the benefit of this higher education.

The Daily Mail welcomes the new students to Fredericton, as she has been welcoming them for longer than a century. We are pleased to see the old students return again this year. Here's health, happiness and success to the faculty and students at the old college on the hill.

Problems of Power 1

In the process of renovating the Legislative library which has been done during recent weeks several very valuable and historic books have been unearthed in the dim and dusty vault, where for years they were left unnoticed. The legislative authorities and those who had charge of the library in years that are gone by were Visitors Told Not a Gun unaware that the library possessed these valuable books amongst its collection. Included in the valuable collection

are the Acta Pubica or public acts of NIAGARA FALLS, Sept. 21-A England from 1066 down. Included in world jittery with the apprehensions these acts is a copy of the Magna Charta of the date of 1215. The rehelp solve its great modern industrial ports of the House of Lords running from the year 1509 are also on the library sheives. A valuable edition ed by Sir Walter Raleigh in 1621 ed by James I.
