Scaled Tenders addressed to the undersigned, and endorsed "Tender for Breakwater Extension, Esquimaux, N.B.", will be received until 12 o'clock noon (daylight saving), Friday, May 15, 1936, for the construction of a breakwater extension at Esquimaux, Northumberland County, N.B.

Plans, form of contract and specification can be seen and forms of tender obtained at the office of the Chief Engineer, Department of Public Works, Ottawa, at the offices of the District Engineer, Old Post Office Building, Saint John, N.B.; Canadian Construction Association (Saint John Branch), 111 Princess St., Saint John, N.B.; also at the Post Offices at Esquimaux, N.B., and Chatham, N.B.

Tenders will not be considered unless made on printed forms supplied by the Department and in accordance with conditions set forth therein.

Each tender must be accompanied by a certified cheque on a chartered bank in Canada, payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent. of the amount of the tender, or Bearer Bonds of the Dominion of Canada or of the Canadian National Railway Company and its constituent companies, unconditionally guaranteed as to principal and interest by the Dominion of Canada, or the aforementioned bonds and a certified cheque if required to make up an odd amount.

Note:—The Department will supply blue prints and specification of the work on deposit of a sum of \$20.00, in the form of a certified bank cheque payable to the order of the Minister of Public Works. The deposit will be released on return of the blue prints and specification within a month from the date of receipt of tenders. If not returned within that period the deposit will be forfeited.

By order,
J. M. SOMERVILLE,
Secretary,
Department of Public Works,
Ottawa, April 24, 1936.

SUPPERS OUST TEAS TO PACIFY HUSBANDS

Men Balk at Sandwich, Cup-Juggling — Prefer Small Parties

Sunday suppers have become increasingly popular in Canada, because business-weary husbands balked at worrisome tea-cup and sandwich-juggling on their day of rest. Men like to sit down while they are eating, either in a friendly group about the fireside or at a table. And as family and friends listen to the Sunday night radio, they want to enjoy flavoured, satisfying foods, rather than to nibble at those 'dainty sandwiches' that annoy men so much.

For happy Sunday suppers and for late evening parties, delicious cake-desserts are splendid. One of the world's favourite flavours, chocolate, is used in an attractive Chocolate Cream Roll.

Chocolate Cream Roll
3 tablespoons granulated sugar
1-8 teaspoon salt
6 egg whites, stiffly beaten
1 cup cream, whipped
1 square unsweetened chocolate, melted and cooled
2 tablespoons confectioners' sugar
Few drops vanilla
Combine sugar and salt. Add grad-

ually to egg whites, and continue beating until mixture holds its shape. Fold in chocolate carefully. Spread 9x13 inches, and bake in moderate oven (325 degrees F.) 20 minutes, or until done. Cover with cloth and cool. Fold confectioners' sugar and vanilla into whipped cream. Spread on cake-roll as for jelly roll. Chill. Serves 12.

And the egg yolks left from this cake will make up into the finest of custards and may be baked in the same oven, at the same temperature as the Chocolate Roll.

Cocoanut Cup Custard

3 eggs, or 6 egg yolks, slightly beaten.
6 tablespoons sugar
1-8 teaspoon nutmeg
¾ cup cocoanut, premium shred
3 cups milk, scalded
¼ teaspoon salt
Combine eggs, sugar, salt, nutmeg and cocoanut. Add milk, gradually stirring vigorously. Pour into custard cups, place in pan of hot water, and bake in oven (325 degrees F.) 35 to 40 minutes, or until knife inserted comes out clean. Chill. Serves 6.

BRITISH KITCHEN AT INDUSTRIAL FAIR

Old Land Architects Use Canadian Materials Extensively—Silvery Metals Popular

LONDON, England—For feminine visitors to the British Industries Fair, one of the outstanding displays was a complete model kitchen designed by the well-known British architect, Frederick Barber, I.R.L.B.A., F.I.B.D. In recent years, enormous strides have been made in housing throughout Great Britain and the housewife's chief work room has not been overlooked.

To Canadians, some of the kitchen terms will be interesting but unfamiliar. The word 'cooker' is used instead of stove and an 'electric fire' is included in the equipment to take care of the heating of the room. The latter is an essential as well as hatch fittings.

On investigation, much of this new British kitchen originates in Canada. Metals are widely used, the windows, for instance, being metal and the natural Canadian alloy of nickel and copper, monel metal, is used for practically all working surfaces, for table tops, larder shelves and the hot water boiler. Cooking utensils are of pure Canadian nickel while nickel-chromium alloys are used for electric heating and cooking elements.

An expert says that a really good diamond will make a hole in almost anything. Especially a banking account, says the cynic.

Moose River Mine Operated Without Being Inspected

(Continued from Page Two)
ters into their own hands before any progress was made. Mr. MacDonald said this was not in accordance with the facts.

He recalled how the Reynolds shaft had opened up of itself after other avenues of rescue had been tried. Four or five days had passed before there was any suggestion that the Reynolds shaft would afford a way of escape. This was due to a sudden movement of the earth at that point.

The mines department, said the premier, had no knowledge of anything irregular regarding the operation of the mine and it had no knowledge of the suggestion that pillars supporting the roof of the mine had been pilaged.

Harrington Replies

Again Col. Harrington arose to reply. He said the two Toronto men had been brought to him by a Halifax newspaperman. The interview was not the type he would have given them if he had known he was speaking for publication, he said.

He said he had not realized he had been ungracious when Mr. Dwyer and Dr. Davis had returned to the House from Moose River. He said he had no recollection of being stirred to the point that he felt "the heroes are coming" and he was unaware his failure to clap his hands had been noticed by the government members.

Col. Harrington felt the debate had not been in conformity with the rules of the Legislature.

DOW SETTLEMENT

DOW SETTLEMENT, April 30 — Rev. H. D. Worden of Meductic spoke here in the Baptist church Sunday at 3:00 P. M. and 7:30 P. M., both messages were helpful and interesting.

The B. Y. P. U. are planning on a very wonderful service to be held the Tuesday following Mother's Day. Everyone is cordially invited to attend.

Mr. Waldo Cummings spent the week-end at his home here.

Mr. Lester Dow bought a new team of horses last week.

Mr. James McLellan was in the town of Woodstock to see the doctor about his health last week.

Mr. Opal Lutwick and Robert Patterson were calling on Mr. Sandy Moody Monday morning.

Mrs. William Walker is improving in her health. Her sister is expected here Monday.

Mr. James Tompkins was calling on Mr. Sandy Moody Wednesday afternoon.

GARDEN WAYS

Window-boxes—which always have a rather gala air—make few demands on time and effort. Indeed, once off to a good start, they generally run along in riotous bloom from Spring to Fall with the very minimum of attention; apart from watering, which must be frequent during very hot weather and a generous feeding necessitated by the small amount of soil in each box.

Brilliant-hued geraniums are an excellent choice for window-boxes. Scarlet geraniums, for instance, would be attractive if combined with white candytuft and the Blue Bird anchusa—a comparatively new variety that is recommended for window-boxes. Petunias, too, are satisfactory for a window-box. The balcony type in pink, white or blue; the bright red of the Scarlet Beauty and the soft pink of the Rosy Morn are all commendable.

Now, as the home-gardener proceeds to make the very most of the Spring planting season, let him not forget that gardens need food—and plenty of it! And he must not forget that garden enemies also are on the watch for food from Spring to Fall. Gardeners, therefore, should be ready for these enemies with insecticides and fungicides, so that nothing will retard the normal growth and beauty of the varied flowers and foliage.

Foundation planting adds so immeasurably to the appearance of a house that it never should be overlooked. Evergreens are particularly appropriate, of course, on account of their year-around beauty. Unfortunately, however, home-owners sometimes are induced to buy evergreens that are entirely inappropriate for foundation planting, which clearly should be relatively low in habit of growth. The mugho pine and the low, spreading junipers are effective as a rule. There also are dwarf types of spruce and cedar which can be used with interesting effect, while there are pyramidal varieties of juniper, as well as cypress, to provide the accent of greater height wherever necessary.

You can keep brass from tarnishing if you will rub over the cleaned and polished surface with a slice of raw potato. Old pewter that is badly blackened can be cleaned by soaking it for a day or two in a quart of water, to which you have added a piece of potato the size of a nut. On removing from the water rub the surface of the pewter with a cork dipped in oil; polish with a chamois and whiting. After this treatment the pewter can be kept bright merely by washing with hot water and soap.

E. R. McDONALD MAY BE JUDGE OF PROBATES

MONCTON, N. B., April 30—That Mr. E. R. McDonald, K. C., M. P. P., of Shediac, is to be appointed Judge of Probate for Westmorland County to succeed the late Judge R. W. Hewson, K. C., who died in the month of December last, is learned by The Times on reliable authority. It was generally understood that the main reason of the delay in making the appointment was a desire to avoid a vacancy in the county representation before the session of the legislature, and judges of probate pro hac were appointed for various estates procedure which was not authorized by statute, but which was legalized by act of the legislature during the session just closed. In future, it will be legal to appoint a Judge of Probate pro hac vice in the case of a vacancy caused by the death of a Judge of Probate.

Several names have been mentioned for the position, among others, those of Mr. James Sherren, Mr. Henry Friel, both of this city, and Mr. J. M. McIntyre, of Sackville. However, it is now practically settled that the post will go to the local member.

It is rumored that Mr. John Kelly, of Shediac, is slated for the government nomination to fill the vacancy which will arise through the appointment of Mr. McDonald. Other names mentioned are those of Mr. Savage, of Port Elgin; Mr. Henry Friel and Mr. Reid McManus, former M. P. P. It is not yet known what will be the attitude of the opposition.

Garbled News by Air

The Radio Committee of the House of Commons received enlightenment a few days ago on the way news is sometimes interpreted or misinterpreted for the benefit of the air audience. W. B. Preston of the Brantford Examiner, who is President of the Canadian Press, pointed out that news has become an outstanding feature of radio programmes; that an increasing number of Canadian commercial broadcasting stations pick off the air at nominal cost news broadcasts originating in the United States some of which, if not actually anti-British, misrepresent the British position in world affairs. As an example, a news commentator in the United States declared on a recent occasion that Prime Minister Baldwin said: "Great Britain will not go to war unless assured of United States support."

RUST-PROOF PLUMBING

There is nothing more annoying or expensive than to have the interior of the house torn up because you have to open up floors and walls to remove rust-clogged water pipes.

BRASS PIPE NEVER RUSTS

This means that the pipes never become rust-clogged, nor do plumbing fixtures become streaked with rust. Let us make your plumbing lastingly satisfactory with brass piping.
