THREE DEFRAUDED PROVINCE; JAILED

QUEBEC, April 6—Three men formerly in the employ of the Quebec Government were given prison sentences by Judge Laetare Roy in Court of Sessions today on charges of obtaining money under false pretences from the Department of Roads.

Emile Marcotte, 30, auditor of the Treasury Department, was committed to jail for 18 months; Joseph Rivard, 30, carpenter of St. Thibault, Que., was given eight months and Adelard Gravel, 35, laborer, of Duparquet Township, was sentenced to 12 months.

Louis Audet, of Duparquet, was convicted and sentenced last week on two charges of receiving money under false pretences. He went to jail for a month.

In passing judgment Judge Roy said that he would not be very severe as the defendants had been frank and through their efforts part of the \$5,500 had been recovered.

LOCAL MAN MAKES RECORD SALMON CATCH

Walter Wade, of Penniac, spent the week end at the mouth of the Cain's River with Guide Charles Wade. Mr. Wade made a record catch for the season. With a five ounce trout rod he landed a 22 pound salmon measuring 43 inches long. The six Americans in the party found the fishing excellent, catching salmon weighing up to 14 pounds. Due to the continued cold spell and recent snow flurries, guides in the Miramichi district expect a prolonged salmon fishing season.

Several American parties are expected to be in Fredericton this week, enroute for Miramichi river points.

PARTING GUEST

I know I welcomed winter
With a delightful smile;
He was a zealous, keen guest,
I loved him—for a while—
But love is only transient,
It passes like a song,
Winter wore his welcome out
By staying far too long.
And such bewitching sunshine
Entices me today;
It has a touch of April
And just a hint of May.
Even my white hyacinth
And golden daffodils
Take on an added beauty
From sunny window sill.
So I speed my parting guest
With an impatient frown,
March wind, will you hurry, please,
And show him out of town!
—K. A. Mackinnon.

HIGHEST PAID JOB IN THE WORLD IS OPEN

What is considered to be the highest paid job in the world is vacant.

This was revealed during the sitting of the British Royal Commission on the private manufacture of arms, F. C. Yapp, a director of the Vickers-Armstrong armaments firm, replying to a member of the commission, Sir Phillip Gibbs, well known author and former war correspondent, said his firm had nobody to succeed Sir Basil Zaharoff as its chief agent. He added that Zaharoff was now their only agent for Spain.

Sir Basil, "the Mystery Man of Europe," is rated as one of the wealthiest men in the world. He distributed more than \$1,000,000 to the Allied cause during the war. He financed the Monte Carlo Casino with \$5,000,000. He bought several daily newspapers in Greece and financed others in Europe. Vickers' war profits are said to have succeeded by far their then capital of \$67,000,000 and it is a financier's hobby to calculate Zaharoff's percentage of that.

STORE BURGLARIZED

Yerxa's grocery store on Queen street was broken into in the early hours this morning and groceries stolen. Police are working on the case today along with several other breaks which have occurred in recent weeks. The latest epidemic of robberies includes breaks at McMurray's Book and Stationery Store, Harvey's Studio, and C. W. Hall's book store. In most of the cases entry was effected through the roofs, the burglars taking advantage of the flat-topped roofs, which afford accessibility to the floors below by windows or skylights.

EXECUTIVE MEETING

An executive meeting of the Fredericton Board of Trade will be held this evening at eight o'clock in the board office, Estey & Curtis building. Several matters of importance will be dealt with.

design, and the store-fronts will be ultra-modern in appearance. The Edgecombe building was burned early this winter at an estimated total damage of from \$50,000 to \$75,000.

The work of renovating the Waverly Hotel which when completed will have a considerably widened front, is progressing favorably. This work is expected to be completed by April 15 or 20.

The contract for the construction of a new four-story building at the corner of Queen and Carleton Streets was awarded on Saturday to the New Brunswick Contractors, Limited. The price was in the vicinity of \$30,000. The new building will be of brick and will take the place of the old Ryan property and will likely be completed by September 1. Work is expected to commence shortly.

One of the features of the new building, as pointed out by The Daily Mail some time ago, will be a hand-operated elevator.

There'll be a fight in your flat
If one falls and kills the cat.

Old Times Recalled

JAMES WOLFE AND
THE SIEGE OF QUEBEC

The New Brunswick Museum is giving province-wide service along two lines:

1. Work under the capable direction of Dr. MacIntosh in school department supplying schools all over the province.

2. Province-wide teaching of history by extension lectures on John Clarence Webster Collection, the finest and most valuable historical collection in the Dominion of Canada. The lecture which Dr. A. G. Bailey gave to the Science Club was on the career of James Wolfe and the Siege of Quebec. The Webster Collection, which is the largest in the world on Wolfe, provided the illustrations for this lecture.

The following paper was read by Dr. Alfred G. Bailey of the Provincial Museum, Saint John, before the Fredericton Science Club. We will, by request, publish a portion of it each day until the series is completed.

Before beginning my talk on James Wolfe and the Siege of Quebec, I wish, if you will permit me, to say a few words about the educational policy of the New Brunswick Museum. As a provincial institution the New Brunswick Museum is endeavoring to give a province-wide service along educational lines. The function of a museum as an integral part of an educational system is becoming increasingly recognized in the more advanced centres of civilization in the Western World today.

In New Brunswick a provincial museum is particularly needed, perhaps more than in many other parts of North America, because it supplies deficiencies in the educational system which no other institution in the province seems either capable or likely to supply. The services, which it renders, fall into two groups. First, it supplies a large number of schools, in every county in the province with a vast amount of material designed to facilitate and make more efficient the teaching of Natural History. Under the able direction of Dr. William MacIntosh regular loan collections of mineral and fossil specimens, birds and animals mounted in transportable cases, the leaves of the trees, and furs or wild animals of New Brunswick, explanatory charts of wild and domestic animals, implements of the stone age, and samples of modern industrial products, are prepared and distributed, accompanied by well drafted teachers' notes. The Museum thus serves as a manufactory, distributing centre and depository for this highly essential educational material. The advantages of this service to some of the poorly-equipped county schools can well be imagined.

Second, the teaching of history, and in particular, Canadian History, in the schools and colleges of New Brunswick, has in the past suffered considerable neglect. But I wish particularly to stress this neglect of history because its consequences seem to me to be deep and wide. A prominent citizen of New Brunswick a few years ago reminded a large gathering of distinguished educationists that if there were Maritime rights, there were also Maritime duties. He implied I think, clearly, that the peoples of these provinces owed certain duties to themselves which were not being fulfilled.

He proceeded to say that the economic ills of these provinces were directly traceable, at least in part, to the failure of the cultural and educational life here to keep abreast of the most effective development in other parts of the world. The chief shortcoming, so he stated, was the neglect of the study of history as a source of inspiration and as a directive force in the present. And, I suppose, unless we have some prospective of our forbears, their opinions and prejudices, their mistakes, and their occasional clearheadedness and vision we cannot realize our own limitations and possibilities, nor measure our present achievements by the yardstick of those past.

It seems safe to make the generalization that no nation can survive, much less triumph, whose people are not vividly conscious of their own living traditions.

Now, however, we have the means at our disposal for correcting this situation, and it only remains for us to use them.

As a part of the educational work of the New Brunswick Museum it is intended that a series of extension lectures on historical subjects should be prepared for and presented to any high school and adult audiences throughout the province that wish to avail themselves of this service.
