Peace Begets Peace, Message to Canadian People by Mackenzie King

Most Spectacular Literary Event is Launched in Toronto

Sir Charles G. D. Roberts Assists Sir William Mulock in Opening Fair

Aim to Promote Good Reading

Book Fair Sponsored By Canadian Bookmen Association

TORONTO, Nov. 10—The opening of the A.C.B. Book Fair by Sir William Mulock and Sir Charles G. D. Roberts in Toronto ushered in the most spectacular event in Canada's literary history. The fair is to be a continuous performance with shifting attractions—booths changed daily, new celebrities introduced, varied stunts and lavish decorations.

The Association of Canadian Bookmen, a co-operative, non-profit body, was formed a few months ago under the patronage of his Excellency Lord Tweedsmuir, Governor-General of Canada, and, in private life, John Buchan, historian and popular novelist. The purpose of the A.C.B. is to weld all elements connected with books. It now has upward of 2,000 members, made up of book readers, authors, librarians, publishers, critics and booksellers. All are in this for the mutual aim of promoting good reading.

An annual membership fee of \$2 entitles one to attend all functions, such as this fair; to receive absolutely free, one good current book, chosen from a list of thirty-five; also access to the bulletins and other literature issued by the association, which differs from all other book clubs in that there is no obligation to buy anything. The A.C.B., as an organization, neither publishes nor sells books.

At this fair in the King Edward Hotel, not only the new books may be seen, but old and rare ones as well. Original manuscripts by Kipling, Hardy and others, will be on view, as well as many priceless items that have never been published.

Distinguished and popular authors will be present to meet their readers, to autograph books, and they will be heard speaking in the lecture hall afternoons and evenings, until and including the closing day, Nov. 14.

Art will be represented. Book illustration is being covered artistically. Arthur Heming, Stanley Turner and other illustrators will be present in person. Outstanding examples of illustrations will be on the walls under the supervision of Dorothy Stevens, eminent painter.

The Canadian Authors' Association have the largest booth; and if visitors imagine there is no Canadian literature or that good books are not made here, let them attend and get the surprise of their lives—thousands of magnificent Canadian books of all kinds!

When the Canadian authors were addressed at dinner in London three years ago by Chesterton, Shaw and Kipling somebody had the forethought to take a talking movie, which is now the only means in the world of hearing the voices of the

SEES STEADY RECOVERY IN CANADA

(Special to The Daily Mail)
QUEBEC, Nov. 10—Sir Felix Pole, chairman of Associated Electrical Industries, Limited of Great Britain, returning to England yesterday aboard the C. P. Liner, Empress of Britain after a fraternal visit to Canadian and United States electrical manufacturers told reporters that signs in Canada all point toward a steady economic recovery.

Measured by the yardstick of the improvement noted in England in the past two years, the signs of returning prosperity in Canada are all present, Sir Felix said.

"In England we are having a building boom," he said, and pointed out that building is an important industry. Every person employed in building gives employment to two others and the whole thing becomes the unwinding of a spiral.

Asked the reason for his visit to Canada, Sir Felix said he had not been here since 1929, and that was too long to stay away from Canada.

His companies, he said, are not interested in the manufacture of electrical specialties used in connection with armaments.

It is good to think that our own family of peoples is at peace in itself and united in one desire to be at peace with other nations—the friend of all—the enemy of none. May the spirit of good-will and mutual helpfulness grow and spread. Then it will bring not only the blessing of peace but a solution of the economic troubles which still beset us."

At the recent League Assembly a more realistic attitude was made clear as to what was to be faced. It was apparent what the world needed was a "political physician." With the League meeting amid the troubles in Spain, Italy's resentful of sanctions, Germany no longer a member, and the air full of propaganda and exchanges between nations "that a few years ago would have meant war even if uttered privately," it was not surprising that nothing of a positive nature was accomplished.
