OUR ELMS

In classic times the pagan Greek Shivering with fear was sent to seek The friendly tree nymph's kindly aid And crouching by a forest tree Invoke the greenwood deity So comes our "tapping on wood" A custom much misunderstood.

So city worthies in past days Turned on our elms a grateful gaze Each street a sea of murmuring green The choicest that our land has seen A legacy for the public good So that we all might "tap on wood."

But crafty cankerworms made their "bough" And nestled in each tree—and how! The reason why seems known to few Still less exactly what to do Our foliage serves their private ends Beneath their clusters each limb bends

This year a person would be good To have a wish to "tap on wood." H. M. P.

If You Have a Child

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." Safe for children. No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

TAKE THE HEAT ON HIGH

(or Keep In High Gear This Summer)

WHEN the heat comes, some people, like old cars, can't make the grade—they have to slip into "second" or into "low". The heat slows them, saps their "horse power". Why can't a youngster of almost 80, who, judged by conventional standards, should be on the scrap heap, drive in high through the hottest summer, defying Mr. Sol, just as in winter I scorn Mr. Zero? The answer is foods. People give no thought at all to the foods they ought to eat, only the foods they like. They follow the herd. Herd intelligence is notably no intelligence at all.

If people would really think, they would realize that bodily health depends upon the blood that feeds the body cells. The blood depends upon the kind of foods which build the blood. Therefore the kind of blood that flows through our bodies can make us shrivel and shiver on cold days and wilt and wither on hot days. The cause of both is viscid, ropy, toxic blood, derived from denatured, dead, demineralized, constipating foods.

Here is how to prove me right or wrong. During the hot spell, make your breakfast of Roman Meal, Bekus-Puddy or Lishus, all you can enjoy with milk or cream, raisins or chopped dates, not body-heating sugar. Make thick enough to chew thoroughly. If hot cereal is not liked, cook any of them the previous night, allow to cool, place in refrigerator and serve for breakfast, with sliced or canned peaches, ripe bananas, fruit jelly, preserve, or honey with cream or milk. Drink iced Kofy-Sub, sweetened with brown sugar, or preferably honey, added while hot, a very delightful and healthful beverage. For noon meal a salad of fresh fruit or raw vegetables, iced Kofy-Sub. For evening meal, a large fruit or vegetable salad, sprinkled with grated nuts, grated cheese or cottage cheese, or lightly steamed vegetables if salads are not liked, as second choice. Any kind of juicy fruit for dessert. Iced Kofy-Sub or hot Kofy-Sub if hot drink is preferred.

Train the intestines to eliminate after each meal. It is of utmost importance to exercise all groups of muscles briskly, fifteen or twenty minutes daily, to the point of deep breathing, to burn up internal poisonous waste. If you do not know how, send fifty cents for my book "SYSTEMATIZED
