SCHOOLS SHOULD DIRECT GROWTH PHYSICALLY, MORALLY, MENTALLY

The schools of British Columbia have definitely joined the increasing numbers of schools of enlightened democracies which attempt to educate children for actual living rather than to cram them full of undigested facts, says a story from Vancouver in the Christian Science Monitor. Beginning at the first grade, the traditional "Three R's" have been given a revaluation and re-emphasis to include the encouragement of individuality, creative thinking and individual expression.

"It is the function of the school," declares Dr. G. M. Weir, Minister of Education for British Columbia, who is responsible for the introduction of the new curriculum, "through carefully selected experience, to stimulate, modify and direct the growth of each pupil physically, mentally, morally and socially, so that the continual enrichment of the individual's experience and an improved society may result."

Although textbooks remain basically the same, teachers are instructed to develop the child's thinking and character, to impress upon him the importance of his relationship to his family, to his companions and to the world at large. At the present time this philosophy embraces all grades from one to nine. Next it is expected that the new policy will be extended to the high school grades.

History, geography and the English language have attained new standards. Less time should be given to the political and military aspects of history and more time to the social, industrial and cultural angles, it is claimed. "History in the making," is believed, is of first importance. Boys and girls, of whatever age, should be encouraged to think more about the civic and national issues of

modern times. The economic geography of the past has been labeled "dry bones" as research workers compile geographies that have up-to-the-minute facts concerning Canadian production figures, exports and imports, and so forth. They are carefully selected and teachers are encouraged to present them in more natural ways by means of interesting topics and problems. A more adequate teaching of the use of punctuation in English, coupled with extensive drilling in speaking and writing, it is hoped, will develop in the pupils a keener sensitivity with respect to choice of words, both in accuracy and beauty.

Curriculum Enriched

Instructions in safety, in the evils of alcohol and narcotics are being given children from the first grade. Hygiene and physical education, home economics, manual training, music and writing are taking the place of some of the "old-fashioned" subjects in primary grades of former years. Tots entering grade one are immediately given the primary book on the basic principles of painting and design, which at the same time will be used for spelling and natural history.

"Development of a will toward international peace, self-control, leadership and co-operation. These are some of the things which should be given attention in the gradual evolution of educational methods," declares Dr. Weir. "Adopt a research point of view—a broad point of view without preconceived notions. Ideals, purposes, planning—these are the main points of your program. Think these things over. You have attempted a big job. You are attempting to fit new generations to problems of a new age," he declared in instructing teachers in their new duties.

COLLEGE WASTE HELD "TRAGIC"

Dean Johnson Says Many Students Are Unfit for Academic Careers

COLLEGE WASTE Woman's page
NEW YORK, Oct. 11—The most prominent feature of American higher education is the "tragic misdirection and waste of human lives," brought about by failure to school each individual in harmony with his native talents, according to Dean John B. Johnston of Minnesota University's college of science, literature and arts. Dean Johnston's criticism is made public today in a study entitled "Scholarship and Democracy," published by D. Appleton-Century Company.

The educator discloses that 52 per cent of the freshmen who entered his institution in 1931-32 were unsuited for college work, and gives the impression that this is generally true of colleges.

"The loss to society resulting from the misdirection of these young people no one can measure," he says, "yet these persons are clearly capable of rendering service useful to society."

The American system which attempts to educate all youths alike, Dean Johnston declares, "leads the most brilliant and capable to slump to the level of the mediocre and common. America today, instead of putting her best foot foremost, has hobnobbed her best foot to her worst and falls to earth when she tries to leap or run."

Castigating the "Topsy-turvy educational policies which send to college thousands of students unfitted in

intellect for an academic career, the Minnesota dean proposes that society provide training in manual dexterity for those who have the ability for it. Training should also be given those showing proficiency in music, painting, scholarship, the professions and statesmanship, he says.

The educator's study shows that the highest ratio of good students at Minnesota is drawn from the self-supporting group.

In the years 1931 to 1935 at Minnesota, the study states, only 42 per cent of the children of well to do families become successful students and 6.5 per cent secured honor standing. In comparison, 58 per cent of the students from poor families attained scholastic success and 15 per cent achieved honor grades.

Declaring that "higher education is limited to the children of the well to do," Dean Johnston sharply criticizes the present system, which, he says, decrees that many of the nation's best minds shall be doomed to lives of "humdrum inconsequentiality" on farms, shops or assembly lines.

Arguing that the public should pay for the education of intelligent but impoverished students, the university official expresses the belief that "education is a service to be provided for all young citizens in proportion to their ability to use it and of a kind suitable to the peculiar abilities of each."

BROADCASTING NOISES IN HIS HEAD

George Yocum, Pennsylvania coal miner, has been troubled with a whistle and roaring noises in his head since his skull was fractured in a mine accident some time ago. In Philadelphia, his head was wired for sound, and George's whistle and the roaring noise came out of a loud-speaker. Here he is seen broadcasting before doctors and medical students.

Canada's Favourite Tea "SALADA" TEA

Al Mingalone, of New York, a photographer, emulated Professor August Piccard, stratosphere balloonist, in Old Orchard, Maine, when a rope holding thirty-two four-foot balloons to a post broke and carried him on an unexpected thirteen-mile flight. He was brought to earth when rifle shots, fired by Rev. James J. Mullen, punctured some of the balloons.

MANY DEER AND BLACK BEAR ARE TAKEN IN N. B.

MONTREAL, Oct. 11—With the hunting season getting into full swing in various parts of Canada, moose, deer and black bear are falling before the rifles of big game hunters in northern Quebec and northern Ontario, while in the Maritimes, deer and black bear are being taken in New Brunswick and Nova Scotia, with the moose season open in Nova Scotia from October 20 to 31, according to C. K. Howard, head of the Fish and Game Department of the Canadian National Railways.

It is pointed out that for hunters entering Canada from centres in the United States and shipping their trophies across the border, certain custom papers are required for the export of their game from Canada, and other papers for entry of the game into the United States in order to avoid delay of their shipments.

"THE DISCOVERY" IS GIVEN TO THE DUKE OF KENT

(Special to The Daily Mail)
LONDON, Oct. 11—The Royal Research ship "The Discovery" has been donated to the Duke of Kent. The gift was received by the Colonial Secretary and Lord Baden-Powell.

NOTICE OF SALE

To Richard Gallagher, of the City of Fredericton, in the County of York and Province of New Brunswick, Blacksmith, and Julia Ann Gallagher, his wife, and to all others whom it may in any wise concern:

Public Notice is hereby given that under and by virtue of the provisions of The Property Act, and of the Power of Sale contained in a certain Indenture of Mortgage bearing date the twenty-seventh day of April, A.D. 1927, made between Richard Gallagher of the City of Fredericton, in the County of York and Province of New Brunswick, Blacksmith, and Julia Ann Gallagher, his wife, of the first part, and Frank Gunter, of the Parish of Kingsclear, in the said County of York, Lumberman, of the second part, and duly recorded in York County Records in Book 201, pages 529 to 532, under official number 79482, the twenty-eighth day of April, A. D. 1927, there will, for the purpose of securing payment of the moneys secured by the said Indenture, default having been made in the payment thereof, be sold at public auction in front of the Post Office in the City of Fredericton, in the County of York, on Saturday, the sixth day of November next, at the hour of twelve o'clock noon, the lands and premises mentioned and described in the said Indenture of Mortgage as follows:

"All that certain lot, piece or parcel of land situate in the Parish of Manners-Sutton, in the County of York and Province of New Brunswick, and bounded as follows, to wit: Beginning at a pine tree standing at the most western angle of the eastern part of lot number sixty-eight granted to William Atchison east of the road from Harvey to Lake George, thence running by the magnet of the year 1923 south forty degrees and thirty minutes east fifteen chains and thirty-eight degrees west three chains and eighty links and thence north forty-eight degrees and thirty minutes east ten chains and seventy-six links to the place of beginning; excepting from out of the above described tract all that portion of the aforesaid road from Harvey to Lake George contained therein, said tract containing fifty-six acres more or less and is distinguished as the western part of lot number sixty-eight on the road from Harvey to Lake George. The above described lot having been granted by the Crown to said Thomas S. McCutcheon the fifth day of February, A. D. 1924, and registered the fourteenth day of February, 1924.

Also all that certain other lot, piece or parcel of land and premises situate, lying and being in the Parish of Manners-Sutton aforesaid and bounded as links to a spruce post standing at the most southern angle of said part of lot number sixty-eight thence south forty-eight degrees and thirty minutes west thirty-eight chains and thirty-two links to a white birch tree standing on the northeastern limit of grant to Zachariah Chipman and at the most western angle of lot number sixty-seven granted to James Brownrigg thence north thirty-eight degrees and thirty minutes west fifteen chains and thirty-eight links to a willow post standing at the most southern angle of lot number sixty-nine granted to Samuel Hoskin, Senior, thence along the southeastern limit of said lot number sixty-nine north forty-eight degrees and thirty minutes east twenty-five chains and five links to a spruce post standing in the western limit of a School Reserve, thence along the said limit of Reserve south twenty-seven degrees east three chains to a birch post thence north seventy-three degrees east one chain and fifty links to the western side of the road from Harvey to Lake George aforesaid, thence along the same north seventeen degrees and thence along the old grub road at the most northern angle of lot number sixty-eight granted to William Atchison in the southwest range of Acton Settlement West, thence running by the magnet south forty-seven degrees west sixty-four chains thence north forty degrees west with a rectangular distance of fifteen chains to another stake, thence north forty-seven degrees east sixty-two chains to another stake standing on the southeastern side of the old grub road aforesaid and thence along the same south forty-two degrees east fifteen chains to the place of beginning. Excepting that part of the road from Lake to Harvey Station running through the above described tract or piece of land containing ninety-four acres more or less and distinguished as lot number sixty-nine in the Southwest range of Acton Settlement West. The said last mentioned lot of land having been conveyed to the said Thomas S. McCutcheon by deed from Robert Rosborough and wife dated the twenty-third of July, 1921."

Together with the buildings and improvements thereon.

Dated the fifth day of October, A. D. 1937.
