"OUR EDUCATIONAL SYSTEM CAN GIVE STRONG LEAD PROMOTING HAPPINESS IN THE RURAL DISTRICTS" -- McGRAND NO ARRANGEMENTS Discrimination

Old Age Pensions In New Brunswick Average Highest

Cost Administration Less Than Other Provinces in Canada

Relief Racket Eliminated

Favors Two-Party System Best for Good of the Country

(By Mrs. J. L. Neville) Dr. F. A. McGrand, M.L.A., of Welsford, member for Queens County, resuming the debate yesterday created a favorable impression on the House in his maiden speech. He ably rebutted the accusations levelled at the Government in regard to alleged exces sexpenditure in connection with the Administration of Old Age Pensions showing that such expenses had been less in New Brunswick than it is in other provinces. He jutified the policy of the Government as to free school books and showed that the present Administration since coming into power had accomplished many of their promises, Credit Unions, use of hardwoods for culverts, the Fair Wage Officer was militating against the relief racket which had existed previously. He showed that in 1936 more money had been given

the depression year, which was 1933. | report. The average pension paid out was higher than the average of other gations in respect to bills before the provinces. As to the money spent in election campaigns there were proofs heard next week as follows, on acto show that the Opposition had count of the large number of bills bespent more money in their attempt fore the Committee: Milltown and St. o return to power. Dr. McGrand Stephen, Tuesday; Moncton, Thurstouched on Education and stressed the importance of the bringing of our Public School system within close reach of rural districts thus helping to bring contentment and happiness to the rural districts rath- tinued into the series of breaks er than an inclination to make for which occurred here a couple weeks cities and towns. He cited examples ago, resulting in the thefts of nearly of cortain industries which might \$1,000 worth of goods. Three estabwell be developed and add increased lishments were entered by the marrevenue to the farmers. WITH THE LEGISLATURE YESTERDAY

The House met at 3:35 p.m. Mr. Boucher was in the Chair in the absence of the Speaker.

The following bills were given the, second reading: to provide for the purchase of property and reconstruction purposes for the Provincial Hospital, Saint John; to amend Chapter 12, 24 George V, 1934, the Succession Duty Act, 1924.

Mr. McDonald, from the Standing Rules Committee, presented their sixth report.

Mr. Blakeny, from the Municipalitout for relief than at the height of ies Committee, presented their first

Mr. Blakeny announced that dele-Municipalities Committee would be

Our Educational System

TO people who for years have boasted of the wonderful school system which New Brunswick possessed the figures on our system which New Brunswick possessed the figures on our Educational Standing presented in the Legislature this week by Mr. Blakeny must have come as a shock. It came as a shock to many of us not so long ago to learn that this province ranks the highest in illiteracy of any province in Canada according to the last census.

The trouble is that New Brunswick educationists have for years gone along in the self-satisfied way proclaiming to the world that we had "the best system of education to be found anywhere." Nearly forty years ago, after the close of the South African War, a Commission appointed to establish a system of government in South Africa, visited New Brunswick. This Commission decided that we had the best system of education that it had discovered in the British Empire. We sent out to South Africa to assist in founding a school system at Petoria the then principal of our Normal School, Dr. Eldon Mullen, who was accompanied by the Misses Bridges of this city and others and they founded the school system at South Africa. From that day to this, our educationists have folded their arms and stood upon a pedestal and proclaimed themselves superior to anybody else in so far as the matter of education went. The result was that while the other provinces of Canada progressed and got in new ideas, we stood still with our arms folded and rested on our laurels.

Today we have the result. But with the efforts that are being made to reform our educational system a better day seems about to dawn.

Some people are set in their ways, and this applies to ninety per cent. of the school teachers and educationists. The figures which were presented by Mr. Blakeny should come as a surprise and a shock. For instance, in a recent report made to the Government on the educational work carried on in the camps organized under the Federal relief scheme, out of 100 men who applied for educational classes that ten per cent. had only been in Grade 1, and 57 per cent. had never passed Grade IV. From the report of the Matron of the Interprovincial Home for Young Women, situated at Coverdale, we learn that of 143 girls who have been admitted since the home was opened in 1926, ten per cent. had never been in school and could another ten ner cent, said they had been in school but could not read; fully 50 per cent. were below Grade V. standing.

CONFERENCE HERE Chief Magistrates to **Discuss** Proposed Bus Bill

YET FOR MAYORS'

No definite plans have yet been arranged relative to the proposed conference of the mayors of Fredericton, Devon and Marysville, to discuss the act of legislation being sought by the City of Fredericton regarding the operation of buses here. When the bill was presented to the municipalities committee of the provincial legislature yesterday, it was deferred until the chief magistrates of the. three communities conferred with a view of "ironing-out" the difficulties. The proposed bill will prohibit the bus company operating a route in the suburban districts from entering the city. Major A. J. McEvoy of Devon, and Mayor G. E. Long of Marysville, strongly opposed the bill, contending that it was discriminating against the company operating the suburban routes.

The mayor of Devon, one of the strongest opponents of the bill, declared that such action was showing lack of consideration to the permie of the suburban centres who were entitled to the privilege of having bus service to the city.

Although no definite date has been arranged for the proposed meeting of the municipal officials, it is believed that such a meeting will be held next week.

New Brunswick Should Receive \$94,500 From Federal Government

Industries Aired

(By Mrs. J. L. Neville) Dr. W. M. Jenkins, M.L.A. in con-

tinuing the debate on the budget

yesterday at the Legislature paid

As an indication of the need for a change in our school curriculum, let me quote some facts gleaned from the report of the Chief Superintendent. These are taken from the report for the school year 1934-35. Take Grade II as the first grade that it would be fair to start with as a large number of children enter Grade I late in the year and remain in the same grade during the next year. That explains the drop of over 5,000 between Grades I and II.

Registration in Grade II is given as 10,364, Grade V, 9,456; Grade VIII, 6,723. It will be seen from these figures that there is a drop of 37 per cent. in registration between Grade II and Grade VIII. There may be several facts that contribute to this, but when everything has been considered the loss is too great. It would be interesting to know just how many pupils in this Province are repeating a grade this year and what it is costing the ratepayers to furnish instruction for these repeaters.

In his address in the Legislature Mr. Blakeny says:

"Some years ago a survey was made of the schools of one city in this Province to find out how many students were repeating a grade and it was shown that it was costing the city \$6,250 annually to furnish instruction to repeaters. If that is true of this one city in the first eight grades and the same percentage of failures is true throughout the Province, it is costing the ratepayers of this Province some \$360,000 yearly to instruct these pupils for a second year in a grade. Admitting that salaries are not as high in the rural areas and reducing the amount by 50 per cent. or to \$18,000, still the loss is too great. There are two places to look for the cause, either the course is too difficult, or the teaching is not what it should be.

"The High School picture is even worse as we are losing 50 per cent. of the pupils who enroll in Grade IX before they reach the graduating class. Quoting from the Report of the Province of Vocational Education who made a study of the high school situation, we find that out of eighteen schools surveyed the following results were obtained:

18 schools gave a registration in Grade IX of 934.

Of these 27 per cent. or 252 pupils failed to make a pass mark. 190 of these are repeating the grade and 62 left school.

"Grade X. 659 students, 176 failed. 129 are repeating the grade, and 47 left school
