When interviewed as to the position of the Roads and Streets Committee of the City Council in the matter of the delay in the opening of the subway to traffic, Ald. David McCaughy, chairman of the committee stated that the contractors are putting a concrete deck over the railway right of way over the span, and that they dare not take a chance on letting traffic pass under the structure while work is being done overhead. The work, he said, should be finished either today or early next week. Upon its completion the subway will be opened to both vehicular and pedestrian traffic.

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.
