Handwriting

As Told By

PROF. JAMES STRANGE

Do not be disappointed if Mr. Strange cannot answer you immediately, as many inquiries are coming in which must be answered in turn.

If you wish a character analysis from Handwriting be sure to send in \$1.00 for a 3 months' subscription to The Daily Mail if a resident of Fredericton or 75¢ if living in the rural districts, as our Free Reading offer applies only to new subscribers and requests for readings unaccompanied by a cash remittance will not be answered.

Dear Mr. Strange:

Will you please analyze this specimen of my hand-writing.

Thanking you, I am,
X.

I see no reason X why you should not succeed in life. You are inclined to be rather thrifty, and as tight as a mouse trap. Your pantry will never be empty for want of foresight or forethought. It seems to me X you sprang from stock whose motto suggests dollars and cents. You will do very well either in banking or teaching. I am glad to note that you are capable of keeping your own counsel. As a matter of fact you resent others prying into your personal affairs and private stock. You are extremely independent of thought and action. In the event of material success falling below par, the fault will not rest altogether upon your shoulders, as you are the determined type, and will accomplish your share in the great workshop of life. Good luck to you, X, and don't worry over stocks and bonds, you will always have a dollar.

Dear Mr. Strange:

Would appreciate an analysis of this scrawl. Thank you.

DUBIOUS.

Your handwriting, Dubious, reveals to me the cold, analytical type of individual who must at all times know the why's and the how's, relating to the laws of cause and effect.

The field of science would appeal of interest to you, in that you would be allowed the opportunity to exercise your facilities of reason, and comparison in which both are pronounced, and naturally predominate.

The sympathetic side of your nature is practically null. You do not feel nor appreciate the emotional sentiments of others. It would prove to your advantage to broaden your scope in regards to your attitude in relation to the ideals of men.

To be able to think in a practical

fashion, is an art in which all have not mastered, and although your powers of concentration are developed to a high degree, I am prepared at this point to remind you of your weakness in that of human understanding and due to lack of appreciation for your fellowman, you are missing the joys of life. Cultivate understanding you would excel in literature.

years ago by Inspector Palmer. Witness said he had first put a quilt over the spring of the bed and then laid a number of cans over the quilt. He then placed the mattress on top and made the bed up as usual. The officer had gone to the room but had not located the lobsters.

Brydon Smith, a brother, said it was possible to make more money poaching than in anything else. Witness said he had been appointed a guardian five or six years ago but had never searched a house during the time he was employed by the department. Although he believed there was illegal canning going on in Alberton South he had not informed Inspector Palmer.

"How were you appointed?" "I was recommended for the position by the local patronage committee."

"Were there any poachers on the committee?" "Yes, I think there was two or three."

"They knew you had been a poacher yourself?" "Sure."

"Was there any understanding that you would not catch anybody fishing illegally?" "No, but I guess they knew I wouldn't."

"Then you simply protected the fishermen instead of the lobsters," remarked Mr. Justice LeBlanc.

"Did you poach the year you were named guardian?" "Yes. My traps were out when I was appointed."

"Did you leave them out while you were an officer?" "No. I brought them ashore the day after I was sworn in."

He said that if the protection work of the department was handed over to the R.C.M.P. they would make it pretty bothersome.

How to Ease a Cold Quickly

1. Take 2 "ASPIRIN" tablets and drink a full glass of water. Repeat treatment in 2 hours.

2. If throat is sore, crush and stir 3 "ASPIRIN" tablets in 1/2 glass of water. Gargle twice. This eases throat rawness and soreness almost instantly.

Get Quick-Acting, Quick-Dissolving "Aspirin." Take 2 Tablets

The modern way to ease a cold is this: Two "Aspirin" tablets the moment you feel a cold coming on. Then repeat, if necessary, according to instructions in the box.

At the same time, if you have a sore throat, crush and dissolve three "Aspirin" tablets in one-third glass of water. And gargle with this mixture twice.

The "Aspirin" you take internally will act to combat fever, cold pains and the cold itself. The gargle will provide almost instant relief from rawness and pain, acting like a local anesthetic on the irritated membrane of your throat.

Try this way. Your doctor, we know, will endorse it. For it

is quick, effective and ends the taking of strong medicines for a cold.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Army Built

(Continued from Page One)

stand the mix-ups there have been the first few days when a bunch of troopers and gunners, grouped with blase foot-sloggers, has to 'form fours' and move to the right in column of 'eights'—a new formation improvised especially for the Coronation parade.

But all these embarrassing little things are being ironed out. Canada need have no fear of its representation among the other Dominion contingents—for all the six-footers from Australia.

Perhaps the reason for the smartness on parade may be found in the good-natured explanation of a veteran in 'civvies' who stood on the road side as the contingent swung past in Lansdowne Park this afternoon.

"They march well, eh?" this observer said, innocently.

"Why shouldn't they?" he returned, with a grin. "Damn it, they're all sergeant-majors!"

Not quite true. But, after checking the matter, it was found that this 'army' only has four privates!
