DOW SETTLEMENT

DOW SETTLEMENT, April 12—Mrs. Chesley Hanson formerly Mrs. Abraham Collicott of Canterbury Station, passed away on Friday morning at the home of her daughter Mrs. Elijah Johnson of Johnson Settlement at the ripe old age of ninety years. She leaves to mourn two daughters, Mrs. Roscoe Durling, of Meductic, and Mrs. Elijah Johnson of Johnson Settlement; her husband Chesley Hanson of Dowville, a large number of grandchildren and a wide circle of friends. Funeral service was held Sunday afternoon at two o'clock at the home of Mrs. Johnson where Mrs. Hanson has been for the past two years. Fred Bragdon, of Meductic conducted the funeral service. The music was supplied by the Meductic choir and the remains were

SOCIAL HAPPENINGS

Guest of Miss Annie Martin
James E. Strang of Brooklyn, New York, has been the guest of his sister-in-law Miss Annie Martin for the past few days. Mr. Strang will leave for New York this evening.

Surprise Party for Miss Rowan
A few friends called on Miss Margaret Rowan at her apartment last evening and gave her a surprise party. Miss Rowan responded to the occasion and a very enjoyable time was spent, after which refreshments were served.

Sends Souvenirs to Yukon Children
Souvenirs of the Coronation for the Yukon's school children sped from Ottawa today by air mail, gifts of an anonymous donor. They were mailed by Mrs. George Black, Conservative House of Commons member for the territory. She said she was not at liberty to disclose the name of the donor. These Coronation emblems, little golden crowns with streamers of red, white and blue attached, are being sent to chapters of Daughters of the Empire in the Yukon at Dawson, Mayo, White Horse, Selkirk and Carcross. On May 12, the date of King George's crowning, one will be given to each child at Coronation ceremonies in the schools. They will serve, says Mrs. Black, "to give these children in far-off Yukon some realization of the meaning of this crowning of the Empire's monarch, and of the greatness and extent of the Commonwealth to which they belong."

Social Functions at Eureka Grill
Among the social functions which have recently been held at Eureka Grill are included a church function, in charge of Mrs. George Clark, a supper given by Mrs. L. M. VanWart, a luncheon given by the local chapters of the I.O.D.E., a supper sponsored by the hockey club, and a banquet tendered by the Automobile Association.

Dr. and Mrs. G. N. Paterson-Smith (nee Miss Carol Ross) of Montreal sailed on Saturday on a few weeks cruise to Bermuda.

Mrs. John Bebbington who spent the week-end with her daughter Mrs. Karl Mitchell at Westerley, Rhode Island, is expected to return home tomorrow morning.

NO DEVELOPMENTS

No developments have been reported in connection with the break which occurred at Oromocto when someone entered the store of T. J. McElroy & Son. Between \$25 and \$30 worth of tobacco was stolen. The R.C.M.P. are investigating the case.

FILES PAPERS

Alderman W. R. Cawdron filed his nomination papers with City Clerk F. I. Haviland today in connection with the election which takes place on April 26. The nominees were former mayor R. L. Phillips; F. S. Miller, former president of the Board of Trade; W. A. VanWart; C. H. Forbes and W. H. Wilson.

Arrangements have been made for an air race from London to Douglas, Isle of Man on May 29 for \$2,500.

Guests of Mrs. J. B. Killeen
Mr. and Mrs. Charles Stitham of Mar, Hill, Me., and their son Linus student at St. F. X. University are guests of Mrs. Stitham's sister, Mrs. J. B. Killeen. They are in the city to attend the U.N.B.—St. F. X. debate in which their son is taking part.

With the Men's Club This Evening

This evening at the Cathedral Men's Club there will be two special speakers, Mayor Arthur Kilsall of Annapolis Royal, and Captain Edgar Shampier, of Kingston. Mayor Kilsall comes from the oldest Anglican parish in Nova Scotia, St. Luke's, and Mr. Shampier from the oldest in New Brunswick, Kingston. Both men have had interesting war records. Mr. Kilsall was with the Princess Pats and was badly smashed up. Mr. Kilsall was a church organist before the war, but owing to the loss of the use of his left arm he has not been able to play since. He is now an outstanding chemist and fruit grower and is president of the Maritime Chemist Association, and in charge of the Nova Scotia fruit also in charge of spray investigations in Nova Scotia and New Brunswick. Edgar Shampier went overseas in an infantry regiment and fought the first two years on foot and was wounded, then he recovered and fought the last part of the war in the air. Mr. Shampier has been active in the militia since (the New Brunswick Rangers) and has been preparing for the next war by taking courses at Halifax and Ottawa, qualifying in machine gunnery and for his major's commission. Mr. Shampier will give some humorous recitations. A good attendance is expected.

Mrs. George O. Spencer, of Moncton, president of the National Council of Women, arrives in Ottawa tomorrow, and while in the city will be the guest of Mrs. Edgar Hardy. Mrs. Hardy will entertain at tea in honor of Mrs. Spencer on Thursday afternoon.

Marriage at St. Dunstan's Church
The marriage of Miss Mary Estelle Bowlen of this city to Richard Robert Ralph Joseph Holmes of Saint John is taking place tomorrow morning at eight o'clock at St. Dunstan's church.

GOVERNMENT MEETING

Although a meeting of the provincial government is scheduled for this evening, it is unlikely that the body will meet until tomorrow. At the present time Hon. F. W. Pirie, minister of lands and mines is in Montreal tomorrow or Thursday.

ROTARY CLUB

Professor G. S. McKenzie, of the faculty of the University of New Brunswick was the guest speaker at the regular weekly luncheon meeting of the Rotary Club today. W. W. O. Fenety was chairman.

DEVONPORT, Eng.—Admiral H. E. Grace, son of the late 'W. G.' died suddenly at his home the other day. He was 69 and had been in the navy 40 years, retiring in 1930.

FOR THE MODERN HOME-MAKER

MODERN women are intelligent and thrifty. They have neither time nor money to waste. The new, easy-opening ACADIA Baking Powder tin saves time. One twist and the top lifts off.

SAME LOW PRICE 25c THE POUND TIN

THE double-acting principle of Barbour's ACADIA Baking Powder also saves money. The first action takes place in the mixing bowl when the liquid is added. The second in the oven when heat is applied. The perfect balance between these two actions assures successful baking results. The up-to-date woman is quick to appreciate both these savings.

ACADIA DOUBLE ACTING BAKING POWDER

President

(Continued from Page Eight)
ducted in Nova Scotia, but in New Brunswick various heavily infested orchards have been sprayed with varying amounts of ground derris, derrisol, pyrethrum, and nicotine sulphate, used alone and in various combinations with Volck, calcium caseinate, fish oil, hydrated lime, aluminum sulphate, etc. Poison baits have been suspended in small containers among the branches of the trees and have also been "squirted" directly on certain sections of the trees. Attractants, such as molasses, sugar, and apple syrup, have been used, the baits being poisoned with lead arsenate and the silicofluorides. The degree of control with these materials varies considerably. Some were fairly effective until washed off by rains, others were effective for a short time only, while others used at strengths effective for control resulted in foliage injury.

During the last few years, several orchards heavily infested have been sprayed with standard sprays in an attempt to record the amount of control obtained. The materials used were the standard Bordeaux and standard lime sulphur-iron sulphate mixtures, using arsenate of lime and New Process white arsenic. The same materials were used in the same orchards each year. The apples from these orchards previous to our experimentation were 100 per cent. unfit for human consumption. All fruit had many maggots and numerous stings. At the end of the first year of experimentation practically 100 per cent. of the fruit still showed infestation, there being, however, only one or two maggots per apple. This last season the orchards would be classed as "moderately infested," apples showing maggot injury being quite common but the control obtained since the experiment was begun has been very great indeed. It is apparent, however, that standard sprays applied at the proper time and under proper conditions as a control against the maggot are no guarantee that 100 per cent. control will be effected.

This "lag" in control is probably due to the fact that a percentage of the flies may not emerge until the second season, or possibly not until the third season. It is therefore obvious that no method of control will completely exterminate the pest in one season. As flies have been seen in uncareful orchards as late as September 12, it is quite possible that this "lag" may be also due, in part, to a small emergence late in the season after the effects of the spray controls have been washed off or worn off.

Only traces of this insect have been found in our "commercial" orchards. It cannot be too highly stressed that before the insect can be completely exterminated from these orchards all control measures must be fully carried out. The necessity for applying two complete maggot sprays is obvious. With the possible exception of the last season, apple scab has not developed to any great extent in certain of these orchards, with the consequence that the full quota of calendar sprays has not been applied. If, however, it is the intention of the owners of such orchards to eradicate this pest it is entirely necessary that they apply the maggot sprays at the proper time.

C. W. MAXWELL,
Graduate Assistant Insecticide Investigations.

Dominion Entomological Laboratory, Fredericton, N. B., April 12, 1937.
Following Mr. Maxwell's paper, there was general discussion on the subject of "insect control." The various speakers heard unanimously approved the enforcement of strict regulations to govern the growing and marketing of apples. Sanitation and proper orchard management were stressed as two important measures to bring about effective control of the insect menace.

Proposed regulations were submitted by A. Turney, of the provincial agricultural department. It was pointed out that such regulations were similar to those adopted by the "Apple Maggot" Board instituted by the Nova Scotia government for the purpose of controlling the "maggot" menace.

Following further discussion a motion was carried that the matter of "insect control" be referred to the Resolutions Committee for recommendation. The committee will submit a report at tomorrow's session.

Early Origin

In the paper submitted by R. P. Gorham, it was shown that early records reveal that fruit tree seeds were planted at Port Royal in 1606, there were apple and pear trees at La Have and at Cape Sable in the present Nova Scotia in 1635 and that there was an orchard north of the Bay of Fundy at Fort Pentaguet in 1670. He pointed out that Nicholas Denys was probably the first white man to make trial of fruit growing in the present New Brunswick.

Continuing the speakers referred to the reports of a man named Tiberge who mentioned there were only eight

SPRING!

Sure—so what?
If you think I'm going to sing I'm not.
This April twaddle is nothing But rot.

On the first I shed
My winter coat,
And instantly got
A cold in the head
And a damn sore throat.
As I stepped outside the flat
The wind got hold of my Easter hat;
And that
Is just another reason
Why I think the present season
Is no so hot.

I know what the poets say
About it.
They sit in the house all day
And waste pots of ink
Trying to make us think
That Spring
Is a wonderful thing
And we couldn't live without it.

So much for that—
But when I think of my hat
And the cold in my head
Having read
What's been said
By poets (mostly dead)
In praise
Of April days, I doubt it . . .

homesteads in the Saint John river valley district in the last three or four years of the 17th Century. The reports told of the grain produced and the livestock kept but made no mention of fruit trees.

Dealing with the pre-loyalist period, Mr. Gorham said there is a customs record of the importation of fruit through the Port of Saint John in 1782. The first Loyalist Period experienced considerable agricultural progress but fruit was grown for home use and there was not any extensive development of orchards. Mr. Gorham, in referring to the second Loyalist Period, showed that considerable attention was paid to fruit growing during this period.

In 1839 the Lieutenant-Governor of the province recommended the establishment of an experimental farm where new and special crops might be tested but it was many years later before this recommendation was carried out.

Early Development

The speaker traced the development of the fruit growing industry from the early 19th Century until the American Civil War in the early 60's. At that time New Brunswick fruit found a ready sale with little competition and the production, particularly in Carleton County increased rapidly while an added interest was shown in orchard planting. A reaction followed at the close of the war. During the five years of conflict, nurseries in New England had accumulated large stocks of trees. The secretary of the Board of Agriculture at that time made note that in one year the provincial mails were flooded with highly colored circulars advertising trees for sale and that in the next season American nursery agents swarmed over the province. So many orders were taken that the nurseries claimed they could not supply the varieties ordered and accordingly made substitution of others. This resulted in a serious setback of the development of fruit growing.

The Fourth Period, described by the speaker witnessed the abolishment of the Board of Agriculture in the province. This did not meet with the approval of the fruit growers. This action resulted in the establishment of different agricultural organizations which contributed greatly to further the development of this phase of provincial industry.

Fruit Market Act

In conclusion, Mr. Gorham dealt with the first ten years of the 20th Century, showing that the enactment of the Fruit Market Act stimulated considerable activity in the explanation of its provisions. In 1901, Dr. A. MacNeil, chief of the Fruit Division, spoke to members of the Farmers' and Dairymen's Association, told of the appointment of a fruit inspector in the province and urged the necessity of producing better fruit. In the following year the secretary for agriculture had the work of orchard demonstrating extended and in 1903 had whole orchards sprayed as a part of such demonstrations.

In 1904 the New Brunswick Fruit Growers' Association was organized and held its first regular meeting in the early part of 1905. The speaker then dealt with the progress of that organization from its inception until the present day.

Sessions are being continued this afternoon and will be featured by addresses given by F. W. Walsh, Halifax, and Dr. W. S. Blair, Kentville. The convention will conclude tomorrow.

NEW DELHI, April 12—Twenty-five British soldiers, including six officers, were killed and 40 others wounded in a clash with followers of the Fakir of Ipi, who ambushed an

If You Have a Child ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." Safe for children. No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

ALSO IN TABLET FORM:
Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA
