FREDERICTON, NEW BRUNSWICK, OCTOBER 21, 1937

LENIENCY FOR DRUNKEN DRIVERS

AT INTERVALS there appears in the press evidence that Magistrates hold widely differing views as to adequate sentences for the drunken drivers who get into trouble. Severe penalties may be imposed on one offender, while in other and similar cases there seems to be little appreciation of the peril the drunk man with a car is to the public; certainly no thought of making "the punishment fit the crime."

Recently in Ontario a man who actually pleaded guilty to intoxication while in charge of a car; who, according to police testimony, had been involved in three accidents in five miles of travelling, and had left the scene of each, was sentenced to seven days' imprisonment. He had knocked down a man, hit another car and then struck a stop sign.

This man admitted that he was an habitual drinker, and that while under the influence of liquor he paid little attention to what he was doing. That was made evident enough. True, he was ordered to pay costs of the court or spend another ten days in custody, but even then he would escape with a minimum of punishment for running amok on the highway and endangering human life and property.

This incident provides one of the perplexing problems of making car drivers realize their responsibilities; also realize the penalties that should be certain following accidents that are the consequence of intoxication while at the wheel of an automobile.

PRESS AND RADIO

PRESS AND RADIO have their fields but the basic fact is that one uses the eye and mind, and the other the ear and mind.

The dean of the graduate school of journalism of Columbia University, Carl W. Ackerman, says that the newspaper will continue to be the nation's "greatest educational force."

"The spoken word appeals more to the emotions; the written word more to the reason," he said. "Moreover, one retains what he reads better House of Assembly were discussed at

An interesting study of press and radio is seen in the return of Justice Hugo Black to the United States. Black was mentally nimble enough to refuse to talk to reporters. Instead, he secluded himself and talked through lic Works. The matter of a national a microphone to the nation.

Black said he did it so he would not be misquoted. That was subterfuge. He did it because he knew that if he consented to an interview, the reporters could ask him questions which would have given the public a clearer picture of the facts. Black knew that by radio he was safe from revealing Legislative Assembly was prorogued mitted that discussion of proposed questions. He could do all the talking, speciously, without being shown up except in subsequent retort, which he could—and did—ignore.

Further, as you read these written lines, you can go back, if you wish, Discussion occupied the attention of homes this morning. a sentence, and challenge it. How can you recheck accurately by the members for about five hours, the

Beware the emotional haranguer who creeps into your house through the loud speaker. You can more easily protect yourself against the emotional writer who comes to you by way of the printed word.

WAR'S HAVOC OVERCOME

AFTER NINETEEN YEARS of work, Rheims Cathedral, badly damaged during the war, has been restored and on Sunday was consecrated again to the purposes of divine worship. An interesting incident of this restoration of a famous religious shrine is the fact that the late John D. Rockefeller contributed \$2,500,000 toward the cost, which must have been enormous.

The war left Rheims with its roof demolished and the interior completely wrecked, so that, while the structure will remain as before, the splendid paintings and sculpture it housed could not be replaced. This is a serious loss to the world of art. But war knows nothing of art. The University of Louvain, in Belgium, with its priceless treasures in literature and art, was put to the torch, and everything destroyed. Today in Spain the same kind of vandalism is going on, and if hostilities continue long enough little of the country's architectural masterpieces will be left.

But it is characteristic of mankind that when peace is restored one of its first thought is restoration of war-wrecked national and religious shrines In Spain there will be work aplenty for architects and artists. It may have to be a labor of love, but it will be undertaken.

Rheims itself provides evidence of this determination that great edifices must not be permitted to become mere ruins. The first cathedral, one of the wonders of its time, was destroyed by fire at the beginning of the thirteenth century. The present edifice was begun in 1211 and finished a century later. In 1870, when the Prussians besieged Rheims, the cathedral suffered considerable damage, but it was restored, only to meet a similar fate when the German armies entered France during the Great War.

To the credit of humanity, its artistic instincts will not permit to disappear man's great architectural achievements. And it is remarkable that, while in these times great cathedrals are being built, modern in their planning and construction, there is generally close-adherence to medieval styles of architecture.

PRETENSE AT PEACE

TTALY IS WILLING to withdraw Italian troops from Spain if other nations (presumably Russia) will withdraw an equal number. That proposal would be a laugh except for the gravity of the situation in Spain.

Mussolini is reported to have many more soldiers in Spain on the side of General Franco than are aiding the other side. Any equal withdrawal would still leave many Italian troops in Spain.

Thus Mussolini comes into the international conference with a trick his first move. The patience of Great Britain and France with that man is almost beyond belief. Perhaps they are giving him rope enough to hang himself. Whatever the situation, the world sees the insincerity of Italy's "collaboration" for world peace.

Snapshots

Our old friend E. R. McDonald, K.C., M.L.A., was in the city today attending the provincial caucus of members. He brought along his popular corn cob pipe as usual.

Funny man! He despises the ragged loafer. So he works to get rich so he can retire and wear old clothes

Warsaw, N.Y., man whose house on a bend has been wrecked four times by trucks refuses to rebuild over the old cellar. That may put the fifth driver in the hole.

What's funny about the ruling of the Indiana Supreme Court that drug store is a place where drugs are sole. Almost every drug store has a drug department now.

Three Good Reasons For Leaving Your **Estate In Trust**

A wife and two children are three of the best reasons for leaving your estate in trust.

There is nothing mysterious about a trust. It's simply a practical arrangement to provide experienced and conservative management for the property you leave. It's an arrangement which gives to your wife and children all the benefits from your property and relieves them of the burdens, the dangers and the liabilities of management.

In managing trust funds this intitution makes no pretense of being infallible. But, it can and does do many things which most individuals are unable to do to minimize the risks of investment. In this connection it may be of interest that this Company supervises the investments of a number of corporations and en-

GENERAL MOTORS PLANTS SWING INTO PRODUCTION

Clanging of hammers against steel and rat-a-tat of riveting machines can be heard at the various General Motors' factories in Canada as a million dollar program of plant retooling nears completion prior to production on the 1938 cars. Activity is particularly brisk at the Regina plant where the most modern equipment is being installed before the re-opening. This equipment includes electrical welding apparatus which is shown in the upper left as it is being tested. Upper right shows the massive overhead steel runway being erected at Oshawa to run bodies from body plant to final assembly

and to tie together the two major plants at Oshawa, Lower left portrays the street front of the new foundry at St. Catharines, built at a cost of approximately \$750,000. Lower right illustration shows Luther Bone who will soon run his 300,000th car off the assembly lines at Oshawa. Mr. Bone, who has been 41 years with the company, was formerly a mechanic and foreman of the repair and final testing. For the past six years he has been running new cars off the li as or, as Mr. Bone puts it, "giving them the breath of life."
