**FALLEN LEAVES**

All summer we danced in shimmering green,  
Autumn brought rubies and golden sheen—  
But never a hint of dying!

Now, over hills, into winding vales,  
On are borne by November gales,  
Whirling, floating and flying.

Caught in a flurry of rain or snow,  
Here, upon stubble fields laid low,  
There, heaped along roadways lying.

Yet warm we shall sleep through the winter's cold—  
And when early buds of spring unfold  
Shall we sleep without dream or sighing.

—Florence Westcott.

throughout the Province will be strongly stimulated by the expansion in tourist trade which will undoubtedly develop as a result of the improved road system.

**Permanent Roads Necessary**

"The hard surfacing road program in New Brunswick was not inspired by any desire for luxury. It was, and is, an obvious necessity. With the enormous increase in the use of our main highways, it was found impossible to preserve a riding surface satisfactory to meet the requirements of modern automobile traffic. Constant disintegration of the road surface involved reconstruction and maintenance charges wholly out of proportion to the service and life of the road. Consequently, the Government was forced by need and economy to the hard surfacing policy.

"Although the Legislature in 1930 adopted an extensive hard surfacing programme, it was not until 1934 that construction was commenced. The election in the summer of 1935 returned the present Government, which continued the programme with modifications in the construction specifications resulting in substantial savings in costs. Completion of the work covered by existing contracts involves the expenditure of about \$4,600,000 in 1938. Total cost of the entire programme over the period 1934-1938 will approximate \$18,300,000. This expenditure will finance the hard surfacing of about 816 miles of main trunk highways. No further programmes involving substantial capital expenditures are under contemplation or in anticipation."

chairman of the Town Planning Commission, would make no comment other than to state that it was news to him that he would be issued and that he would rather wait until after the meeting this afternoon to find out whether or not the report is true. He did state, however, that it was not the duty of any member of the Council or other individual to state that such would be the decision, since the matter had been left in the hands of a committee of three—Aldermen Ivan McKnight, Ray T. Forbes, and Murray Hagerman. The committee will report back to the Council this afternoon, and it is expected that the Council will abide by the report of the committee in either refusing or granting the permit.

**That of Rev. John Linton Dealt With Minto Situation — Highly Illuminating**

One of the most interesting sermons heard in this city for some time, at the morning service in George Street Baptist Church, which was broadcast, Rev. John Linton, minister of the church gave an illuminating discussion on the coal mining situation, dealing with the woes and conditions under which the miners work, and centering especially on the Minto situation, recognized and to strike in the event of this not being granted. Both services were well attended, while a large radio audience at the morning service has made the sermon an object of much discussion.

The evening worship in Wilmet United Church featured a highly interesting sermon based on the book "And So—Victoria" by Vaughn Wilkins. The sermon was a discussion of what God has to do with Royalty and us, the question that is raised by the book in the morning Rev. Dr. J. W. Bartlett, who conducted both services, took as his subject, "What

Working as usual  
on our  
**120th Birthday**

One hundred and twenty years ago there were only seven of us working on the staff of the Bank—a cashier, an accountant, a paying teller, a second teller, a discount clerk, a second bookkeeper, and a porter—that was the entire staff. Today we are more than 6000, in more than 500 Branches, all working to render modern, experienced banking service.

Our Bank's career has been inseparably woven into the career of the nation and every part of it. Founded in 1817, the Bank at once became a financial pathfinder for Canada's pioneers. Through all the intervening, eventful, growing years

of Canadian life, our Bank has kept strong and efficient—by pursuing a policy of safety for depositors and by keeping our services always abreast of modern conditions.

In times of expansion and depression, in the best and the worst of economic conditions; through peace and wars, panics and political upheavals, Canadians have learned to rely upon the unwavering safety and banking assistance of the Bank of Montreal. Older than the Dominion itself, yet young as the latest sound business enterprise of Canada, we are working as usual on our 120th Birthday.
