

# Canadian Pulp Now Displaces Baltic On German Export Market

OTTAWA, April 18.—Canada has displaced the Baltic countries as principal supplier of pulpwood to the German market, shipping 442,930 metric tons to Germany in 1938. In reporting this to the Department of Trade and Commerce, J. C. Macgillivray, Canadian Trade Commissioner at Berlin, states that, "German imports from Canada are, for the greater part confined to foodstuffs and raw materials, with the volume of the market depending on the established quotas which, in turn, hinge on German exports to Canada. The normal sequence of supply and demand does not, therefore, apply as regards sales possibilities."

Mr. Macgillivray reports further that in 1938, Canada was Germany's principal source of supply for dried apples, being credited with close to half of the total imports from all sources. Of the 2,249 metric tons of dried apples imported into Germany, Canada supplied 1,003 metric tons. The Dominion also supplied 7,821 metric tons of fresh apples.

## MORTGAGE SALE

To the heirs at law and next of kin of George B. Baxter, late of the City of Fredericton, in the County of York, and Province of New Brunswick, deceased, and to all others to whom it may otherwise concern.

PUBLIC NOTICE is hereby given that under and by virtue of the provisions of The Property Act, and of the Power of Sale contained in a certain lease, sold Mortgage bearing date the seventh day of May, in the year of our Lord, one thousand nine hundred and two, made between George B. Baxter of the City of Fredericton, in the County of York, and the Province of New Brunswick, of the first part and Thomas Kingston of Hanwell, in the Parish of Kingsclear, in the said County of York, Farmer, of the second part, and duly recorded in York County Records in Book 121, Page 490 to 495, under official number 51118, the tenth day of June A.D. 1902; and by indenture of Assignment bearing date the twenty-ninth day of September, A.D. 1908, made between the said Thomas Kingston of the one part and Annie L. Baxter of the other part, duly recorded in York County Records in Book 138, pages 248 and 249, under official number 57718, the tenth day of October, A.D. 1908, duly assigned to the said Annie L. Baxter, there will for the purpose of securing payment of the moneys secured by the said Indenture, default having been made in the payment thereof, contrary to the provisions thereof, be sold at public auction in front of the Post Office in the City of Fredericton, in the County of York aforesaid, on Saturday, the thirteenth day of May next, at the hour of twelve o'clock noon, the lands and premises mentioned and described in the said Indenture of Mortgage as follows:

"ALL that piece or parcel of land, situate, lying and being in Block Number two in the Town Plot of Fredericton aforesaid, and comprising all that piece or parcel of land, being part of lot number eighteen in said Block, commencing at the street at the upper line of the said lot, thence running southeasterly along said street fifty feet, or within three feet of the upper corner of the dwelling house formerly owned by the late Patrick McPeak, thence southwesterly on a line parallel with said house, and three feet distance therefrom, forty nine feet, then at right angles northwesterly six feet, thence on a line parallel with the upper line of said lot to the rear, thence along the rear line northwesterly fifty one feet four inches, and thence along the upper line of the said lot to the place of beginning."

Together with the buildings and improvements thereon.

Dated this Eight day of April, A.D. 1938

(Sgd.) ELVIE E. MACDOUGALL, Administratrix of the Estate of Annie L. Baxter, deceased. Hanson, Dougherty & West, Solicitors

Canada was fifth supplier of wheat to Germany in 1938 having shipped 1,267,666 metric tons which was a slight increase over 1937. Besides wheat Germany purchased rye, barley, corn, and grass seed from the Dominion.

The majority of salted salmon entering Germany came from Canada along with certain quantities of other fish and fish products.

Among the supplying countries of ores and minerals Canada occupies the most important position and, collectively, ores, minerals, and metals account for a large proportion of the total purchases from Canada. Asbestos was the most important of the minerals from the Dominion accounting for 19,854 metric tons or 69 per cent of the total of 28,795 metric tons imported. Other ores, minerals and metals supplied by Canada included lead ore, gold ore, nickel ore, iron slag and waste, lead and zinc carbon black, platinum, silver, aluminum, lead, sodium, nickel alloys slag and waste, ferro silicon, barium, copper and other refined metals, and scrap iron.

In addition to the above mentioned commodities, reports Mr. Macgillivray, Canada supplies logs and lumber, animal fats, fish oils, cheese, honey, wool, animal hair, hides and skins, furs, sausage casings, manufactured food products, copperage stocks, manufactured goods, and woodpulp.

## ZEALAND NOTES

The W. A. of St. Paul's Anglican Church met at the Rectory on Wednesday, a large number being present.

Mrs. Harold Whitehead and son, Vincent, of South Devon are spending the weekend with Mrs. Whitehead's parents, Mr. and Mrs. Thomas Graham.

Mr. Lawrence Hursey of Springfield was calling on Thomas Graham, on Friday.

Frederick Everett has returned home after spending two weeks at South Devon.

Mrs. Rankine Brewer is improving in health. Mrs. Brewer has been suffering from a severe attack of la grippe.

Miss Gladys Burt spent Friday with Mrs. Frederick Everett.

Mrs. Ida Morehouse spent the weekend with her sister, Mrs. Percy Graham, North Devon.

Miss Velma London of Woodstock has returned home after spending the Easter holidays with Mr. and Mrs. Aaron Burt.

The interior of St. Paul's Church has been redecorated and a number of new pews have been added.

Owing to the condition of the roads the evening service at St. Paul's Church Sunday was cancelled. The service was held at Brewer's Mills.

"The New York World's Fair will do the country a lot of good. It will have a tranquil effect on the whole world."

—Henry Ford.

# Foliage Effects May Be Grown From Seed

The texture and color of foliage is an important factor in decorative gardening, more important in shrubbery than in the planting of annuals, but something to be considered with the latter. A few groups of stately foliage plants in the annual border add greatly to its interest.

Chief of the foliage plants among the annuals is the castor bean, too large for the small border, but imposing as the center of a foliage bed or to adorn a corner of the yard where it is desired to hide an unsightly building. This is the largest leaved of all the annuals.

In contrast is the fine leaved fire plant *Kochia trichophylla*, which makes a regular miniature tree of bright yellow green leaves which in late summer turn to crimson. It is even handsomer in its green than in its red form. The coleus, the old-fashioned plant our grandmothers delighted to grow in the house, can be raised from seed easily in a variety of brilliant colorings.

The variegated maize or corn is a striking plant with leaves striped in green white and pink as an accent plant.

But aside from the plant of brilliant

Castor Beans Largest of Annual Foliage Plants.

ly colored foliage, which some gardeners do not particularly like, there is the infinite variety of greens, blue greens, gray greens, and yellow greens to consider. The stocks and California poppies have gray green foliage which is a restful foil for their brilliant flowers. The nasturtium have brilliant yellow green that add an important accent.

The spider plant, *Cleome purgens*, with its divided leaves and dark stems, is a desirable foliage plant even before its striking bloom is developed.

Cannans may be raised from seed and bloom the first year, and while the fine named varieties cannot be expected from seedlings, foliage effects may be secured. The seed should be chipped or filed thin on one end to hasten germination. Soaking it for 24 hours is also recommended.

Heavy-leaved plants should be relieved by those of finer character in the border. Some of the ornamental grasses easily raised from seed are useful for this purpose and are often seen associated with cannas, castor beans, or the elephant-ear caladium.

The ornamental grasses, both annuals and perennial, give excellent decorative effects. The pennisetums, pampas grass with green and white leaves are all attractive.

## MESSAGE TO KING EMBOSSED IN BRAILLE

LONDON, April 18.—Queen Elizabeth was visibly affected as she watched blind children playing at the National Institute for the Blind here.

With the King she visited the institute to mark the 25th anniversary of its opening. Two blind children from Southport were led forward by a nurse to present a basket of spring flowers to the Queen.

The astonishing achievements in Braille interested the King greatly as he examined an address, embossed in Braille, assuring him of the loyalty and affection of his blind subjects.

## FOOD PLenty BASIS FOR PEACE

OTTAWA, April 18.—Sir John Boyd Orr, outstanding Scottish expert on nutrition, urged democracies all over the world—the British Empire, the United States, and the Scandinavian countries—to unite in a policy of food plenty as the only sure foundation for permanent peace.

Sir John spoke under the auspices of the Canadian Medical Association to the annual convention of the Victorian Order of Nurses, before a distinguished audience which included Hon. C. G. Power, minister of national health and pensions, members of parliament, senators, and members of the National Research Council.

He said the widespread and growing interests in nutrition was due to recent remarkable scientific discoveries which had revolutionized our ideas on the influence of food on health. It had been found that a number of diseases which are prevalent in all countries are due to deficiencies of vitamins or mineral salts in the diet.

If we could insure that every person in any country, especially the mothers and children, enjoyed a diet fully adequate for health, the next generation would be free from a great deal of the ill-health which afflicts the present generation and would enjoy a much higher standard of health, with the enjoyment of life which health brings.

Dbl.

The bidding on today's hand probably doesn't make sense to most of our readers. Actually we don't understand North's reasoning on the various bids he made. However, East did know what he was doing. First his opening heart bid was quite sound and when his partner gave him a free raise, he felt confident that he could make game. However North then started the fireworks by his cue-bid in hearts, and East decided to bid the spades not really as a Slam try but rather to show a lead against an eventual club contract. South's three notrump bid was one of those so-called brilliant psychics, and West now showed he had a sound raise by promptly bidding four hearts. North made another silly bid—four spades. Then East studied his hand carefully, decided that he could not make six hearts and might not even be able to make five, but that if he jumped to six hearts, his opponents, who had started to bid in such a fancy manner, would certainly defend at seven clubs. Sure enough, South did bid seven clubs, which was set three tricks for a loss of 500 points. Of course East

and West could make five hearts, and on normal bidding we assume North and South would have defended at six clubs. East had merely picked up an extra 200 points by getting his opponents to seven.

The bidding:  
East South West North  
1♥ 2♠ 2♥ 3♥  
3♠ 3NT 4♥ 4♠  
6♥ 7♠ Pass Pass  
Dbl.

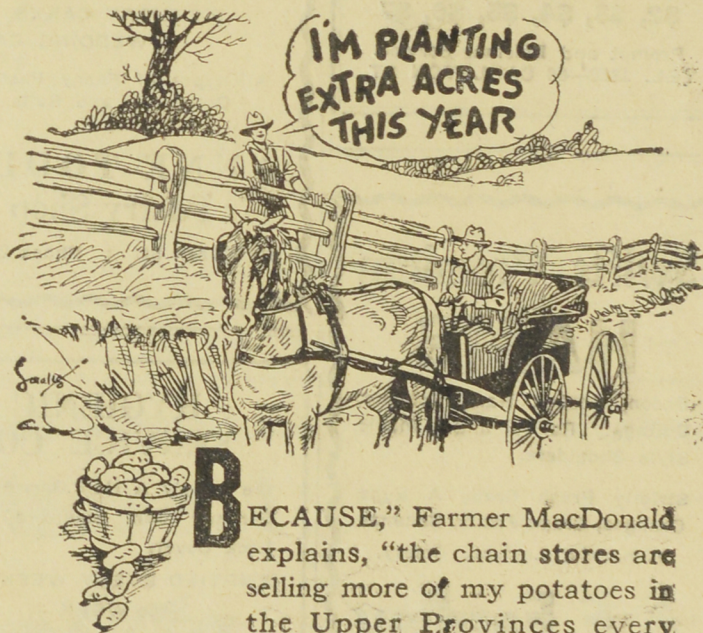

Answer: Your correct bid is three diamonds. Although your two notrump opening was practically a minimum, the fact that your partner responds in clubs, in which you hold the King-Queen-Jack, should encourage you to make a moderate Slam try. If your partner now bids three notrump, you should pass.

Score 100% for three diamonds, 80% for four clubs (if you do get to Slam, you want to be Declarer on account of your spade and heart holding), 60% for four notrump (a slight overbid), 20% for three notrump (a distinct underbid), 0 for any other bid.

Question No. 110  
You are Merwin Maier's partner and hold:

BECAUSE," Farmer MacDonald explains, "the chain stores are selling more of my potatoes in the Upper Provinces every year!"

Local producers of such products as potatoes, fish, pork, poultry, butter, fruit and eggs fully appreciate what the chain stores are doing for them. They value their opportunity to sell to the chains increasingly large amounts of produce for cash.

Local consumers, too, appreciate their opportunity to get at the chain stores fresher, newer merchandise, later styles and a thousand and one helps to a higher standard of living—all available at a price the average family can afford to pay. We think you'll agree that provincial producers need the hundreds of thousands of dollars annual income they get from the chain stores; and that consumers need the opportunity afforded by the chains to live better and at the same time, spend less.

Any special chain-store taxes are really taxes on your every-day necessities. They tax YOU as both producer and consumer.
