10.30—Rhythm School.
11.00—Magnolia Blossoms.

Shaggy Zinnia Wins Award Flowers for Many Uses

Zinnia Fantasy White Light awarded honorable mention in 1939 All America trials.

Most distinct of all the new zinnias is the Fantasy type, introduced four years ago as a mixture, lovely separate colors have been selected, and for this year a white variety christened White Light won honorable mention in the All America trials.

If among its numerous merits the zinnia has a fault, it might have been found (before Fantasy arrived) in the extreme regularity of its blossom, with flat petals, always arranged just so. The dahlia flowered type was a departure from the original doorknob form, which was welcome; but the Fantasy type is a complete change.

Fantasy zinnias have petals which are twisted, slightly fluted, and arranged in a shaggy disarray. It is as easy to grow as any zinnia and the flowers are of medium size, three to four inches in diameter. Besides the mixture originally introduced, which won an award of merit in the 1935 All America trials, there are now available Star Dust, a selection of yellow; Orange Lady, and Rosalie, a deep rose.

Another new type of zinnia which is being rapidly improved is the scabiosa-flowered, which has a semi-globular crown of florals surrounded by a row of flat petals, all of like color. It is obtainable in a mixture which has most of the zinnia colors, are the most conservative."—Rob-

and makes a most useful cut flower. art A. Millikan.

Flowers for Many Uses

Compact Type of Ageratum

Below is a list of annuals classified to assist you in making flower selections to fit your needs and conditions.

For edges and borders — Sweet alyssum, dwarf nasturtiums, lobelia, dwarf marigold, ageratum, Virginia stocks and forget-me-nots.

Cutting—Asters, calliopsis, mourning bride or scabiosa, cosmos, marigolds, sweet peas, annual chrysanthemums, bachelor buttons, sweet sultans, ten weeks' stocks, gypsophila and zinnias.

For color masses—Petunia, zinnia, marigolds, calendulas, phlox Drummondii, verbena, stock, aster, salvia, nasturtiums and poppies.

For light or poor soil—Nasturtiums, godetia, poppy, portulaca and zinnias.

For fragrance—Mignonette, hellebore, nasturtiums, alyssum, ten weeks' stocks, sweet peas, matthiola bicornis, nicotiana.

For shady places—Pansies, godetia, forget-me-not, nemophila, musk plant, begonias, impatiens.

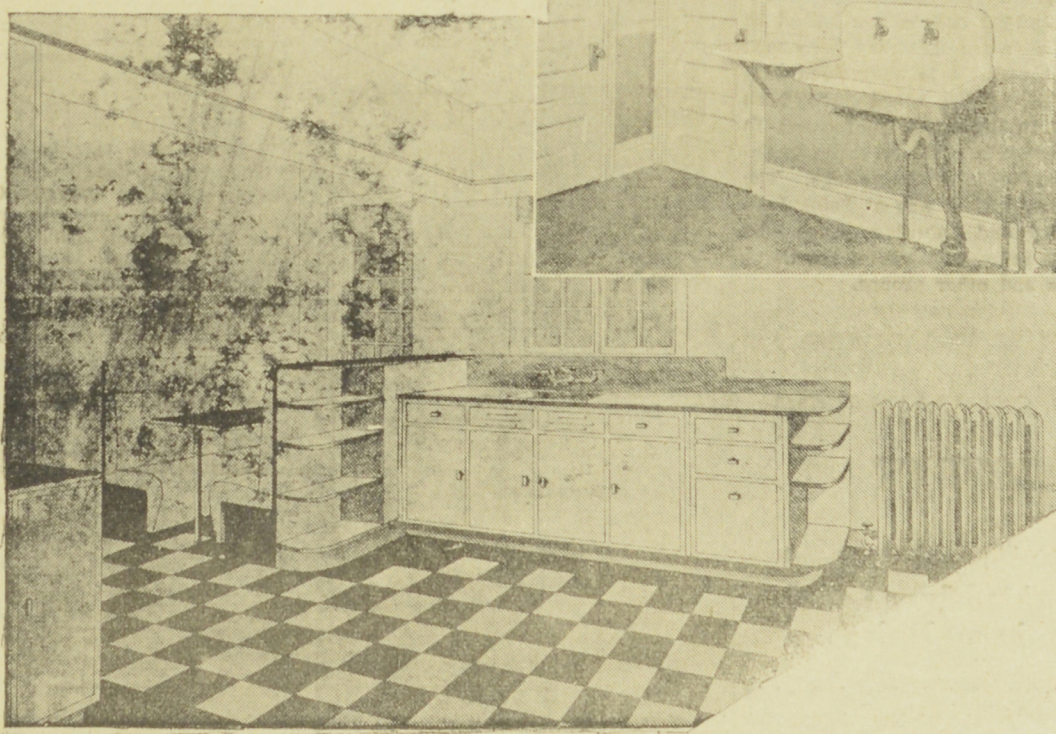

To grow after frost—Sweet alyssum, bachelor's buttons, petunias, marigolds, calendulas, candytuft, stocks and phlox Drummondii.

Vines—Morning glories, moon-flowers, Japanese hop, climbing nasturtium, cardinal climbers, cobaea, cypress vine, balloon vine, scarlet runner and hyacinth beans.

"It is important for a ball-player to realize that playing the game is like life in general. You have to take the bad with the good, the bitter with the sweet."—Ty Cobb.

"I find on the whole those who are the most competent and informed are the most conservative."—Robert A. Millikan.

Kitchen Takes On New Efficiency And Style

Three-way efficiency plus beauty are the characteristic features of the kitchen in the home of today, says the Canadian Institute of Plumbing and Heating. Efficiency in saving time and saving space has been accomplished through the cooperation of architects, the plumbing industry and experts in home economics.

In the scientifically planned kitchen, the equipment — sink, range, cabinet and refrigerator — should be so located as to place unit and the supplies or appliances stored in it, easily available in the fewest steps and with the least amount of bending and reaching. The refrigerator, therefore, is placed nearest the door where food is delivered. Adjoining it, in the well-planned kitchen, are ample working surfaces extending to the sink where food is cleaned and prepared. Another counter extends from the sink to the range where food is prepared and served to the dining room.

In the U plan kitchen, each of these areas of activity are assigned approximately equal space along the

wall, and inasmuch as this arrangement eliminates to a practical minimum any unnecessary steps and permits the sink — as the most used unit — to be the focal point in the layout, the U plan kitchen is considered by designers to be the ideal layout for the average home.

The plumbing industry has contributed to the space and time saving efficiency of the modern kitchen by designing the cabinet sink. This latest and most complete edition of the modern sink gives the advantage of utilizing former waste space beneath the sink for the accommodation of soap, chips, steel wool, dish cloths, towels, pots and pans, utensils, and numerous other articles which are required to be right at hand in this area of activity. Like all modern sinks, the cabinet sink may be obtained in acid resisting enameled cast iron, with chromium plated swinging spout faucet, sink stopper, cup strainer, hose spray, single or double drain boards and safety ledge.

STRIVE TO SAVE LIFE OF WORLD'S SMALLEST CHILD

CHICAGO, May 8.—Extraordinary measures have been taken at Oak Park Hospital to preserve the life of a 14-ounce baby girl.

One of the smallest ever born alive the child was housed in an electric incubator in an artificial atmosphere of 90 per cent oxygen. Her minute feedings were administered with a medicine dropper.

The baby, as yet unnamed, arrived last week, four months before she was expected. Dr. Michael J. Parent said the birth was a normal one, but that a powerful heart stimulant had to be injected before the baby showed signs of life.

The little girl is the first child of Mr. and Mrs. Louis Canepa. The mother is 28. Dr. Parent said the baby was almost perfectly formed, although her body is only about 12 inches long.

WOMAN NOTED ARCHAEOLOGIST

LONDON, May 8.—One of the few women to have made her name as an archaeologist, Miss Kathleen Kenyon, has been supervising the excavation of a hitherto unknown medieval site in Surrey. Her interest in the past is inherited, for she is the daughter of Sir Frederick Kenyon, formerly director of the British Museum, and Director of the British School of Archaeology in Jerusalem since 1920.

Fair-haired and blue-eyed, Miss Kenyon wears Wellington boots and tweeds for her open air work, often accompanied by her small black dog. She took her degree from Somerville College, Oxford, and specialized in archaeology afterwards, becoming in addition, a Fellow of the Society of Antiquaries.

She is attached to the Institute of Archaeology in Regent's Park, and important digs which she has directed were at the Roman town of Uricum, at Wroxeter, in 1937, the Roman Forum in Leicester in 1938, and Maiden Castle.

QUEBEC RUSHES PREPARATIONS FOR KING'S ARRIVAL

QUEBEC, May 8.—A huge electrically-lighted crown will blaze atop the tower of Quebec Legislature buildings on the night of May 15 which King George and Queen Elizabeth will spend in Quebec City.

Plans for erection of the crown were announced today by the Provincial Public Works Department which is directing decoration of all Provincial Government buildings for the Royal visit.

The main block of the Legislature buildings will be decorated with red, white and blue bunting, French and British flags and reproductions of the Royal coat of arms.

During the formal reception of the King and Queen in the Legislative council chamber, the Royal Standard will fly at the tower of the main building.

Ceremonies will be broadcast by loud-speakers to be set up about the buildings. For the day the public will not be permitted within the Legislature grounds.
