THE MCMURRAY BOOK & STATIONERY CO., LTD.

The brain is one of the fastest growing parts of the body. Under normal conditions, it has attained 20 per cent. of its adult size at birth, 50 per cent. at the end of two years, 80 per cent. at the end of four years and its full growth at the end of six years.

Now you know why boys from the age of six years and upwards welcome the underwear their parents get for them from Fleming's, of course. The boys, having fully developed brains, appreciate the non-irritating qualities of their winter combinations when purchased from
