The house was bright with spring flowers and the tea table was presided over by Mrs. Percy Smith. The hostess was assisted in serving by Miss Martha Fleming, Miss Jean Smith, Mrs. Cedric Cooper, Miss Marion Tupper, Miss Margaret Scott and Miss Lalia MacVey. The guests were mostly old friends of Mr. and Mrs. Douglas Foster, who are former residents of Fredericton. Mrs. Foster was formerly Miss Mary Adams of this city, Mr. Foster being a graduate of U. N. At the meeting of the Parish Church Men's Club last evening, it was decided that a mock parliament be conducted. He will have for his Cabinet Ray Barker, Attorney-General and Justice of the Peace; William Bourne, Minister of Lands and Mines, Garden Plots and Lawns; Wilfrid Wade, Minister of Roads and Kiddie Cars; Harry O'Ree, Minister of Dance Halls; Jack Ackerley, Minister of Finance and Radios.

claim that unless the city council can see that \$1,000.00 is the least sum that the tourist committee can go ahead with, it would be better to abandon the idea.

The tourist committee considered also last night the advisability of placing signs at each end of the city which would direct tourist visitors to Queen Street. At the present time Brunswick Street, which is a "through" street, carries many tourists right through the city before they have a chance to see the business section of the city. In short they consider Brunswick Street as part of the trans-Canada highway and are thus not encouraged to stop off at all, but to continue on to Saint John, or to Woodstock, whichever way their route lies. It is hoped to erect up-to-date signs at points where tourists will easily see them.

It was stated this morning that a quantity of literature is available at the city hall and if it can be procured, will save the expense of printing other pamphlets.

## Lady Astor Rebukes Allusion To Her Hesitancy

LONDON, England, March 11—Britain's dignified lawmakers laughed lustily about Lady Astor's silk—alleged, at least, to be silk—stockings.

During discussion of unemployment in the hosiery industry, Minister of Labor Oliver Stanley was asked whether he could induce British women to wear English stockings to reduce idleness in this country.

"Perhaps the honorable gentleman", Stanley replied to his questioner, "would start with Lady Astor, who is in front of him".

Lady Astor, immediately called out: "Oh, Mr. Speaker, my honor is at stake, my modesty. How does he know?"

Renewed gales of laughter greeted this remark.

## ONE DECREE GRANTED

The New Brunswick Divorce Court commenced its March sitting this morning and before adjourning for the noonday recess granted one decree of divorce, the case being that of Ernest Jones vs. Viola Jones, the case being from this city. Robert Day, of Bangor, Maine, is named as co-respondent. In granting the decree this morning, Mr. Justice Grimmer pointed out that evidently the woman had married twice. Though the original charge is that of adultery, this last fact would indicate bigamy. Sergt. William J. Hughes appeared as a witness. The case of Jessie Milner Searle vs. Roy Stanley Searle was begun and continued this afternoon.

## UNDERWATER PLANTS DEADLY TO MASTADONS

BELOIT, Wisconsin, March 12—A craving for underwear plants brought death to 40 "coal scoop" mastodons and preserved their prehistoric skeletons until ages later when they were found by Dr. Roy Chapman Andrews in the Gobi desert, the famed Beloit College alumnus revealed here.

The mastodons who drew their common name from their peculiarly jutting lower jaw which enabled them to scoop up plants from the soft mud or inland lakes were found piled skeleton upon skeleton by Andrews.

He reconstructed their history in times when the desert was a place of plenty of food, and told how they apparently sank in the mud where they were searching for food.

## New Brunswick Sportsman To Have West Indies Club

Jack Russell, well known New Brunswick sportsman, together with Mrs. Russell and their two sons, returned to the province today after spending the winter months in Florida. Mr. Russell has full booking of sportsmen for his summer fishing camps on the Miramichi and the Restigouche and has returned to this city, full of optimism for the new season. He sees signs of better times in the United States, too. "Times look much brighter in the United States," he said, "and New Brunswick should be benefited also."

While in Florida this winter, Mr. Russell laid plans for branching out his sporting interests. The energetic and ingenious Mr. Russell has begun the establishment of a club on the south end of the Island of Bimini, in the British West Indies and has associated with him none other than Gene Tunney, ex-heavyweight champion boxer of the world, and B. G. Dawes, a brother of the ex-Vice-President of the United States. It is planned to sponsor deep-sea fishing and to establish a permanent club there under Mr. Russell and his famous associates' management. It is also hoped to set up a club at Hobe Sound, a short distance north of Palm Beach.

Mr. and Mrs. Russell and family spent an enjoyable winter in the south and arrived via New York, where they also visited.

Burrows, secretary of the Canadian Horticultural Society, as its representative to the board. Another man will be named by the Federal Fruit Branch and the third by the Ottawa firm.

## RUSSIANS ARE TRYING NEW ANIMAL BREED

MOSCOW, U. S. R., March 12—A new series of domestic animals constructed by restoring the qualities of present wild and domesticated species through artificial breeding is planned by Soviet biologists in southeastern Russia, where much of the country is either desert or mountainous so that ordinary horses, cattle, sheep and other domestic animals have difficulty in living.

A few hybrid domestic animals already are known; including mules, a cross between buffaloes, and ordinary cattle, the cross of lion and tiger called the "tigon" accidental crosses of dogs with wolves and others.

Deciding that many other animal crosses were possible biologically and prevented only by the unwillingness of the different species to mate with each other, the Soviet scientists determined to try the exact and controllable methods of artificial cross breeding already in use for breeding race horses.

One such artificial hybrid has been accomplished between ordinary cattle and the long-haired yak, found wild and also used as a domestic animal in the mountains of Asia. The resulting yakcows and yakoxen are reported to withstand the cold of mountain climates better than ordinary cattle but to excel the yaks in supplying milk and useful meat.
