CHAIN LETTER RACKET MAKES AN APPEARANCE

Local Business Women
Received Letters From
Long Beach, Calif.

Get-Rich-Quick Racket

Atty.-General Hon. W.
H. Harrison Cautions
New Brunswickers

The "chain letter" get-rich-quick scheme has reached Fredericton. On Saturday last a number of prominent local business women received one of these chain letters. The letters which came out of Long Beach, California, were supposed to be sent by the Prosperity Club and had at the top "In God we Trust", followed by the words Hope, Faith, Charity, Love, Peace, Harmony. The letters continue:—"This chain was started in the hope of bringing prosperity to you. Within three days make 5 copies of this letter, leaving off the top name and address, and adding your name and address at the bottom of the list. Mail the copies you have made of this letter to five of your friends to whom you want prosperity to come. In omitting the top name on this letter send that person 10 cents wrapped in paper as a charity donation. In turn as your name leaves the top you will receive (if this chain is unbroken) 15625 letters with 10 cent donations amounting to \$1,562.50. Now, is this worth a dime to you? Have the faith your friend has that this chain will not be broken. The letters you send ends your share in the work of this chain. Thank you, Father Divine".

Seeps Into Province
The above letter is signed by five people, one of whom is a former New Brunswick nurse, who is now living in California.

The "chain letter" scheme seems to have crept into many places in the province. Hon. W. H. Harrison, K. C., attorney general, commented on the matter at Saint John today and advised the recipients of such letters to exercise caution. "Similar easy-money propositions have worked out to the ultimate dismay of thousands in various U. S. centers", he said. "On the surface, in theory, the participants obtain a considerable amount of money. But the fact remains that in a very short space of time those who are late in getting into a chain are left 'holding the bag'."

The mechanics of this "chain store" letter plan is something as follows:

"Five persons start a chain. Their names are listed in order on an appeal letter. Ten such letters are sent to "friends". The latter are supposed to send 10 cents each to the name and address at the top of the list, then make 10 copies of the letter each, leaving out the top name, moving the others up one notch, and filling in their own individual name at the bottom. Then they send all the new letters—altogether 100 of them—to more "friends".

By the time that this process is repeated five times, says the alluring prospectors, there will be 100,000 dimes—sent to the participant whose name has reached the top of the list, and so on.

The sad part of it is that for the 100,000 to get their fortunes, in turn, would be impossible. When their names had come up to the top of the lists the letters would have reached 10,000,000,000 persons; in simpler way of expressing it, ten billion persons.

But Whitaker's Almanack is authority for the fact that the population of the world is only 1,849,500,000—less than two billion.

And quite a few of them can't read English letters".
