

## EXPERIMENTS OF VITAL IMPORTANCE TO POULTRYMEN

E. C. Elford, Dominion Poultry Husbandman, Here Today

### New Poultry Feeds

Will Review Poultry Investigation Work Carried Out Here

S. C. Elford, dominion poultry husbandman of the Experimental Farm at Ottawa, arrived in the city this morning and will spend the next day or two reviewing investigation work in the poultry industry carried on by the Dominion Experimental Station here. Experiments of vital importance to the industry have been carried out in recent months.

An attempt will be made to adapt the effects of these poultry experiments to regular poultry practice. The experiments have directly to do with feeding the growing chicks. One experiment has to do with new poultry feeds for rearing chicks and in this conjunction a "cafeteria" mixture, featuring various kinds of feed already promises well. Another experiment is in the field of feeding ordinary chicks a standard chick ration. In this latter connection grass tea is added to the rations and also ashes from burnt grass.

C. F. Bailey, superintendent of the Experimental Station here pointed out this morning that where these latter experiments had been used on the growing chick, it had matured a month earlier than is normally the case. The experiments had been carried out, of course, on isolated cases and not in the bulk as yet.

## COMMISSION MAKES RULING RE EMPLOYERS

Sub-Contractor, Principal Employer Held Equally Responsible

### Busy Meeting Here

N. B. Forests Operations Comm. Reports Many Wage Adjustments

What constitutes an employer was one of the major questions considered at a busy meeting of the New Brunswick Forest Operations Commission, which concluded at midnight last night. A. B. Gilbert, of Saint John, chairman, presided. It was a full meeting of the Commission. The agenda included forty items. The Commission's duties entail the settlement of disputes between employer and employees in the lumbering industry.

Several cases on the agenda of the Commission involved the question of the definition of an employer. There was some argument as to whether a subcontractor is buying or is the employee of a man getting lumber. In those cases where a ruling had to be made by the Commission decision was made that sub-contractors and the principal employer are equally responsible as employers. The ruling is substantiated by the Forest Act.

Reports from various parts of the province indicated that a large number of men were receiving additional wages as a result of the work of the New Brunswick Forest Operations Commission.

One employer was before the Commission yesterday. Adjustments were made in most of the forty cases on the agenda.

Influx of Visiting Anglers Was the Greatest In Years

### Fishing Was Good

Millionaire Sports Have Big Investment In the Province

"Fishing was never better on the Miramichi than it has been this spring and I don't think we have ever had such a large influx of American anglers," said David Manderville, well known guide of Derby, Northumberland county, who was a visitor to the city this week. Mr. Manderville, who achieved considerable fame along with other members of his family in the days when big game was plentiful, now specializes on salmon and trout fishing. He owns sporting camps at White Rapids on the Miramichi and also has charge of a splendid fishing lodge at that place, which is the property of Mr. Paul Starrett, of New York, who constructed the Empire State building in that city, the greatest skyscraper in the world.

Mr. Starrett passed through the city this week on his way home by auto from a week's fishing trip to the Miramichi, made under the guidance of Mr. Manderville. His companions on the trip were R. C. Post of New York, Fred Tuttle, of Greenwich, Conn., and H. D. Forbes, of Worcester, Mass. All of these gentlemen are frequent visitors.
