

# DYING FROM GALL-STONES

Doctors Said Only An Operation Could Save His Life—"Fruit-a-tives" Enabled Him To Pass Nearly 200 Gall-Stones.

J. B. HARDING, Esq.

45 Grove Ave., TORONTO, ONT., Jan. 10th, 1913.  
"I suffered untold agony from GALL-STONES, for the past three years, and tried many doctors without getting relief. I also paid \$5.00 for one bottle of medicine which was useless. At times the pain from these gall-stones was so great that I lost consciousness, and my condition was desperate. I was quite satisfied that I was dying and the doctors said I must be operated upon."

"During one of these very severe, acute attacks, I was given some 'FRUIT-A-TIVES', and after taking a short treatment of this remedy, I passed gall-stones over an inch in length, and as many as one hundred and fifty or two hundred in number. 'FRUIT-A-TIVES' was the only thing that would relieve my pain. They are the greatest medicine in the world, and if there is anyone in Canada, or anywhere else, that suffers from gall-stones, I say 'Let them take 'Fruit-a-tives' and be cured'."

"If this testimonial will further the good work of 'Fruit-a-tives', publish it with my full authority."

Are you wondering how "Fruit-a-tives"—a medicine made from fruit juices, can cure Gall-stones? We will tell you. The Gall bladder is the reservoir for holding the Gall, or bile, secreted by the liver. If there is insufficient bile, then the bile in the Gall bladder is thick and easily forms stones. When the liver is weak, it secretes very little bile and then the Gall bladder is partially filled with a thick jelly-like mass of bile and thus forms into lumps or stones. "Fruit-a-tives" stimulates the liver to secrete more bile, and this increased bile softens the Gall-stones and by overfilling the Gall bladder, forces the passage of the stones through the Gall duct—and thus cures the disease.

"Fruit-a-tives" is the only medicine in the world made of fruit juices. By a wonderful process, the medicinal properties of certain fruits are greatly intensified—then valuable tonics and antiseptics are added and the whole made into the pleasant tasting tablets known in every section of Canada as "Fruit-a-tives".

PRINCE WILLIAM RAILWAY—A survey party locating the so-called Prince William Railway between Shogomoc and Pokiok with a fair prospect of reaching the latter place by the 30th inst when the greater portion of the work will be completed. It is reported that the cost per mile on an average from Woodstock to Pokiok will be \$18,000 while the Eel River Bridge will cost from \$25,000 to \$32,000. All difficulties are ended at Pokiok. The road from that point to this city being easily made with few bridges and those short and unexpensive. On the whole route but one man has been found opposed to the Road.

## KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery and stomach trouble are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house is safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a

## How Concrete Work Was Made Easy For You

UNTIL a few years ago farmers considered concrete a rather mysterious material, that could be used successfully only by experts. They knew that upon the quality of the cement depended much of the success of concrete work. They had no means of testing cement, such as big contractors employ, and so could not be sure of its quality.

Yet the farmer needed concrete.

He was kept from using this best and most economical of materials by

1. Lack of knowledge of how to mix and place concrete.
2. Lack of a brand of cement upon the quality of which he could absolutely rely.

### Canada Cement

has supplied both these requirements.

We employed men to make a thorough investigation of the farmer's requirements; to find out where and how he could use concrete with profit to himself; to discover all problems he might come across and to solve them. This investigation was expensive. But when it was completed we had the material for our campaign to show the farmer how and where to use concrete, and we printed a book, "What the Farmer Can do With Concrete," for free distribution. That book makes every farmer who reads it a concrete expert, as far as his needs are concerned. He finds that there is nothing mysterious about concrete—that a few simple rules supply all the knowledge required.

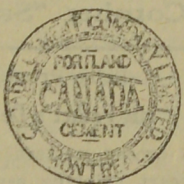

At the same time we met the farmers' second objection—inability to test the quality of cement—by producing cement of a quality that does not need to be tested.

The Canada Cement that you buy by the bag is the same Canada Cement that is sold by the train-load for great elevators, buildings and bridges.
