

BEST FOR DANDRUFF, FALLING HAIR OR AN ITCHING SCALP—25 CENT "DANDERINE"

Save Your Hair! Danderine Destroys Dandruff and Stops Falling Hair at Once—Grows Hair, We Prove it

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous—you must use Danderine, because nothing else accomplishes so much for the hair.

Just one application of Knowlton's Danderine will double the beauty of your hair, besides it immediately dissolves every particle of dandruff; you cannot have nice, heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its very life, and if not overcome it produces a feverishness and itching of the scalp; the hair roots famish, loosen and die; then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggy or too oily, don't hesitate, but get a 25-cent bottle of Knowlton's Danderine at any drug store or toilet counter; apply a little as directed and ten minutes after you will say this was the best investment you ever made.

We sincerely believe, regardless of everything else advertised that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair—you must use Knowlton's Danderine. If eventually—why not now? A 25 cent bottle will truly amaze you.

WEALTHY AMERICAN GIRL TO MARRY FRENCH PRINCE

New York, Jan. 30—According to word received from Paris, the final preparations have been made for the wedding in that city early next week of Miss Helena Stallo, of Cincinnati and New York, a 20-year-old girl who possesses a fortune of many millions of dollars in her own right.

The lucky man to win her is Prince Michael Murat, a nephew of the ex-Empress Eugenie. Their engagement was announced less than a month ago by the father of the bride-elect.

Miss Stallo is the younger daughter of Edmund K. Stallo and granddaughter of Alexander McDonald, who was a big man in financial circles in the middle West. Mr. McDonald died some three years ago in Long Beach, Cal., at the age of 82. His estate, which was estimated to be worth between \$15,000,000 and \$20,000,000, was left to his granddaughters, Laura McDonald Stallo and Helena McDonald Stallo.

McDonald came to this country in 1851 and settled in Cincinnati. He was a partner of John D. Rockefeller in the oil business, and was president of the Standard Oil Company of Kentucky, a vice-president of the Standard Oil Company of New Jersey, a director of the Big Four Railroad, of the Third National Bank, and of the Carnegie Trust Company.

McDonald's only daughter married Edmund H. Stallo, now of New York City, and Paris, and upon her death her two daughters went to live with their grandfather. He retired from business five years before his death. His granddaughters were his only descendants. He often said he would leave everything he had to them, and hoped they would marry for love, without regard to the man's financial condition.

Upon the death of his first wife Stallo married, in 1904, the divorced wife of Dan R. Hanna, son of Mark Hanna. She was May Harrington, a daughter of one of the wealthiest and most influential men in Cleveland. She divorced Hanna in 1896 on the ground of cruelty. Stallo's father was the late Judge Stallo, who was American minister to Rome during the first Cleveland administration.

After the death of their grandfath-

er the Misses Stallo came to New York. For a while they lived at the Waldorf, and then they went to the Plaza. In July, 1911, announcement was made of the engagement of Miss Helena Stallo to Nels Florman, then a resident of this city. Florman's parents were residents of Stockholm, Sweden. His grandfather was said to be an admiral in the Swedish navy and his father a captain in the same services. The young man himself was said to be a warm personal friend of King Gustaf V. of Sweden. But his engagement to Miss Stallo was summarily broken off when the story was published that he had been employed since his arrival in New York as a valet and massage artist, though his claims concerning his family were never disputed.

After the breaking of the engagement with Florman Miss Stallo and her family went abroad to reside. In Paris they have been living in a magnificent apartment on Rue de Lu-beck. The house was formerly the Portuguese embassy. It is built in the Empire style and has been furnished with exquisite taste by the two Misses Stallo and their father. It is said that the house will be turned over to Prince Murat and his bride after the wedding.

Prince Murat is the son of a Russian princess and is a lineal descendant from the famous Marshal Murat, who married Caroline Bonaparte. Prince Murat is a young man of about 25 years and is said to be tall and handsome. He speaks English and Russian perfectly.

The wedding is set for Monday next in the Church of St. Honore d'Eylau on Place Victor Hugo. Myron T. Herrick, American Ambassador to France, and Col. Henry Watterson of Louisville are to act as witnesses for Miss Stallo, while the Grand Duke Paul of Russia will attend the bridegroom. The couple are to spend their honeymoon in Algiers. They are to pay a visit to America next summer and in the fall will return to Paris to make their future home. Mr. Stallo and his elder daughter, Miss Laura Stallo, will return to this city soon after the wedding.

ADVOCATES BUILDING PERMANENT ROADS

The following resolutions have been adopted by the St. John City and County Good Roads Association, as a partial program for highway reform.

We advocate:

1. The appointment by the government of a Provincial Highway Commissioner, with a technical and practical knowledge of highway engineering, who shall have charge of all trunk roads, lay out and direct permanent improvement work, supervise the expenditure of provincial funds, be competent to advise and instruct county superintendents and shall by means of lectures, newspaper articles, etc., be capable of carrying on a good roads educative campaign throughout the province.

2. The establishment of three trunk roads to be permanently improved and maintained by the provincial government as provincial highways, and to be kept in repair under what is known as the patrol system, statute labor being abolished on trunk roads, viz:

(a) From the U. S. boundary to St. Stephen eastward by way of St. George, St. John, Hampton, Sussex, Petitediac, Moncton and Dorchester, to the provincial boundary between Sackville and Amherst.

(b) From St. John northward by way of Fredericton, Woodstock, Andover, Grand Falls and Edmundston to the Quebec boundary at St. Jacques.

(c) From Albert eastward and northward by way of Moncton, Shediac, Buctouche, Richibucto, Bay-du-Vin, Chatham, Newcastle, Tracadie, Caraquet and Bathurst, to Campbellton.

These trunk roads would intersect every county in the province and connect all the principal towns and villages by a main line of communication.

3. That any grant made by the Dominion government for highway purposes, be devoted to the construction and maintenance of trunk roads as above designated.

4. The encouragement of municipalities to abolish statute labor, by the offer on the part of the provincial government, of a bonus to any municipality or district electing to pay its road tax assessment in cash, also the complete abolishment of statute labor by law, wherever, and as rapidly as conditions will permit.

5. The adoption of the patrol system of repair and maintenance as far as possible, especially on main county roads.

St. John City and County Good Roads Association, St. John, N. B., November, 1912.

Wood's Phosphodine.
The Great English Remedy. Tones and invigorates the whole nervous system, makes new blood in old veins, cures Nervous Debility, Mental and Brain Worry, Dependence, Sexual Weakness, Emissions, Spermatorrhea, and Effects of Abuse or Excesses. REST ROOMS FOR FARMER'S WIVES

Madison, Wis., Jan. 30 — Rest rooms for farmers' wives and children will be recommended for the towns and villages of Wisconsin at the third Wisconsin Country Life Conference, which will meet here tomorrow for a two days' session. The plan is to set aside a house in the center of the town where the women and children may go while the farmer is attending to his business.

BEGINNING OF THE MARITIME FRUIT INDUSTRY

When Lief Erikson visited the Acadian Valley and gave to it the name of Vinland because of the various kinds of wild fruit growing there the old Indian names along the Atlantic coast attested the abundance of various kinds of wild fruits.

To the French we owe the discovery of the adaptabilities of the soil to fruit growing but to the English we are indebted for the promotion of that culture.

In 1605 De Monts in his removal from St. Croix was delighted with the clusters of wild grapes growing at the base of the limestone cliffs of the St. John river. Sailing on the "French Bay" as he called the Bay of Fundy he says in his narrative of the expedition. "We entered one of the finest harbors I had seen along these coasts in which two hundred vessels might lie in security, the entrance is eight hundred paces broad; then we entered a harbour two leagues long and one broad which I have named Port Royal."

Port Royal must be regarded as the northern settlement of Acadia and to this sheltered valley snugly ensconced between two sheltering mountain ranges must be awarded the distinction of the first experiments in horticulture in the Maritime Provinces if not the first garden in Canada. For when Champlain came to Canada in 1605 he brought with him some apple shoots from France. These he planted at Port Royal and the little plot of land to this day is known as the "French Garden."

It is difficult to trace the history of this particular branch of agriculture from year to year as it is rarely spoken of in history, probably on account of the continual changes of rulers of Acadia and the almost continual petty wars.

The Jesuit Fathers did much to promote fruit culture in the various parts of New Brunswick, Nova Scotia and P. E. I., where they were stationed. They varied the monotony of their work and added luxuries to their scanty tables with the vegetables and fruit grown in their gardens among the pine stumps. They bestowed special care upon the fruit trees they had raised from seedlings brought from France.

They introduced grapes from France which were larger and of a much firmer flavor than the native grapes. To this species belongs the various kinds of currants which were probably introduced at the same time.

In 1633 we hear of apples growing along side the Gaspereaux River where they had been planted by the French. In 1664—twenty-nine years after Champlain's death the Abeniki of the East as the Indians called Acadia "the land of the dawn," the raising of fruit had passed beyond the experimental stage and the valleys of the Cornwallis and Annapolis (Port Royal) rivers were fringed with apple trees. Much large and varied fruit being raised proving the adaptability of the soil to fruit culture by the combined efforts of nature and man.

However, it was soon discovered that the fruit culture was limited as the climate was not suited to the growth of the citrus fruits. Apples were more extensively raised than any other fruit because of the hardness of their nature, the sure crops and the many different ways in which

Throat Was So Sore Could Hardly Speak.

Mr. Gordon Murphy, Elliott's Mills, P.E.I., writes:—"Too much praise cannot be given your valuable remedy, Dr. Wood's Norway Pine Syrup. I suffered terribly from a severe cold during the early part of last winter and found it almost impossible to get anything to relieve me. Hoarseness seemed to be continually troubling me, and my throat was so sore I could hardly speak for quite a long time. At last I was advised to try your remedy, and in a short time I got relief, and have never been troubled with a sore throat or hoarseness since. I hope others will be fortunate enough to give your remedy a trial and be convinced that it is all I say it to be."

Dr. Wood's Norway Pine Syrup is without an equal for Coughs, Colds, Sore Throat, Hoarseness, Bronchitis and all Affections of the Throat and Lungs.

Price, 25 and 50 cents a bottle, put up in a yellow wrapper, three pine trees the trade mark.

Be sure and get "Dr. Wood's."

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

THE SCHOOL MUST BE PRACTICAL

While we in Canada are deploring the inadequacy of our elementary school system the leading educationists of the great Republic to the south are awakening to the fact that their high or secondary schools have been great factors in the development of condition which are not a credit to the country.

In a land given over entirely to the mad pursuit of money, it is a healthy sign to see the following in a recent issue of The New York Post:

"The cry for immediate utility as the chief end of education swells in volume every day. In the report of a committee of the National Educational Association, at the annual meeting Chicago, we read: 'High school education is generally bookish, scholastic, abstract and inadequate to meet the practical problems of life'; and the whole system is just where it was thirty years ago. The cause of the failure is laid bare: 'The whole trouble with our high school education is that it is merely a preparation for the university. Instead of dealing with the problems of life to-day the students are taught to deal with language, politics and customs of fifteen centuries ago.' The remedy is 'a change in high school teaching a look in the direction of the farm, shop and home.'"

So we see that thinking people in other countries than ours are coming to the conclusion that the day has come when a system of vocational schools must arise, which will train the boy or girl for the part which he or she is to play in the life struggle after efficiency and success.

The article goes on to say: "Teachers and authorities of the secondary schools are divided over

(Continued on page 67.)

they could be used as a food and were a great boon to health. They also required little attention. But even Provinces had a small orchard set out for home consumption. From these beginnings have sprung the modern fruit orchards of the Maritime Provinces.
