WHAT WILL HE DO NOW?

For a year or more now Premier Borden has been dreaming of an emergency which may overwhelm the British Empire in fury and disaster. For the same period of time he has been trying to sit between the two stools of Nationalism and Imperialism. He was furtively watching the lightning playing around the horizon and listening to the distant thunder while at the same time he was carefully watching his Nationalist allies and listening to the boom of the growing tide of resentment against his naval acrobatics.

In despair he finally fled to St. Andrews-by-the-Sea to seek peace. Even there the Naval ghost would not down, and he is reported to be in close cable communication with the British admiralty hoping to find some way in which he can get out of his self imposed dilemma without following the common sense course proposed by Sir Wilfrid Laurier.

Then came "the most unkindest cut of all." Winston Churchill cut the ground from under Mr. Borden's feet and left him derelict indeed, when he declared in the British parliament on July 17th that he knew of nothing in the international situation necessitating an increase in the British Naval programme. And this after Mr. Borden had intimated that the despairing British public were hurrying to get together three extra Dreadnaughts to get the place of those he had proposed. It is small wonder that Mr. Borden is reported suffering from sleeplessness and the desire to put off meeting parliament till next year. There will be much to explain when he does face the representatives of the people. All this will be as nothing to the necessity of formulating some permanent policy which will not be a policy of permanent tribute and yet hold his Nationalist allies.

DISAPPOINTED PATRIOTS

There is deep and loud grumbling amongst the followers of Mr. Borden at the appointment of Mr. Arthur Meighen as solicitor general. Especially is this manifest amongst the older Conservative members from Ontario, which province has long considered itself the centre of Toryism, and entitled to about everything it wanted. E. A. Lancaster, M.P. for Lincoln, is among the most angry, and even went so far as to take a trip to the capital to tell people how badly he felt because Ontario and Lancaster had been passed over. W. H. Bennett, M.P. for Simcoe, is another old time Ontario Tory who received a severe jolt when the plan went west. Mr. O. S. Crockett, M.P. for York, is also numbered among the "also rans," it being his second disappointment. However, there are four vacant judgeships in Ontario and there will soon be two in New Brunswick, and it is announced that when Hon. W. T. Crothers and Hon. J. D. Hazen return from their trip to the west they will distribute this patronage where it will soothe the ruffled feelings of Tory members as far as possible.

The British Navy will be increased by a new destroyer every two weeks or the next nine months; by a light cruiser every thirty days for the next year and by a super-dreadnaught every forty-five days for the next eighteen months. It is also worthy of note that every one of these ships will be fully manned and officered and ready to meet any possible foe the day they are put into commission. With such speedy preparation for every eventuality, it is not likely that the British people are lying awake at night worrying because they have not got Mr. Borden's three empty dreadnaughts.

Gene McCann, former manager at Bridgeport has been signed to manage the New London team of the Eastern Association.

Hon. W. T. White, who is in England recently stated there that, "Canada is sound on the Naval question and she can be relied upon to do her duty both to herself and to the empire." Mr. White must have suffered a temporary relapse to the days when he was a Liberal and had not been led astray by the flag-flapping hysterics of the last election and the prospects of a cabinet position for turning Tory. He and Mr. Borden will ere long find that Canada's heart is sounder than they imagine.

OFFENSIVE BREATH CAUSED USUALLY BY CATARRH

A Simple Remedy Discovered That Cures Without Drugs

The American people suffer more from Catarrh than any other disease. It undermines more constitutions and creates more sickness than all other diseases combined. It is, therefore, very dangerous.

You can't successfully treat Catarrh by internal dosing—you must in some way send a purifying, healing agent through the breathing organs so that the germs can be reached. This you do every time you inhale Catarrhazone. It's rich essences and healing balsams are breathed all through the nose throat and lungs and effectively destroy every trace of Catarrh. This is a proven fact.

I endorse Catarrhazone because I know of six bad cases of Catarrh, including my own that it has cured. It is a sensible remedy because it is capable of going where the disease is. I believe it cures quicker than other remedies because it gets sooner to the source of the disease than anything else I know of. I had headaches, bad breath and much stomach trouble associated with my Catarrh, but they have disappeared since using Catarrhazone, which keeps me free from colds, headaches, catarrh and all winter ills." OTTO E. KRAMER, Belleville, Ont.

Catarrhazone is needed in every home. Large size lasts 2 months, price \$1.00, small size, 50c.; trial size, 25c. At all storekeepers and druggists or The Catarrhazone Co., Buffalo, N.Y., and Kingston, Canada

WARNING AGAINST THE TUBER MOTH

Washington, July 28—Warning against a pest that threatens every dinner table in the land was issued on Monday by the department of agriculture against the potato tuber moth which is working havoc with the potato crop in numerous parts of this country and whose ravages threaten to prevent the planting of the vegetables in many places of the winter supply. The pest is especially prevalent in California and Texas the department reports and through shipments of early potatoes it is being introduced broadcast throughout the United States.

Experts of the bureau of entomology urge potato growers to look carefully over the potatoes they dig and destroy every potato and vine that shows the slightest sign of the moth.

Great attention should be given the seed potatoes on which the subsequent crop depends. Fumigation with carbon-bisulphide is recommended.

The scientists utter a warning against careless methods in planting harvesting potatoes and declare "unless protective and defensive measures are adopted at once there will be a serious reduction of the potato crop."
