## PETER FARRELL & CO

## THE GREAT WHITE PLAGUE MUST BE STAMPED OUT

Stirring Addresses at the Annual Meeting  
of the New Brunswick Association for  
the Prevention of Tuberculosis--Maritime  
Provinces can be Free of Disease  
in Forty Years Says Dr. Smith Walker  
of Truro.

St. John, Nov. 16.—There was a large and representative gathering of ladies and gentlemen at the annual meeting of the New Brunswick Association for the Prevention of Tuberculosis, which was held in the board of trade rooms last evening, and they heard several interesting addresses. The chief speaker was Dr. Smith L. Walker, of Truro, N. S., and he dealt with the subject of tuberculosis in a very able manner. One of the suggestions he made was that the three governments of the maritime provinces should provide a sum sufficient to stamp out the spread of the disease, which he claimed could be done inside of twenty years if it was gone about in the right manner. Premier Hazen, Dr. C. R. Flanders, Rev. T. Hunter Boyd and ex-Governor McClellan made addresses that were followed closely by the audience.

Reports of the last year's work were presented and officers elected for the ensuing year. Dr. Thomas Walker being re-elected president. The president, Dr. Thomas Walker, on calling the meeting to order, asked His Lordship Bishop Richardson, to open the meeting with a prayer. The president then read the annual report of the executive committee:

### REPORT OF EXECUTIVE

The report stated that while not much had been accomplished thus far a lot of educative work had been carried on as a basis for good practical work. Only five county associations had been formed, but one of these, in the County of St. John, had engaged a New York nurse and established a free dispensary for the treatment of cases of tuberculosis.

Reference was made to the action of the provincial government in putting on the statute book a bill to render compulsory the notification of all cases of pulmonary tuberculosis, also of the appointment of a tuberculosis commission to report on the establishment of a sanatorium for the treatment of the disease. The work of Rev. T. Hunter Boyd was also touched upon and the need of a tuberculosis exhibit emphasized. The need of municipalities taking care of advanced cases of tuberculosis among the poor was also referred to. A large quantity of literature bearing on the subject has been distributed. Reference was made to the attendance of the president at the annual meeting of the Canadian Association held in Montreal last June and to the fact that the provincial association was now affiliated with the Dominion body.

It was suggested that one Sunday in the province be set aside as tuberculosis Sunday, for the furtherance of the work.

Dr. Alwars, treasurer, presented his report, duly audited by H. B. Robinson. It showed receipts of \$502.51, and disbursements of \$432.43, mostly to Rev. T. Hunter Boyd, for lectures, leaving a balance of \$69.08.

Dr. Smith L. Walker, of Truro, N. S., was the speaker of the evening and delivered a very able address. After quoting statements to show the great economic loss caused by the great white plague, he said:

"The conclusion of expert economists is that any country with a tuberculosis death rate exceeding 140 per 100,000 of population can profitably spend \$10,000 per capita. Thus Nova Scotia would be justified in expending \$250,000 per annum, New Brunswick \$150,000 and P. E. Island \$100,000. The actual cost to the country for maintenance, after the amount required for construction account, which is chargeable to capital, and can be borrowed, would approximate for Nova Scotia \$212,500, for New Brunswick \$127,500, for P. E. Island \$85,000. This amount should be borne proportionately by the provincial, city and civic bodies, aided by a grant from the federal government."

### A GILT EDGE INVESTMENT.

"It would be a gilt edge investment if this amount of money was expended. The money could be raised by federal, provincial, municipal and civic governments. The provincial government need only spent one-third of this \$127,500, and in twenty years the great white plague could be wiped out."

"The nature and extent of this campaign is readily seen to be beyond the capacities of local associations or philanthropic societies. All prominent commissions on this subject have come to this conclusion and it would be folly for the people in these provinces not to profit by the lessons learned in several states, where the burden of the work is now being taken up by the state."

"Let our public men grapple with the problem at once, and in a practical manner. The financial support for this stupendous battle must not be subject to the variations and uncertainty of private gift and organized public subscription. It must have the financial backing and support of the public represented through its legislative and governing bodies."

"The work of fighting tuberculosis in the city of St. John should be borne by the city council and the municipal council. I am glad to say that in Colchester county the municipal council pays all the bills of the association in the county."

"The physical well-being of the people is as important as any other matter that could occupy the attention of the legislative bodies."

Dr. Walker's address was listened to with a great deal of attention, and there was considerable applause at the close.

### PREMIER HAZEN.

Premier Hazen, who was next called on, referred to the good work of the association and of the splendid educative campaign carried on by Rev. T. Hunter Boyd. The question of fighting tuberculosis was one almost entirely of finances, and the finances of the three provinces was not sufficient for the expenditure of such an amount as Dr. Walker suggested. The resources of the province were not large enough to afford such an expenditure even for so worthy a cause.

The sanatorium at Kentville, N. S., had done good work, though it was not as large as could be wished. The institution did much good work in an educational way.

The municipalities of the province were well able to undertake this work. They could bear a proportionate part of the expense. It was more the duty of the federal government to assist by generous contributions to the stamping out of this disease. If the federal parliament would unite with the provincial and municipal governments, this dread disease could be stamped out within twenty years, as Dr. Walker stated.

The premier said he was heartily in favor of one suggestion made by Dr. Smith Walker, namely, the union of the three maritime provinces.

He referred to the appointment by the provincial government of the tuberculosis commission and of their recommendation for the establishment of a sanatorium; also to the offer of Mrs. Jordan to give to the province her handsome cottage at River Glade.

In closing, he again made reference to the good work of the association and of the doctors of the city.

### THE OFFICERS.

The report of the nominating committee was then presented by Dr. McIntosh, as follows:

Hon. president—Lieut.-Gov. L. J. Tweedie.  
President—Dr. Thos. Walker.  
1st vice-president—Dr. J. P. McInerney.  
2nd vice-president—R. B. Emerson.  
Treasurer—Dr. Silas Alward.  
Recording secretary—Dr. W. Warwick.

Corresponding secretary—Rev. T. Hunter Boyd.  
Executive committee—His Lordship Bishop Richardson, His Lordship Bishop Casey, Archbishop Raymond, Rev. D. Lang, Rev. M. E. Fletcher, J. A. Likely, Dr. H. S. Bridges, F. W. Sumner, T. H. Estabrooks, Rev. Dr. C. R. Flanders, Dr. J. R. McIntosh, Mayor J. H. Frink, Geo. S. Fisher, A. O. Skinner and John E. Wilson.

Vice-presidents for the counties: St. John—Dr. J. W. Daniel. Kings—Rev. Canon Neales.

## PLANK FELL ON HIM

Hamilton Man Badly Injured

Reuben Atherton, of 367 Ferguson Ave., Hamilton, an employee of the Otis Elevator Co., sustained serious injury while at work. A plank fell from a height on to his right foot, crushing it badly. He was taken home, where Zam-Buk was applied with good result.

Telling his experience of the balm, he said: "After the doctor had dressed the damaged foot with some preparation of his own own I was in great pain and as day after day I seemed to get no relief I left off the medical treatment and tried Zam-Buk from the very first application I traced an improvement. Zam-Buk really seemed to act like magic, cleaning all the unhealthy matter from the wounds drawing out all discoloration, inflammation and soreness and started healing in quick time. In two weeks the foot and foot were well again. Zam-Buk balm is certainly a wonderful healer, and I would not care to be without a box in the house. You can use the above statement in any papers, books or publications, as it may lead some other sufferer to use Zam-Buk and get relief as I did."

All workers should keep Zam-Buk handy. Applied to a cut or wound it stops the pain, commences healing, and what is equally fine—it prevents all possibility of blood poisoning. Zam-Buk is equally good for skin diseases and cures eczema, itch, ulcers, abscesses, varicose ulcers, scalds, blood-poisoning, etc. It heals cold cracks, chapped hands, frost bites; cures piles and all inflamed condition of the skin and tissue. Fifty cents a box from all druggists and stores, but avoid imitations and substitutes, some of which are highly dangerous and some of which are beneficial.

## SAME DIVIDEND ON CANADIAN PACIFIC

Montreal, Nov. 14.—At a meeting of directors of the Canadian Pacific Railway Company today a dividend of 2 per cent. on common stock for the quarter ended 30th September last being at the rate of 7 per cent. per annum, from revenues and 1 per cent per annum from interest on proceeds of land sales, was declared payable on December 31st next, to shareholders of record at 3 p. m. on Nov. 30th next.

Queens—H. W. Woods, M. P. P. Sunbury—Luther B. Smith. York—Judge Barry. Carleton—Dr. Rankine. Victoria—J. L. White. Madawaska—Fred Dayton. Charlotte—G. W. Ganong. Albert—Hon. A. R. McClellan. Westmorland—G. Willett. Kent—Dr. Landry. Northumberland—R. Maltby. Gloucester—Dr. McNichol. Restigouche—Dr. Lunan. The report was unanimously adopted.

Bishop Richardson suggested to Premier Hazen that the provincial legislature should pass an act to compel the municipalities to pay for tuberculosis cases, the same as for smallpox cases, and the premier, in reply suggested that his lordship and others interested in the movement should educate the people to this view and then press it upon the government, when he had no doubt it would be passed.

Ex-Governor McClellan also spoke briefly. He suggested joint action by the three governments in the Maritime Provinces in building a central sanatorium, perhaps on the cottage plan adopted so successfully in Muskoka.

After a vote of thanks to the board of trade for the use of their room, the meeting adjourned.

If fresh fish is to be kept over night, it should be salted and laid on an earthen dish, not placed on a board or shelf.
