

MOOSE HEAD BRAND

"Skowhegan" Leather Is Used For Our Sporting Boots And Shoe Packs.

This leather is made from South American and Chicago Packer Steer Hides, and anyone in the leather business knows what superior leather can be made from these hides.

Then, these hides are tanned, by a method all our own, under the personal direction of the head of our firm, who is conceded to be one of the foremost experts in the tanning world.

The leather made by this method is known as "Skowhegan" brand, of which we are the sole makers.

"Skowhegan" leather possesses a pliability, toughness and waterproofness that greatly astounds those who have never before worn Palmer's "Moose Head Brand" Sporting Boots and Shoe Packs. It pays big to look for the "Moose Head Brand" and get boots made from this superior leather.

The boot illustrated, No. 405, is one of the many popular lines we manufacture.

Ask your dealer for Palmer's "Moose Head Brand." If he cannot supply you, write us, giving dealer's name.

"Skowhegan" Waterproof Paste should be used by all who want dry feet. The greatest waterproof paste made.

Could Not Walk Ten Yard Without Resting

WEAK HEART WAS THE CAUSE

Mrs. Robison Collette, Rogersville, N. B., writes: "I am now enjoying the best of health after having used your Milburn's Heart and Nerve Pills. I was troubled with a weak heart and was afraid to draw a long breath for the pain it would cause me. I could not sleep at night, and it was impossible for me to walk ten yards without resting myself. I cannot speak too highly of your Heart and Nerve Pills, for they are the greatest pill I have ever used and I can recommend them to all sufferers."

Thousands of people go about their daily work on the verge of death and yet do not know it. Little attention is paid to the slight weakness of the heart for the simple reason that one thinks it will right itself, but there is where the mistake is made. It is only when a violent shock comes that the weakness of the heart becomes apparent.

On the first sign of any weakness of the heart or nerves, flagging energy or physical breakdown, the use of Milburn's Heart and Nerve Pills will soon produce a quick and permanent cure.

Price 50 cents per box or 3 for \$1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

RUMOR ABOUT BOURASSA CAUSES ALARM

(Montreal Herald.)

There was an active rumor about town this morning that Mr. Henri Bourassa, proprietor and chief editor of Le Devoir, who, his friends declare, carried out his intention of sailing for France from New York, on Nov. 21, instead of being in Europe, is now in a sanitarium near the city suffering from a complete nervous breakdown.

The story was heard with deep regret by some of Mr. Bourassa's friends in the city, and a number of telephone messages to the sanitarium asked anxiously concerning the truth of the story.

One of these calls elicited the information from a doctor that "Mr. Bourassa's condition was unchanged."

"How is Mr. Bourassa today?" was asked. "His condition is unchanged," was the answer. "He is neither better nor worse than when he came here," the doctor replied.

That the doctor must have referred to some other Mr. Bourassa appears likely, as the story was most emphatically denied this morning by Mr. Heuneux of Le Devoir.

"Why, Mr. Bourassa is in Europe now, and I expect to receive a cable from him tomorrow. There is absolutely no truth in the story."

"When he left the city he was actually better than he has been for five or six years," continued Mr. Heuneux.

"When did he leave?" Mr. Heuneux was asked.

"On the evening of the 21st," was the reply. "Several members of the staff and some friends saw him off at the Bonaventure station. He left by the Delaware and Hudson for New York, to meet the Rotterdam of the Holland American line there. He intends to visit France and Italy, and, as a matter of fact, I expect a cable from him tomorrow or the next day from Boulogne."

"How do you account for the report having been started?"

"Well, Mr. Bourassa is a very much discussed man and his sudden disappearance may have been the cause. It had been decided that he should take a vacation some ten or fifteen days previously, but we did not consider it necessary to say anything until the day he left. If there was anything in the report we should of course, be very much disturbed, but since he is really in better health than ever before it does not affect us."

An inquiry at the office of W. H. Henry, local agent for the Holland American line, elicited the information that Mr. Bourassa had sailed on the Rotterdam.

For the automobile and touring coat, ratine, polo cloth, reversible Scotch wools, and the new fur cloths are offered in great variety. They are all made on the long, loose lines many with raglan sleeves and broad belts of the material.

Probably the so-called Russian muff and neckpiece is the brilliant novelty of the season. The former could serve as a lap robe on bitter days. It is so huge that it covers the entire front of the skirt, and not only keeps the hands warm, but most of the arm.

Lovely black evening wraps are often embellished with hand embroidery in colors. This shows frequently on the deep collars and great revers that are modish this year.

MILLIONS OF DOLLARS LOST BY RAVAGES OF MOTHS

Dr. Hewitt, Dominion Entomologist, Describes the Best Means of Combatting the Pests, and Tells what the Governments are Doing.

(Halifax Echo.)

"The statement in a local paper recently that the Government of Nova Scotia was doing nothing to combat the Brown Tail Moth is entirely without foundation. The Government is doing everything in its power, and Prof. Cumming and his staff have done most excellent work throughout the Province in this connection," said Dr. C. Gordon Hewitt, Dominion Entomologist, in the course of his address before the Civic Improvement League at the School for the Blind last evening.

RAVAGES OF MOTHS.

The ravages of the Brown Tail Moth in the Annapolis Valley, the rapid spread of the Tussock Moth throughout this part of the Province and the rapidity with which the Gypsy Moth is coming this way has caused the Civic Improvement League to start a campaign of education in Halifax with the view of bringing to the attention of the public the necessity of immediately taking some steps to combat these pests before they gain too firm a foothold.

Dr. Hewitt in his lecture last night dealt with all three of these pests, their life cycle and the best means of combating them, as well as what both the Dominion and Local Governments were doing in the matter. A number of illustrations were shown of various moths in different stages. Not only was the address an instructive one, but it was also intensely interesting and the several hundred people present showed their appreciation by extending to Dr. Hewitt a hearty vote of thanks, which was moved by Principal Fearon and Dr. A. H. Mackay.

TO COMBAT PEST.

Hon. Mr. Faulkner, in introducing Dr. Hewitt, said that it was difficult for a city audience to appreciate the amount of money involved in a danger that destroys the orchards of a country. It was not so hard for them to see what it would mean when the same danger would destroy the shade trees of a city, for all could realize what it would mean to have a city without trees. The loss caused by the destruction of the orchards of Nova Scotia would be incalculable and would affect all the Province. It was a great pleasure to him to be able to introduce Dr. Hewitt and he felt sure that his address would be appreciated.

DAMAGE IS GREAT.

Dr. Hewitt was well received on rising and expressed great pleasure at being able to speak on this subject in Halifax. The old idea of an entomologist, he said, was disappearing since the welfare of man had been committed to that profession. The damage caused by various insects in different countries was great. Around the equator there were millions of deaths caused by malaria, brought about by the mosquito; the population of Central Africa had been greatly reduced; and in other parts of the world typhoid had made great ravages through the house fly.

LOSS OF CROPS.

In the United States the annual loss of crops caused by various insects was estimated to be twenty per cent. In Canada the loss of crops each year through the same causes would be ten per cent. of the total value, which would be about fifty million dollars. This would be to the crops alone, the loss to the forests would be quite another item. In Eastern Canada all the larches had been destroyed by such pests, and now there was another sweeping over the Province of Quebec like a wave of fire. Such facts as these tend to make the people more alive to the dangers of such pests.

THE FRUIT PEST.

In Nova Scotia the most dangerous fruit pest was the Brown Tail Moth. In the city the danger was to the shade trees by the Tussock Moth and with such beautiful trees as there are in Halifax, it is a pity to see them destroyed. The Gypsy Moth had not as yet reached Nova Scotia, but was rapidly coming this way. He proposed to deal with the subject in two sections: One, from the point of view of natural history; Two, what the Dominion government has been and intends doing; what the provincial government has been and intends doing; and what the city should do to combat these pests.

THE TUSOCK MOTH.

Dr. Hewitt first dealt with the Tussock Moth, and showed a number of the insects in its various stages of

life. Only the male moths have wings, the female being unable to fly, which made it less difficult to combat them. When the female moth leaves the cocoon, she deposits her eggs just outside and then dies. The eggs remain in the same state all through the winter until the end of June, when they are hatched, and the life cycle is gone over again, from egg, caterpillar, pupa and moth. The Tussock Moth has quite a number of parasites, that are not injurious to the trees and shrubs. Since coming to Halifax he had found many eggs of the Tussock Moth that had been affected by parasites. The parasite, however, was not a sure way to combat the pests, as in the case of the larches the parasite did not arrive until too late to do any good. The ordinary methods, also, are often quite inadequate to cope with the pests and the course now being taken is to study nature, and to copy as near as possible.

BURN THE EGGS.

In combating the moths, the best time is when they are in the egg state. Then collect the eggs and burn them or to paint the egg masses with creosote, one touch of which is sufficient to destroy the eggs. Then paint around the trunk of the tree, about four feet from the ground a band of tanglefoot about four inches wide. As the female moth cannot fly and the only way she can get into the tree is by climbing, this will prevent that. Then in the summer sprinkle the trees with poison. The tanglefoot should be placed on the trees before the end of May.

THE BROWN TAIL MOTH.

The Tussock Moth was much easier to combat than the Brown Tail, which was an European pest, that got into Massachusetts from France in 1890. To prevent any other of these pests coming into Canada from Europe, the government had given the department power to inspect all nursery stock coming into Canada from foreign countries and now all stock is inspected before it is delivered. Last year the inspector found 313 nests of Brown Tail Moths in apple stock imported from France. The Dominion government was doing all in its power to prevent the spread of these pests. All the Brown Tail Moths are able to fly and are coming into Canada from the United States in that manner. It is thought that these moths came to Nova Scotia on boats running between this Province and the New England States.

The Brown Tail Moth not only destroys the trees, but also renders some places uninhabitable. The caterpillar is covered with a quantity of little hairs that get into the skin and blood of people and cause what is known as the "Brown Tail rash." This rash is a serious one and a person affected is often confined to bed for several days, and sometimes results in death. From this cause many places in Maine are every year losing large sums of money by people refusing to go to places where the Brown Tail Moth is.

THE GYPSY MOTH.

The Gypsy Moth has not, as yet, reached Canada, but is now within seventy-five miles of the border. The Gypsy Moth is much easier to combat than the Brown Tail and its life cycle is like the Tussock. It feeds on all vegetable matter, even eating grass after it has stripped the trees. The female cannot fly, but will lay its eggs in almost any place. There are no parasites from this pest in this country and large sums of money are being spent to import them.

All stock imported from France now bears a certificate that it had all been inspected before being packed, but it is also inspected when it arrives here. The same applies to stock imported from the United States and is not unpacked unless there is an inspector present. This winter the Dominion government will send special inspectors through the Annapolis Valley to work in conjunction with the provincial government. A few years ago the Brown Tail Moth could be found from Yarmouth to Kentville, but now, due to the work of Prof. Cumming and his staff, none could be found west of Digby. If necessary, pressure should be brought to bear to have an appropriation made to carry on the work and all precautions should be taken to protect the trees.

The empire effect girdles, which were so generally adopted in nearly all sections of this country about two years ago, will again come into prominence again this winter.

CURES
DIARRHOEA, DYSENTERY, COLIC, CRAMPS, CHOLERA MORBUS, CHOLERA INFANTUM, SEASICKNESS, SUMMER COMPLAINT, and all LOOSENESS or FLUXES of the BOWELS

Mrs. HOLLIDAY, Box No. 86 Wroster, Ont., writes:—"I must say that we have used Dr. Fowler's Extract of Wild Strawberry for over seventeen years, and have found nothing to equal it for all Summer Complaints, Diarrhoea, Dysentery, etc. Our house is never without a bottle of the Extract and I can recommend it to be kept in every home, especially where there are children."

NOTICE—We wish to warn the public against being imposed on by unscrupulous dealers who substitute the so-called "Strawberry Compounds" for Dr. Fowler's.

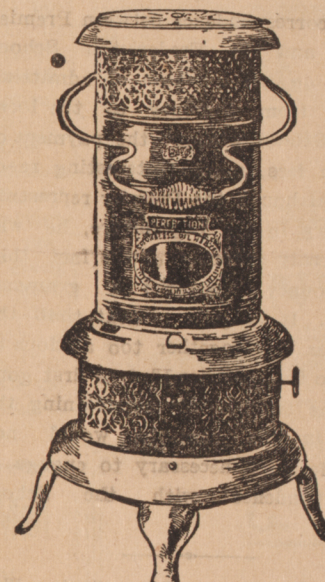

If you want to be on the safe side ask for Dr. FOWLER'S EXTRACT OF WILD STRAWBERRY, and insist on getting what you ask for.

The original is manufactured only by The T. Milburn Co., Limited, Toronto, Ont. Price 35 cents.

Mrs. HARRY GILLILAND, Cardinal, Ont., writes:—"Our baby, who was so very bad with Diarrhoea that it seemed her bowels were fairly raw. We tried everything we thought would help her but failed. A neighbor advised trying Dr. FOWLER'S EXTRACT OF WILD STRAWBERRY. We tried it and before the end of a week our baby was as well as ever. We always keep Dr. Fowler's in our home."

People Who Work Indoors With Their Hands

Seamstresses, watch-makers, artists, draughtsmen, and many others, cannot properly handle their tools with cold, stiff hands. Many a lost hour or two on cold winter mornings results from the delayed heat of furnace or stove.

The Perfection Oil Heater in a few minutes gives the temperature that assures the worker warm hands and pliable muscles. The

PERFECTION
SMOKELESS
OIL HEATER
Absolutely smokeless and odorless

quickly gives heat, and with one filling of the font burns steadily for nine hours, without smoke or smell. Has automatic-locking flame spreader which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so the wick can be quickly cleaned.

It has a damper top and a cool handle. Indicator always shows the amount of oil in the font. The filler-cap does not need to be screwed down; it is put in like a cork in a bottle, and is attached to the font by a chain, and cannot get lost.

The burner body or gallery cannot become wedged, because of a new device in construction, and consequently, it can always be easily unscrewed in an instant for reworking. The Perfection is finished in japan or nickel, is strong, durable, well-made, built for service, and yet light and ornamental.

Dealers Everywhere. If not at yours, write for descriptive circular to the nearest agency of the

The Imperial Oil Company, Limited.

MISS MORGAN'S
YORK STREET

RADIANT HAIR

New York Society Women's Hair Matched
Only by Parisians

While much attention is given to choicest gowns by New York society women, the turbulent fad just now is the care of the hair.

For many years the clever women of Paris have been famed for the magnificent beauty of their hair.

"Glorious hair," a Virginian calls it; "so radiant and luxuriant that it not only attracts but fascinates and compels unstinted admiration."

But now that the elite of New York, ever anxious to improve their beauty, have learned that Parisian Sage, a remarkable and almost marvelous hair nourisher and beautifier, is almost entirely responsible for the charming hair of the ladies of France, the demand for it has become enormous.

Parisian Sage is now sold all over Canada and in Fredericton by A. J. Ryan, who is glad to guarantee it to eradicate dandruff, stop falling hair and itching scalp in two weeks or money back. Large bottle 50 cents.

A CONSERVATIVE LEADER

(Continued from page five)

the equal assurance of a year ago that a direct contribution to the British Admiralty was the immediate and universal desire of Canadians? What has become of the German menace and the imminent and terrible "Armageddon," that Mr. Borden should say, "let us hasten slowly; let us find out exactly what is needed and then ask the people if they will supply that need or not?" Why all this sound and fury about the necessity for haste in the beginning, and the need of caution, information and delay at the present time? This proves that he was either lamentably

short-sighted and panicky at first, or that he has been playing "a cheap and nasty" part all along. Is a man so lacking in foresight and so shifty in policy the sort of man whom Canadians would wish to see at the head of affairs in this nation?

Mr. Borden, in all his charges, has never been able to show any satisfactory reason for his right-about-turns, but has shifted and wobbled according to the direction of the wind or in accordance with the command of his ring masters in Toronto or Winnipeg. And now a breeze blows from Quebec and once again the flag-waving and self-boasted Imperialist trim his sails to the treasonable zephyr blowing from Arthabaska and forget in a moment the declaration of a life time. He is fast drifting on to shipwreck, for the vast majority of this people, whether of French or British origin, are unwavering in their loyalty to Canada and to the Royal Crown and will back up any government which does its duty there to. If the empire is attacked we must and will do our part both with money, with men, and with ships. The government has taken this stand and will maintain it to the end, no matter what Mr. Borden may do in his wild efforts to gain power.
