Give your servants **GOLD DUST** to clean with, treat them rightly and you will have few occasions to insert a "help wanted" ad

They say a good workman is known by his tools. You cannot expect your maid to keep everything ship-shape unless you give her every modern help. To keep house without **GOLD DUST** is to do work by hard, old-fashioned methods. For cleaning everything and anything about the house—from cellar to attic—**GOLD DUST** is worth its weight in gold. It cuts grease and dirt like magic, does away with scouring and scrubbing, and saves time and tempers.

Your servant can do more and better work and keep sweet with the aid of **GOLD DUST** in all household cleaning.

Makers of FAIRY SOAP, the oval cake.

## COME AND SEE OUR GORGEOUS ARRAY OF RICH CUT GLASS FOR WEDDING GIFTS

Our Cut Glass is the product of the Best Canadian Factories. The glass is clear the cutting is sharp and deep and the designs are new and beautiful.

Our \$23.00 Water Set, consisting of a Water Pitcher and a half dozen Tumblers, of the latest pattern, would make a handsome, as well as a very acceptable gift.

418 Queen Street. **F. E. BLACKMER** Opp. Normal School  
A Good Place to Trade.

Texas experts say that state will have a wheat crop of 25,000,000 bushels this year, which is above the average. Nebraska expects a yield of 35,500,000 bushels, an increase of 10,000,000 over the total estimated by the Government in May. Kansas asserts that she will produce 70,000,000 bushels.

James T. Mavor of the "Maritime Farmer" is spending a few days at his home in the city.

One tablespoonful of ammonia to a quart of water will clean gold or silver jewellery.

Nearly all your acquaintances are your friends until you are in a position to use them.

If a man happens to have more "cold cash" than he knows what to do with, he is said to have "money to burn."

## GLOUCESTER IS RICH IN IRON DEPOSITS

Attracting Attention of Prospectors From All Parts of America--Coal Deposits Found at Different Points.

Newcastle, June 30.—Mr. Michael McDade, writing from Bathurst to The North Shore Leader of the Drummond Mines, says:—

The North Shore of New Brunswick has long been known because of its fishery, game and forest wealth. It is rapidly coming to the iron as a centre of mineral development.

As already stated, the discovery of the Drummond mine aroused active interest in searching for other iron mines in Gloucester and it is safe to say that hundreds of licenses have been applied for the scores of them granted. Between now and fall few parts of this county will have escaped examination by geologists, mining engineers or other exploring parties. In the words of a prospector "the woods are full of people searching for iron or coal or both and every hand there is a feeling that some lucky strikes will be made."

As a matter of fact in addition to the Drummond mine, iron deposits are known to have been found on Mill Stream River in the Parish of Beresford; on the Nigadoo River, at Dunlop, in the same parish, some eight miles from Bathurst town; and on the Tetagouche River at a point some 26 miles from Bathurst.

At the present moment an option is held on the Dunlop property by an American firm, Longyear and Hartley who have had a mining expert, Hugh Roberts on the prospect for several months. Mr. Roberts is not telling the general public much of his business but he and his assistant, Mr. Morse have been working over time lately and they have been joined by another mining engineer Julius Segall and this is interpreted as meaning that their principals are more than pleased with the outlook.

Mr. Hartley is said to be a Carleton county man who went to the American west many years ago and made a fortune there. The working outfit of the engineers includes a diamond drill.

Most of the deposits so far discovered are magnetic. That found on the Tetagouche, however, is hematite. Tests made of the quality give indications of great value. As to quantity, persons who are supposed to be judges have no hesitation in stating that it is far in excess of Drummond Mine, which has, it is estimated, over thirty million tons of iron ore in sight. Little or nothing has been so far done on the Tetagouche property but an option is pending which it is believed will result in the introduction of many thousands of foreign capital. License to work is held by John and George Robertson and John O'Neill.

The Dunlop property is held by William Rogers, George Gilbert and others. The Mill Stream property is owned by R. A. Lawlor and others and by the estate of Robert and John Ellis. An option on this is held by T. M. Burns, F. M. Tweedie, James Robinson and others, a considerable development has been done.

### DISPUTES ABOUT BOUNDARIES.

Adjoining the property first referred to George Robertson owns a mining right and a dispute has arisen as to the boundaries of these two properties. Unless an amicable arrangement can be arrived at, Surveyor Grimmer will have his hands full in deciding between the rival claimants.

Iron deposits have also been discovered in the Parish of Caraquet, 40 miles from here along the Caraquet Railway. Some development has taken place and while the quality is excellent it has been impossible to ascertain any fixed idea of quantity.

The official in the judges' stand were:

A. H. Merrill, Danvers, Mass., starter and judge.  
G. W. Gerow, Fort Fairfield, judge.  
C. W. Bell, Woodstock, judge.  
L. R. Sealey, Fort Fairfield, judge.  
J. A. Edwards, clerk of course.  
T. H. Colter, timer.  
Hugh Calder, timer.

No country can get rich that exports its raw material and that is as true of iron ore as of lumber. But, in the absence of the discovery of valuable coal deposits within easy access of the iron mines there must be shipments of the raw material.

### SEARCHING FOR COAL

To find coal with which to supply smelters in this county, is the ambition of hundreds of persons who are searching in every point of the compass. Many of them have entered upon the work with much confidence, and more than a few consider that they have found the real thing.

Coal deposits have been found at different points along the Caraquet and Gulf Shore Railways; at Clifton, at Caraquet and at Isidore, eight miles west of Tracadie. The Gulf Shore Railway tops the Caraquet road, eight miles west of Shippeagan and continues on the Tracadie. Coal licenses are held in Clifton by W. R. Knowles and Samuel Miller, at Low er Caraquet by R. Carr Harris, and George Robertson, Messrs. Van Buskirk Wilzell, Young and others. All the deposits are of soft coal. The local government put a Calix drill into this territory in the winter of 1908. After boring to a depth of 350 feet no coal was found. The following year Messrs. Robertson moved the drill in the direction indicated by the outcroppings. At 33 feet they got two and a half feet of coal and 497 feet they were more fortunate—discovering four and a half feet of coal. Last winter the Robertsons made another test by tunneling into the bank where it had shown six inches of coal and shale. At eighty feet back they found 14 inches of coal, the quality of which is excellent.

### WILL INTEREST CAPITAL IN GERMAN

The St. Isidore properties are all under option to Albert Stewart who has formed a strong syndicate in Montreal. An engineer has been sent to Germany and it is intended to interest German capitalists in the coal prospect here.

There are coal indications also at Pokemouche, between Caraquet and St. Isidore. Licenses to search is held by Montreal parties. There are like indications on the island of Shippeagan and licenses have been taken out by Messrs. Harris, George Windsor and others.

There are large deposits of bog manzanese known to exist in the parishes of New Brandon, Inkerman and Samurez. No one, however seem to realize their value and so far as known no licenses to search have been applied for. Galena silver an upper deposits have been discovered in the Elm Tree and Nigadoo districts in the parish of Beresford. Licenses to search are held by W. S. Montgomery of Dalhousie and Warren Taylor of Salisbury in Westmorland County.

Manganese ore is also known to exist on the Tetagouche and Nepisquit River below the Grand Fall. No licenses have yet been taken out. Fully discounting the wild dreams of many persons, there can be no question that Gloucester county is rich—very rich—in iron deposits; and it would not be surprising if the present year resulted in many "lucky strikes." There is a feeling of confidence here in the future of the province never before equalled and this section of New Brunswick is rapidly attracting the attention of prospectors from all parts of America.

The mines of Gloucester are likely to advertise New Brunswick at no distant day as much as will the gas and oil wells of Albert and Westmorland Counties.

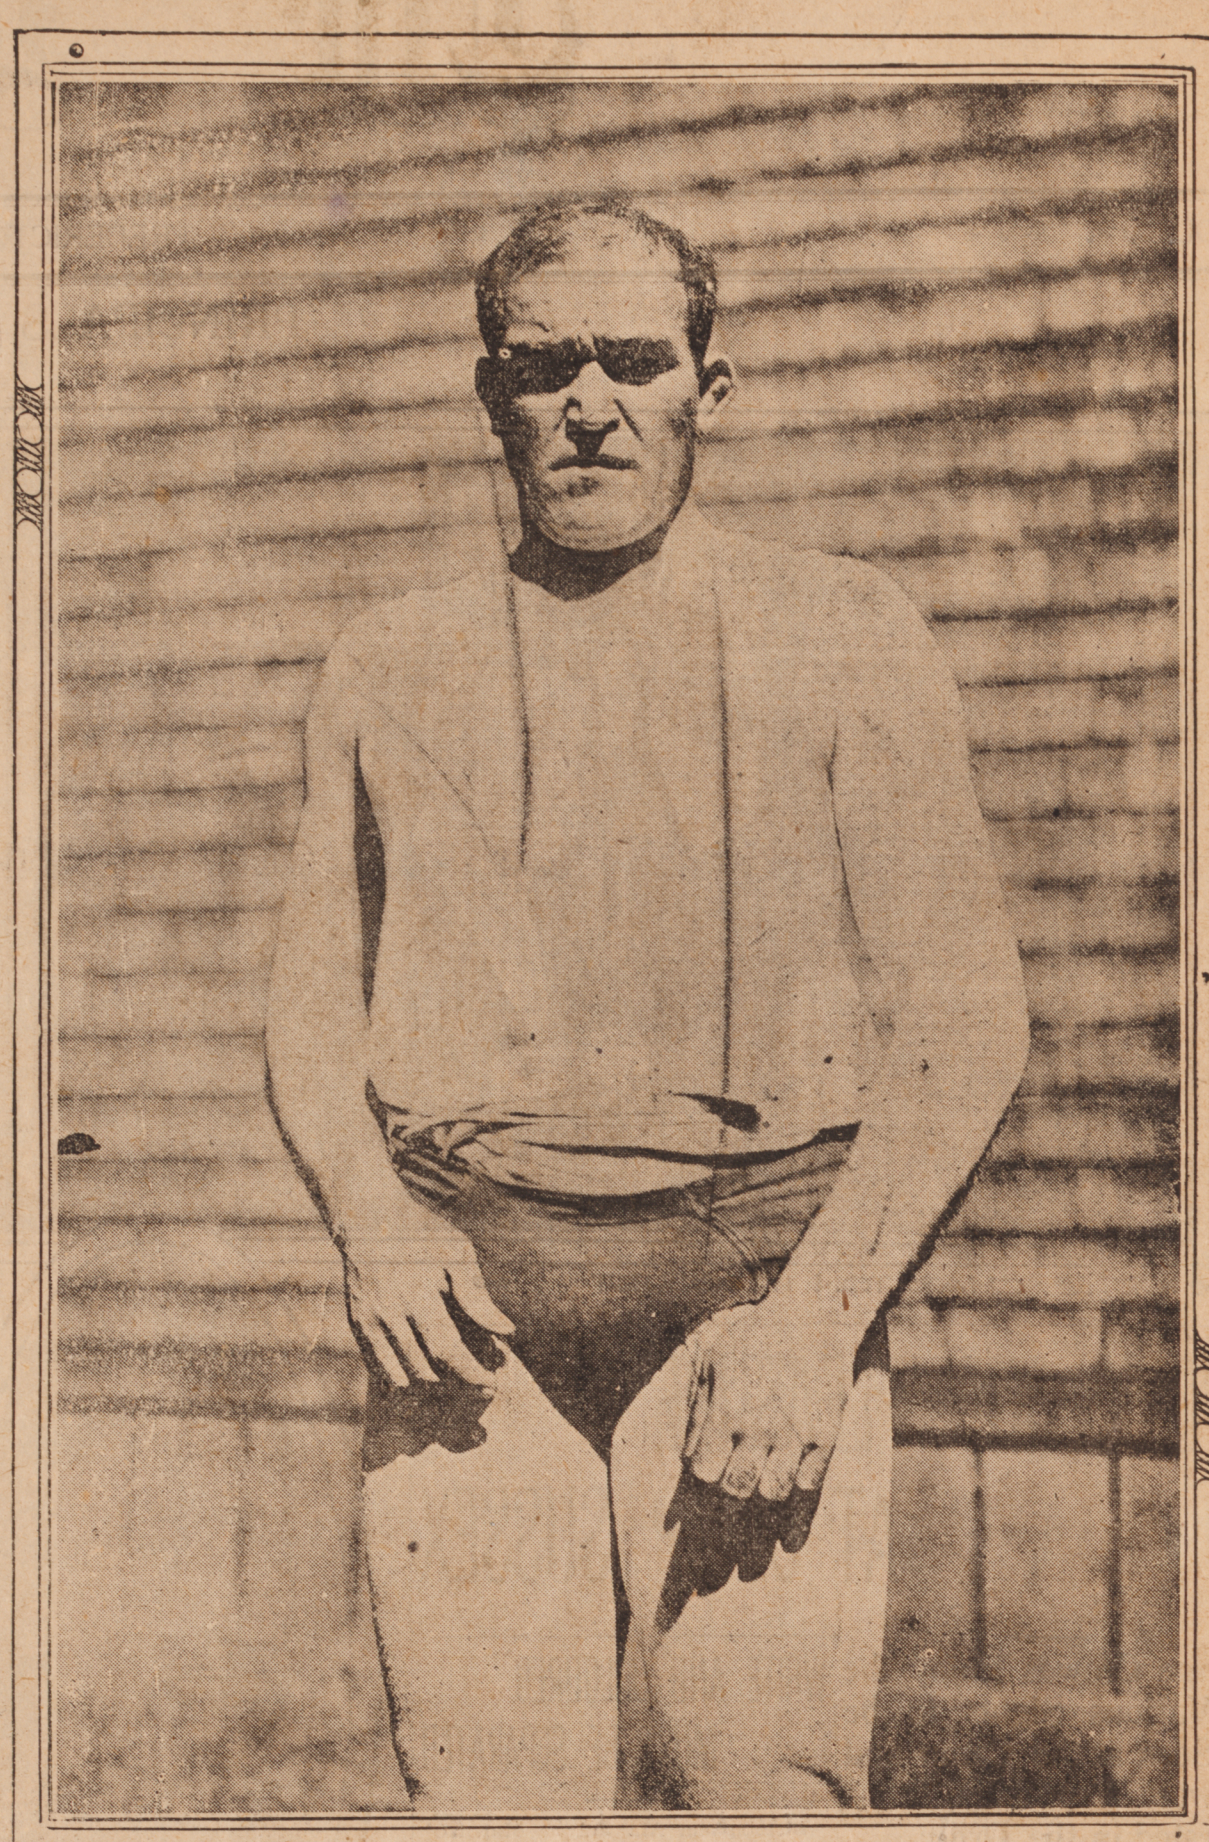

### DICK MALLOY THE STAR

The Clippers defeated the Tannery nine yesterday morning at Scully's Grove in a fast and exciting game.

Dick Malloy's pitching was too much for the Tannery nine. He had fifteen strike-outs to his credit and never passed a man to base. Osborne Bailey batted in great style, driving in two of the Clippers' runs. Jack Feeney's playing at first base was a big surprise to the fans and his hits were timely and well placed. For the Clippers the batting of Hudson showed that he was some ball player. W. Hughes accepted two chances which look good for sure hits.

Harry Blair and Geo. McCorquindale umpired the game, and some of McCorquindale's decisions were very bad.

The score by innings:  
Tannery..... 123456789  
Clippers..... 000100020—3  
.....20010001x—4

Cleveland, 5; St. Louis, 0.

### FRIDAY'S GAMES.

### NATIONAL LEAGUE.

Boston, July 1.—Philadelphia won a double header from Boston today, the first game by a score of 6 to 2 and the second 6 to 5. Errors lally the first contest. A batting rally by the visitors in the 9th inning of the second game enabled them to win after being four runs behind.

First game:  
Philadelphia ..... 300001011—6 4 3  
Boston ..... 001001000—2 6 6  
Batteries—Moren and Dooin; Brown Goode and Graham, Rainden.  
Time, 1.56. Umpires, O'Day and Remsen.  
Second game:  
Philadelphia ..... 000100005—6 9 1  
Boston ..... 001001000—5 9 0  
Batteries—Ewing, McQuillan, Maroney, Shettle and Dooin, Moran; Frock, Mattern and Graham.  
Time, 2.15. Umpires, Brennan and O'Day.  
At Pittsburg:  
Cincinnati ..... 220000000—4 5 0  
Pittsburg ..... 001000000—1 8 4  
Batteries—Suggs and McLean; Camnitz, Maddox and Gibson.  
Time, 1.30. Umpires, Klem and Kane.

At St. Louis:  
St. Louis ..... 000000000—0 4 0  
Chicago ..... 010000001—2 5 0  
Batteries—Harmon and Bresnahan; Brown and Archer, Kling.

Time, 1.50. Umpires, Rizler and Emshie.  
At New York:  
Brooklyn ..... 030000010—4 10 1  
New York ..... 000201002—5 6 1  
Batteries—Ecanlon and Bergen; Wiltz and Meyers.

Time, 1.50. Umpires, Johnstone and Moran.

### AMERICAN LEAGUE

Washington, July 1.—Washington defeated Boston today. Johnson being ineffective. Third Baseman Lord suffered a broken finger when struck by one of Johnson's inshoots. Pitcher Oberlin was given his release today by the Washington club. Score:

Washington ..... 00010001x2 8 2  
Boston ..... 100000000—1 8 2  
Batteries—Johnson and Street; Smith, Arelanes and Klienow. Time—1.40. Umpires—Kerin and Perrin.

At Philadelphia, first game:  
New York ..... 000000000—0 7 7  
Philadelphia ..... 00100001x—2 6 4  
Batteries—Ford and Sweeney; Coombs and Lapp. Time—2.05. Umpire—O'Loughlin.

Second game:

New York ..... 02000100—3 10 1  
Philadelphia ..... 30000100x—4 8 1  
Batteries—Quinn, Manning and Mitchell; Plant, Bender and Donohue. Time—1.00. Umpire—O'Loughlin.

At Chicago:  
Chicago ..... 000000000—0 5 1  
St. Louis ..... 020000000—2 7 2  
Batteries—Walsh and Sullivan; Pelly and Killifer. Time—1.55. Umpires—Connolly and Dineen.

At Cleveland:  
Cleveland ..... 11301002x—8 5 5  
Detroit ..... 010000101—3 9 1  
Batteries—Falkenberg and Easterly; Willett, Stroud and Stange. Time—1.49. Umpire—Evans.

### EASTERN LEAGUE

At Montreal--Buffalo 5; Montreal, 2.

### ONTARIO' SBIG

### MINERAL OUTPUT

Toronto, June 20.—Returns to the Bureau of Mines show the output of Ontario for the three months ending March 31, 1910, as follows:

Silver, 6,399,927 ozs., value \$3,041, 156  
Cobalt, 78 tons, value..... 14,485  
Copper, 2,491 tons, value..... 357,074  
Nickel, 5,250 tons, value..... 8,131,024  
Iron ore, 6,735 tons, value..... 15,034  
Pig iron, 109,718 tons, value 1,750,396  
Total value .....\$6,309,171

## GERMAN WEATHER MOST AVERAGE

Berlin, June 23.—The weather in Germany has been abnormal and in nothing more extraordinary than in respect to the damage done by lightning. Weather experts have noticed a change in German weather conditions generally in the last decade, the early Springs and fine Summers of the period before the opening of the new century have been succeeded by longer Winters, belated Springs and anything but Summerlike Summers. Happily as a rule the Autumnal weather has made up for the shortcomings of the other seasons.

This year's Spring began late and then became the sultriest on record for years. Hardly a day has passed since the end of May without its thunderstorm. A series of mishaps began at Cologne where the lightning struck a factory and seriously injured 20 persons besides doing material damage.

The same day in Saxony a company of soldiers were struck and 18 men were laid low three being killed. In the following three days in the Rhineland alone 20 persons lost their lives from the same cause, while 12 deaths by lightning were announced from Thuringia.

In Luxemburg three children were killed while on their way to school and this by no means exhausts the list of child victims. The case of the six persons killed in the Jungfernhede forest district, just outside Berlin with an accompanying total of 80 persons injured is still fresh in recollection.

### BUSY BOXERS.

Terry Martin and Maurice Lemoine have been matched to box in Southbridge next Thursday night.

Billy Melloy and his trainer Eddie McManus, leave this morning for Houlton, Me, where Melloy boxes July 4.

Joe Grim, the Philadelphia middleweight who did not believe there was a boxer who could knock him out, found one in Sam McVey in Paris last Saturday night. McVey put him down three and four times in every round and finally in the 12th round put Grim away. Grim must be pretty well used up this time from the "whalings" he has received in America and Australia.

Fat O'Keefe, the middleweight who fought Harry Lewis in Chelsea and later went to Australia with Tommy Burns, has returned to his home in England.
