## SURVEYOR GENERAL GRIMMER TALKS ON RESOURCES OF N. B.

We are indebted to "Canada" for its issue of Oct 22nd containing an interview with the Hon. W. C. H. Grimmer, Surveyor-General while in London, which we reproduce in this issue with great pleasure. While we may not agree with Mr. Grimmer politically we are glad to see him making known the vast resources of the province to the people of the old land, and have no doubt that his desire is to further her interests.

Whether he and his government is using the best method to that end is open to question.

The Hon. W. C. H. Grimmer, who is at present in London, has, as Surveyor-General in the New Brunswick Cabinet, the oversight of the Crown Lands, mining, fish, and game department of the province, and has a thorough knowledge of its resources. His visit is largely concerned with the development of the offices of the province at Dudley House, Southampton Street. As a result of what he has already seen, Mr. Grimmer expressed himself to a representative of Canada as very pleased with the work that is being done by Mr. A. Bowdler, the representative of the province in the United Kingdom.

## A GOOD CLASS OF SETTLERS.

"I am satisfied," he remarked, "that we have the right man in the right place. Mr. Bowdler has an intimate knowledge of the requirements of our country, as well as of the people suitable for the purposes for which they are required in New Brunswick. He is securing a class of settlers who will take up land and become permanent, which is the only class of any value to us, apart from domestic servants."

"We have plenty of good arable land in New Brunswick suitable for mixed farming and fruit-growing," proceeded Mr. Grimmer. "All we want is people to come in and farm. The government is giving earnest assistance all along the lines to the agriculturist. We are sending out men specially educated for the purpose of instructing the farmer in the very latest and most approved methods of scientific farming; we employ horticulturists, who devote their whole time to the work of fruit-growing, etc., we assist butter factories. We give grants to agricultural societies and assist agricultural exhibitions, over 100 of which were organized last year alone as the direct result of the Agricultural Department's efforts. Great assistance is also being given to the potato-grower in finding a market for his potatoes. During the past winter, under arrangements made by the government, 250,000, duction of potatoes for supplying the from New Brunswick to the Cuban market. We have indeed, furnished to the potato grower an annual outlet for all the potatoes he can produce, since we are also encouraging the production of potatoes for supplying the Western market, sending them to Toronto in large quantities. We are able to grow vegetables of all kinds in New Brunswick."

## COMING TO THE FRONT

"All these things are bringing the province to the forefront from an agricultural standpoint, and giving the people of New Brunswick themselves a better knowledge of the productive-ness of the soil than they had in the past. During the past century lumber has absorbed the attention of the great majority of them. The vast forests were easily accessible, and from them the farmer and the operator could see a quick cash return. In point of fact, however, the man who has devoted himself to agriculture in the province and left lumbering alone, attending strictly to his farm, is in most cases independently well off, with a substantial bank account. On the other hand, the lumbering industry did not work well in the majority of cases, because the farmer was not suited to it, and oftener went to the wall than made a success of it."

"The West is not the place for the man who knows nothing about mixed farming. Fortunes will be made in the West in the next ten or twelve years—perhaps more; but as soon as the soil becomes exhausted the newcomer will have to make a tremendous effort to make things go. The western soil is not suited like that of New Brunswick, or the Maritime Provinces generally, for mixed farming. A man can buy, in New Brunswick today, a farm to suit whatever capital he has, and get what he pays for. There has been trouble in the past through people carrying on the sale of farms as a private speculation. That is all remedied now by the purchase being made through the government. That is, indeed, why we have established our agency in London. Prospective purchasers receive all further information on the other side, where we have an official thoroughly acquainted with farm values, who hands them a list of farm properties with prices attached, and if desired, goes with them to the farms. There is an excellent water supply in every part of New Brunswick; while, owing to the railroads running in every direction, and the excellent steamboat services on the rivers, there is every facility for sending the province to

market without having to haul it a great distance.

"So far as the Crown lands of the province are concerned," continued Mr. Grimmer, "there has been a marked advance as the result of the present government's administration. In the last year of the old administration the total territorial revenue was \$320,000; this year the revenue will be \$500,000, or an increase of \$180,000 in two and a half years, on that one service alone. This has been accomplished without a heavier cutting of the forests than took place previously, and also under strict regulation in respect to the prevention of the cutting of undersized timber and the protection of the forests from fire. We look for a still greater increase in the next few years, at the same time keeping within the annual growth of the forests and so preventing the depletion of the province's forest wealth."

## MINING DEVELOPMENTS

"Mining is beginning to look up considerably in the province. We have now developed and in operation, a very large iron industry, which is being carried on by the Canada Iron Corporation, a company with a capital of \$10,000,000. They have acquired a property in the County of Gloucester, in the northern part of the province, which is estimated to contain at least 30,000,000 tons of iron, reported available, 10,000,000 of which is in one mountain, not requiring any sinking of shafts, but being simply broken down from the hill and tipped from the crushing machine into the cars to be taken to the docks. The company have built a railway 19 miles long from the mine to the Intercolonial Railway, which is equipped with 80 pound rails, the heaviest in Canada today. They have built their own cars, and have constructed docks and termini at Newcastle, in the County of Northumberland, at a cost of upwards of \$125,000. They are able by the machinery they have there, to load a 5,000 ton ship in less than three hours. The first shipment of ore left the docks on Oct. 7, and they expect to be able to ship about 4,000 to 5,000 tons a day during the shipping season, which will cover about 200 days, the Miramichi river being frozen up during a portion of the winter. It is a very large industry and will yield a large amount of income to the province in the shape of royalty."

"In the County of Albert, natural gas and oil have been found—gas in very large quantities and oil in fairly large quantities, but not sufficient-large at present for mining purposes, though there is every indication of its presence in plenty. About eight boreholes have been sunk for gas, and some of these are producing as much as 5,000,000 feet of gas per day, the smallest over 1,000,000 feet. It is intended to place that gas on the market for lighting and heating purposes and motive power. It is proposed to take it into the city of Moncton, 12 miles from where it is found and also into the city of St. John, considerably farther away. There is no doubt that this is also a going concern at present, which will be a very valuable asset to the province. We have also mines of different sorts not fully developed. A large amount of money has been spent in prospecting and prospecting is still going on; but these two industries which I have mentioned are the ones which have been developed. There is no doubt that we have copper and antimony in large quantities. A mine of the latter at Lake George, in the County of York, has been pretty well developed production works having been built, and the finished article turned out been found in a mine at L'Etete in ready for the market. Copper has been found in a mine at L'Etete in the County of Charlotte. Shafts have been sunk some 500 or 600 feet and good copper found, though not in sufficient quantities to place it on the market."

## ST. JOHN HARBOR EXTENSION.

Questioned as to the development of the port of St. John, Mr. Grimmer said:

"The minister of public works of Canada, the Hon. Wm. Pugsley, made a speech recently at the opening of the Dominion Exhibition there, in which he outlined what was going to be done in the way of harbor development. Plans had been drawn up, which were at the exhibition, for the development of Courtenay Bay, which is to the east of the present City of St. John. It is proposed to dredge the bay and make it suitable for a winter port service. The Grand Trunk Pacific Railway is to have terminals there. The Canadian Northern Railway also proposes to have them. In order to do this the whole of the bay has to be dredged, and it is estimated that it will require an expenditure of between \$40,000,000 and \$50,000,000 to do this and construct the docks and also a dry dock. We have the statement of the minister of public works that this work is to be done. Of course, it will take some time to do it. These reforms cannot be effected until the Quebec bridge is finished, because there is no way of

## SOCIAL GOSSIP

Miss Edith Dalling of Woodstock, spent the holiday in the city, the guest of Mrs. R. M. Campbell, Street.

Mrs. Walter McFarlane of Nashwaakiss, made a very charming hostess at a tea on Tuesday afternoon. About fifteen ladies were present and a game of bridge was much enjoyed in the evening.

About twenty-five friends of Miss Jennie McConnell gave her a very pleasant surprise party on Monday night. Dancing and Halloween games kept the fun up till the early hours.

Miss Marion Alexander, of the teaching staff at Marysville, spent the holiday at her home at Fredericton Junction.

Miss Frances McNally of St. John, spent the holiday here, the guest of Mrs. James G. McNally, Brunswick Street.

Mr. Lloyd Vignwart is enjoying a pleasure trip to New York and other American cities.

Mr. W. D. McKay spent the holiday at his home here.

The B. and B. Club closed yesterday for the winter months after a very pleasant and successful season.

Something new in the line of Halloween parties was held at the residence of Mr. W. D. McKay, Charlotte street, Monday evening by the Neighborhood Bridge Club. All the members attended in fancy costume, to represent some Halloween legend. All voted it a very pleasing and jolly affair.

The Bachelors of Fredericton will entertain at an At Home at the Queen Hotel on the evening of Friday Nov. 11th. About two hundred invitations have been issued. The chaperones will be Mesdames A. R. Wetmore, W. H. Steeves, H. G. Chestnut and J. Alex. Thompson. Hanlon's orchestra will play a dance programme, while there will be several sitting out rooms for those who prefer to play bridge.

Mr. Grover C. Torrens spent the holiday in the city the guests of his parents, Dr. and Mrs. Torrens.

Miss Madeline Hatheway of St. John, is the guest of Mrs. J. B. Crocker, Government Road.

Miss Grace Kirke of Sussex, is spending the holidays with her sister Miss Kathleen Kirke, of the U. N. B.

Miss Margaret Belyea of Gagetown is spending the holidays with Mrs. C. C. Jones at the U. N. B.

On Saturday evening Mrs. J. B. Crocker, Government Road, entertained at a most enjoyable bridge of three tables in honor of her guest, Miss Hatheway. The prize winners were Miss Margaret Wiley and Mr. Wilmot Miller, while the consolation prizes went to Miss Vera VanBuskirk and Mr. Colton McKee.

Mr. R. V. Arnold of Bank of Nova Scotia staff, spent Thanksgiving at his home in Sussex.

Mrs. J. Stewart Neill is entertaining at the tea hour, on Tuesday.

Miss Maud Williams of Milltown is the guest of Miss Louise Kinghorn, Smyth Street.

getting across the St. Lawrence river below Montreal. The dredging work, however, will be commenced at an early date, the condition of the harbor bottom having been ascertained, and found satisfactory. At present there is a rise and fall of the tide of 25 feet, but the dredging will remove that difficulty. Meanwhile, dredging is going on all the time at St. John, so that only ships with a very deep draught cannot enter at low tide, and they have not to remain outside very long."

All these industrial developments, Mr. Grimmer pointed out, would furnish opportunities for employment for immigrants to the province.

"You cannot get labor there now. Skilled labor is in great demand. Ordinary labor is getting in many cases \$1.50 (9s.) and \$2 (8s.) a day, where they were satisfied with \$1 (4s.) a few years ago. The ordinary man making roads often gets \$2. There is a very great demand for domestic service. The factories are absorbing most of the native girl helps, and offer openings for immigrants as well. A servant will get \$2.50 (10s.) a week and cooks \$2 (12s.) to \$5 (£1) a week this generally meaning washing and ironing to be done besides."

Coming to speak of the game of the province, Mr. Grimmer said:

"The forests are full of moose and deer and caribou. We have about 500 registered guides at the present time—men skilled in woodcraft, who spend their time in conducting parties for fishing and shooting in the province. The revenue last year from the sale of licenses was \$34,500 and this year we expect it to be largely increased. For the first ten days of the open season (Sept. 15 to Nov. 12) this year, \$15,000 was received from the sale of licenses. Any sportsman who can shoot going into the woods with a registered guide will have no trouble under ordinary conditions in getting a satisfactory head. There are magnificent moose in the province, a head with a spread of horns as much as 64 inches having been obtained. The streams abound in trout, the rivers in salmon and the lakes in trout, bass, perch and other game fish. Everywhere, indeed, you find fish. There are no finer salmon than those in such rivers as the Restigouche and Miramichi, where they are in large quantity as well."

Miss Ethel M. Rainsford arrived here from Boston yesterday.
