MONEY WAS EARNED IN PENNIAC FIRE

The fire at Penniac yesterday which destroyed the house of Mr. John Wade also destroyed the uniforms and military outfit of his son, Lieut. Gen. Wade, of the 71st Regiment. Lieut. Wade was in the house with a friend at the time of the fire. The only property of his own that he was able to save was a gramophone, which was playing when the fire started. Mr. Wade was working in the field back of his house at the time of the fire and seeing the stream of smoke ran in and informed his son about it. The fire caught in the second story of the house from the kitchen stove. Very little furniture was saved from the building which was burned to the ground. Fortunately there was about \$1,000 insurance on the house which is held by the Acadian Insurance Co. Mr. W. S. Hooper is the local agent.

An elder son of Mr. Wade's had left for the lumber woods yesterday morning and his wife was in Fredericton at the time of the fire. It has been ascertained that a sum of several hundred dollars which was thought she might have had on her person was in the house and was lost in the fire. The only insurance was \$200 on the furniture.

She arrived here about 11 o'clock this morning and left for St. John again at 1 p. m.

PENNIAC MAN HAS THREATENED SUIT AGAINST MARYSVILLE

Says Town Marshal While Making Arrest Inflicted Unnecessary Injuries Upon Him.

A young man named Moore, who is a resident of Penniac, threatens suit against the Town of Marysville for injuries which he states were inflicted upon him by Town Marshal Saunders. Several of the young man's neighbors and friends have taken up the young man's cause and it is likely that the matter will be thoroughly ventilated in the near future.

The trouble is said to have occurred last Friday night. Moore was driving home and passed through Marysville. He claims he was not in an intoxicated state but had only had two or three drinks. A heavy rain came on and he took shelter. The town marshal came along at that time and an altercation between the two ensued. Saunders, it is said, arrested Moore and in doing so inflicted severe injuries on his prisoner. The latter had his head badly pounded.

MOTOR-VEHICLES WILL BE DISCUSSED AT CONVENTION

Strong Feeling Against Automobiles in Parts of Province -- Automobile Association Active.

Automobiles, motor-vehicles and legislation pertaining to the same are expected to furnish the material for an animated debate at the Fifth Annual Convention of the Union of New Brunswick Municipalities which will meet at Woodstock shortly. In many sections of the province the people are opposed to granting permission to motor-vehicles at all. This feeling is said to be particularly strong in Carleton and Victoria Counties and in Restigouche. Delegates from those counties no doubt will voice the sentiment of the people.

The New Brunswick Automobile Association is also likely to take a hand in the matter. This morning City Clerk J. W. McCready, Honorary Secretary of the Union of Municipalities received a letter from Mr. P. W. Thomson of St. John, president of the Automobile Association in which the views of the owners of motor-vehicles were forcibly stated. The letter in all probability will be read at the convention as Mr. Thomson will be unable to attend. The Automobile Association it is understood is drafting a new motor-vehicle act which will be presented to the legislature next session.

No more paint for me! I've now covered every roof on my place with Amalite.

To buy a roofing that requires painting is inviting trouble.

Painted roofings are as out of date as the harvester machinery of thirty years ago.

The roofing of to-day needs no painting. That's one of its great features.

If you are still using the "old rubber kind," the kind that requires painting every year or two to keep it tight, we want to tell you about Amalite; why it needs no painting; why it wears longer than the "smooth surfaced" roofings, and why it costs less.

First—Its chief ingredient is Coal Tar Pitch—not a "secret compound" but a well known, long tested material, recognized by engineers as the greatest waterproofing material known. Two layers of this material are used in every sheet of Amalite.

Second—We use two layers of the best grade of wool felt to hold the pitch in place. This wool felt

gives tensile strength to the roofing, and is the best material known for that purpose.

Third—On top of these four layers is a real mineral surface. This surface requires absolutely no painting, and adds materially to the life of the roofing. It is fire retardant. It is permanent.

We want to send you a sample so that you can see what a solid, substantial waterproof roofing Amalite really is.
