**DEVELOPMENT OF GOLF.**

Nearly a quarter of a century ago Sir  
Herbert Maxwell wrote:—"Of late  
years the development and popular-  
ity in the south of one of our Scot-  
tish national games has been phenom-  
enal. North of the Tweed we have  
played golf for centuries by stealth,  
and now we blush to find it fam-  
e. The excellence, of course, of your  
English links is already such as to  
threaten the prestige of Prestwick,  
and even the ascendancy of St. An-  
drews. The incredulous smile which  
used to greet the defence of the man-  
liness of pursuing a little ball into a  
rabbit hole, with implements very  
well adapted for the purpose has dis-  
appeared with a sympathy born of  
a knowledge of the game. It is now  
our turn to assume an I-told-you-so  
complacency."

**DOMINION CROP REPORT**

Ottawa, September 15—The Bulletin of the Census and Statistics Office, issued today, says that the reports on field crops at the end of August are more certain than at the end of July, and that the situation during the month has improved. In the older provinces the grains have matured well and have harvested and saved in fine condition. The estimate for wheat, oats and barley is 445,420,000 bushels which is 129,188,000 bushels less than the final estimate for last year. Spring wheat is less by 16,010,000 bushels; but fall wheat shows an increase of 1,649,000 bushels. The eastern provinces show gains in each one of these crops. The increase of wheat there is 3,633,000 bushels, of oats 23,219,000 bushels and of barley 625,000 bushels and of barley 625,000 bushels. The loss in the western provinces, exclusive of British Columbia, is a result of the great drought of July, which reduced the area harvested by 22 per cent for wheat, by 24 per cent for oats and by 31.5 per cent for barley. The estimated production of wheat for the whole of Canada is 122,785,000 bushels, of oats 283,247,000 bushels and of barley 39,368,000 bushels, as compared with 166,744,000 bushels wheat, 353,466,000 bushels oats and 55,398,000 bushels barley in the final estimate for last year. The estimate for Manitoba, Saskatchewan and Alberta is 99,890,000 bushels wheat, 92,201,000 bushels oats and 14,723,000 bushels barley, being an average of 14.49 bushels for barley on the area sown, but of 15.24 bushels wheat, 27.91 bushels oats and 21.22 bushels barley on the area reaped. Compared with the same period last year for the Dominion the average condition of spring wheat on August 31 was 79.05 to 84.30, of oats 80.03 to 84.89 and of barley 80.51 to 83.54; but compared with the condition at the end of July it was 79.05 to 77.05 for spring wheat, 80.03 to 79.57 for oats and 80.51 to 79.62 for barley. Peas, beans, buckwheat, mixed grains flax, corn for fodder, potatoes and

**KING OR EMPEROR**

The Winnipeg Telegram, which cannot be charged with hostility to what is ordinarily connoted by the term "Imperialism," denounces as "fatuous" the suggestion that the British Monarch should have added to his numerous titles that of "Emperor" of the Dominions. In The Telegram's view "British Empire" is "bad enough" as a phrase, but "British Emperor" is "ghastly." Our Conservative contemporary is perfectly sound in its objection and in the ground on which it is based. The term "Imperator," when it was first assumed by the Roman rulers, designated a military commander, not a civil ruler, and the European Emperors are doing their utmost to retain that connotation. The Emperor of Russia, the Emperor of Germany, or the Emperor of Austria Hungary values his Imperial title just because it signifies to him and his people that he is a military commander.

No such semi-barbaric associations cling around the old English name

alfalfa have declined in condition but peas, mixed grains and flax only appreciably; whilst corn for husking, turnips, mangolds, carrots, sugar beets and pasture have improved.

"King." Its remotest origin is doubt-  
ful, but it is quite certain that in  
very ancient times the "King" was  
the head of his family, then chief of  
his tribe, and lastly ruler of his peo-  
ple. Always the office of King was  
civil, not military, and there has  
grown up around it associations of  
wisdom, knowledge, and ability to  
make and enforce laws rather than  
command armies and subdue foreign  
enemies. Kingship in Britain is limited  
by the theory and practice of re-  
sponsible cabinet government, while  
there is not an Emperor in Europe  
whose individuality is similarly hedged  
around. The proposal to add the  
term Emperor would make King  
George's full title a contradiction in  
terms. All this was pointed out when  
Queen Victoria was made "Empress  
of India," and India is only a Crown  
colony, not a "Dominion."

**BAD ROADS DID IT.**

P.P., damaged his automobile near  
Rexton Friday by running into a hole  
Structural Supt. Bernard and Coun-  
cillor Carson were in the party on  
a tour of inspection of roads and  
bridges. The spring of the machine  
was badly damaged and the party  
were compelled to wait over until re-  
pairs were made.
