Dr. Smith of Fredericton has accepted the invitation of the Faculty of Montreal College to deliver the inaugural lecture at the opening of the session about the middle of October. This is the first time the honor has come to New Brunswick. The proprietor went out and assured them that there wasn't a Toronto man in the house, and they finally removed the cartridges from their guns and went home.

BOARD OF TRADE  
WILL TRY TO GET  
PERMANENT SEC'Y

Will Attempt to Have Dues Increased—Proposed Officials May Act For Tourist Association.

At tonight's meeting of the Board of Trade the attempt will be made to have a sufficient number of the members agree to increase the annual membership fee to five dollars in order that a permanent secretary on salary may be secured. It is proposed that such a secretary in addition to conducting the business of the Board of Trade might by special arrangement with the Tourist Association act as secretary of that organization.

The intention is to use a permanent secretary as a publicity agent for the city and to boom Fredericton particularly for the purpose of having manufacturing plants established.

President Hodge of the Board of Trade stated this morning that it would be only with the hearty cooperation of all members of the Board of Trade and citizens in general that the scheme could be made a success. He felt that the time had come when something should be done to advance Fredericton.

The Board of Trade at tonight's meeting will also consider the matter of Fire Insurance rates.

Mr. J. J. F. Winslow, the present secretary of the Board of Trade has stated that owing to lack of time he is unable to give the attention to the Board's business that should be given. It is not likely that Mr. Winslow will act as secretary after the present year.

CLAIMED SUMMONS  
COULD NOT BE SERVED  
IN POST OFFICE

Police Magistrate Thinks Differently—Chief of Police will Serve Summons on Objecting Clerk.

The attempt to stop the use of sidewalks by bicyclists has given rise to a very interesting point the settlement of which may cause complications. On Saturday the chief of Police went to the Post Office to serve a summons on one of the clerks, who had been reported for riding his bicycle on the sidewalk. The clerk refused to take the summons claiming that a service could not be made while he was performing a public duty in a public building.

The Chief of Police this morning consulted with the Police Magistrate Marsh on the subject and was told that a summons could be served on the postal-clerk at the Post Office or any other place. The Chief will serve the summons and in case of further objection on the part of the person reported it is likely that an arrest will be made.

It is not known whether an official of the postal department can be arrested while performing his duty.

PROF. STEPHENS WILL  
COACH U. N. B. TEAM

At Saturday night's meeting, the U. N. B. students decided to change the pattern of the College jersey. The new jersey will be red with an eight-inch band of black about the body.

Mr. Frank J. McCafferty city editor of the St. John Times-Star and Mrs. McCafferty have returned from a trip to the West. Mrs. McCafferty is a sister of Mr. J. J. McCafferty of this city.

**Amatite ROOFING**

No more paint for me!  
I've now covered every roof  
on my place with Amatite.

To buy a roofing that requires painting is inviting trouble. Painted roofing areas out of date as the harvester machinery of thirty years ago.

The roofing of to-day needs no painting. That's one of its great features.

If you are still using the "old rubber kind," the kind that requires painting every year or two to keep it tight, we want to tell you about Amatite; why it needs no painting; why it wears longer than the "smooth surfaced" roofings, and why it costs less.

First—Its chief ingredient is Coal Tar Pitch—not a "secret compound" but a well known, long tested material, recognized by engineers as the greatest waterproofing material known. Two layers of this material are used in every sheet of Amatite.

Second—We use two layers of the best grade of wool felt to hold the pitch in place. This wool felt gives tensile strength to the roofing, and is the best material known for that purpose.

Third—On top of these four layers is a real mineral surface. This surface requires absolutely no painting, and adds materially to the life of the roofing. It is fire retardant. It is permanent.

We want to send you a sample so that you can see what a solid, substantial waterproof roofing Amatite really is.
