## ROOSEVELT AND HEARST

Ex-president Roosevelt's intimation that he may re-enter the political lists—those of us who look on from a safe distance can't just see that he ever left the—and his open acceptance of the aid of William Randolph Hearst in fighting the republican bosses, opens up an avenue of highly interesting possibilities in United States political life.

Going into politics means, to Roosevelt, becoming a candidate for office. And what office is open with dignity to an ex-President save the White House again? This possibility and Roosevelt's blunt threat that his success means trouble for the "interests" and the bosses, will arouse an immediate and organized alarm in financial and railroad circles. Undoubtedly the Hearst bogey will be worked in the effort to stampede public opinion. But irresponsible as Hearst is, he exercises, through his papers, a large influence over a numerous class, an influence which Roosevelt is too keen a politician to ignore. It is unlikely that there will be any alliance between the two though they have much in common, but the mere association of the names, and the possibilities thus opened up, will give fuel for much editorial and oratorical fire for a while.

## EXPERT CRITICISM

Now comes the travelling Englishman, and true to his nation's characteristics having an opinion on he publishes it.

Having by ill luck taken passage on a train to which were attached three extra cars to accommodate the returning Eucharist Congress crowds from Montreal the islander found him self delayed and his connections imperiled. Therefore the operation of the road is "beatly" and "If the Intercolonial is an example of Government owned railways it is a very strong argument against government ownership."

Oh, my! How dreadful! Let's invite the outraged gentleman to come to Fredericton. We'll have a splendid chance to show him how a corporation railway can fail to bring its trains in at all! Perhaps he won't then feel so badly.

Bad roads were not the only reason why the Republican plurality in Vermont fell on Tuesday to the lowest point in years. Bad records were also a factor. The people would make this a progressive year.—Boston Journal.

Referring to the above quotation we take great pleasure in serving due notice on the present incumbent (or is it incumbence) of the Provincial Premiership that bad roads still retain their pristine powers as plurality destroyers.

## PRESS COMMENT

Brantford Expositor.—In New Brunswick the Dominion Commission on Technical Education heard evidence as to the benefits accruing to rural communities from school gardens, of which there are twelve in the province. The value of these can scarcely be overestimated, both in the effect on school pupils and the community at large, for they not only arouse the interest of the young in all that is beautiful in nature, but are a powerful stimulant to older persons to cultivate more artistic ideals. In Ontario an excellent example of school gardens us to be found at the public school in connection with the Rittenhouse model farm near Vineland. It is to be hoped the day is not far distant when every school ground in this province will have its beauty spot.

Calgary News.—Calgary leads Canada in the matter of public utilities, and now that the suggestion that we

invest in a municipal dairy has been made it would not be surprising if it were adopted. We own our water supply; why shouldn't we own our milk supply? The ownership of the water supply ensures pure water to Calgarians, and the ownership of the milk supply would ensure pure milk, and this is a consideration too important to be overlooked.

## BADE FAREWELL

Rev. C. T. Wilson left this morning for St. John on his way to Wollville. Rev. Mr. Wilson bade fare well to the Gibson Baptist Church last evening at the conclusion of the service. Mr. J. H. Fleming of Gibson secretary of the congregation read to him the resolution of regret which had been passed at a meeting of the congregation.

Toronto Weekly Sun.—It is not improbable that in the next ten years many farms in the southern part of Ontario will be in the hands of Italians. Nor will it be altogether a bad thing for the province. Not all Italians are given to the knife habit; very few drink to excess. The great majority are an industrious, peaceable people, who require only a suitable environment to develop into useful citizens of the Canadian commonwealth.

## A LETTER TO THE EDITOR

To the Editor of the Daily Mail: "Taking social conditions in the large however, there was warrant for the statement made the other day, at the Anglican Church Conference, that Canada leads the world in society and chastity. Of playing if one may distinguish between that and pleasure, there is not enough in Canada.

Some day there will be a good deal more and when the passion for wealth as the means to obtain power, no longer possesses the Canadian with the increased love for play, for the recreation of the bowling green and the golf links, rowing, swimming and skating and all other sports that involve personal fortification will come not a loosening, but a strengthening of the moral fibre of the people." Play drives out harmful pleasure.

The above from the able pen of the editor of the Toronto Globe of the issue of the 7th inst and the reason why I make use of this is to ask the ratepayers of this city if they ever heard of skating rinks being asked to pay a license fee in addition to a tax in a small city like Fredericton.

It would occur to me that the action of the present council in imposing a special tax upon any legitimate place of recreation for the people is not in accord with the principles upon which the majority of them were elected.

If the council desire to close down the Arctic Rink as a place of proper and decent recreation for the young boys and girls of the city, why let them impose this tax and also let them impose a tax upon the curling rink etc. and also let them see that what they were elected for, is carried forward, with that zealous disposition they apparently are trying to show the citizens of their ability to make new and useless laws.

Yours very truly,

A. E. HANSON.  
Fredericton, Sept. 12.

## CAPACITY OF CATHEDRAL TO BE TAXED TO UTMOST

All who desire to hear the Rt. Hon. and Rt. Rev. Lord Bishop of London preach at Christchurch Cathedral tonight will not be able to satisfy that desire as already the number of those who have received tickets will tax the seating capacity of the Cathedral to the utmost. The service as that concluding Bi-Centenary celebration of the Anglican Church in Canada will be a most memorable one.

The party of distinguished clergymen who will attend and take part in tonight's service arrived in the city shortly after four o'clock this afternoon having come from St. John on Mr. Robert Thomson's steam yacht Corinthian. They are being entertained by various members of the Cathedral congregation.

Tonight after the service at Christchurch Cathedral Dr. and Mrs. T. C. Allen will entertain a party of the visiting clergymen at supper at their residence, Church street. Those composing the party will be the Bishop of London, the Bishop of Glasgow, the Bishop of Fredericton and Lady, Venerable Archdeacon Newham, Chief Justice Barker and Mr. and Mrs. T. C. Allen. Bishop Courtney and his daughter were to be of the party but have been unable to come to Fredericton.

Tomorrow's programme including an address before the Canadian Club at 12.30 p. m. by the Bishop of London, and a garden party at Frogmore at 3 p. m. will be adhered to. Yesterday's large congregations heard Dean Williams of Quebec and Canon McNab of Toronto preach at both the Parish Church and the Cathedral.

The death took place in Dublin on the 16th ult., in his 89th year, of Lieut.-Col. Francis Rowland Forester a Crimean veteran.

## ABDUCTED ITALIAN BOY RETURNED

The Captors Escape New York's Detectives.

New York, Sept. 10.—Although little Michael Scimeca, the three-year-old son of Dr. Scimeca, a prominent Italian physician, is today safely in the hands of his relatives, having been held for nearly three months a captive by Black Hand kidnapers, the abductors of the boy have so far escaped the police trap set for them. When it was learned that the little fellow was about to be returned to his guardians, fifty detectives of the Italian squad had been four hours watching ferry and railroad stations and the vicinity of the doctor's home in expectancy of trapping the kidnapers. Then the lad mysteriously turned up late last night at the home of his father-in-law in Brooklyn. The police had heard that Dr. Scimeca was trying to raise \$7,000 which had been demanded as a ransom for the boy.

Dr. Scimeca today, however, denied that he had paid a cent for the return of the child.

Much mystery surrounds the circumstances of the child's appearance. It was said at the Petrella home that a telephone message was received during the evening that little Michael would be found walking on Fifty-fifth Street, Manhattan. The Petrellas drove in their carriage to that locality they said and spied the lad alone on the sidewalk. The boy uttered a cry of joy when he saw his relatives and was soon snugly wrapped up in the carriage and on the way to the Petrellas' Brooklyn home. A report which had come to the police that the kidnapped boy instead of being found alone on the street had been brought to the waiting carriage at the curb by a rough looking man who disappeared as soon as he had delivered his charge, was today being investigated by the police.

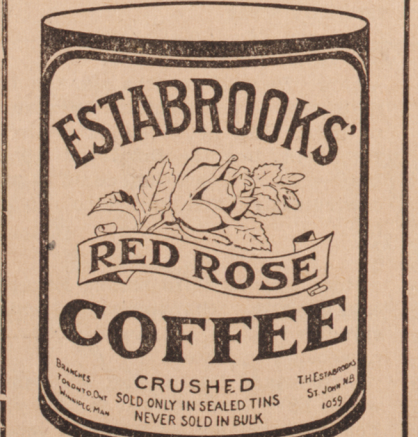

Lieut. Vachiers of the Italian squad ron, said that he knows the identity of the boy's captors and arrests are considered probable. Michael Scimeca was spirited away from his parents' home on June 17th last by men who lured him with promises of candy.

Shortly afterwards demands for sums of money for his return began to pour in upon his father, through the mails and mysterious telephone messages. Threats that the boy would be killed were also received and his parents were in an agony of terror lest harm would come to him.

## HAMILTON'S INJURIES NOT SO SERIOUS AS REPORTED

Sacramento Calif. Sept. 10.—Physicians attending Chas. K. Hamilton, the aviator who was hurt in the wreck of his machine last night at the state fair grounds, gave out a statement early today after a third examination that Hamilton's condition is favorable. They now believe no permanent injury has been suffered. Numerous deepgashes and burns from the radiator of the engine of his bi-plane are the only noticeable results of the accident, but how serious are the internal injuries will not be known until later. The jamming of the rudder of the machine caused the sudden drop was the statement made by Hamilton as he lie swathed in bandages at the hotel. When I hit the steering wheel jammed back against the radiator and held me fast while the scalding water ran over me.

Estabrooks' Coffee is full of snap and fine flavor. It gives genuine satisfaction to the last drop, and brings back the cup for more. It is as uniformly good as Red Rose Tea. It does not contain an atom of chicory, nor any other adulterant. You will certainly enjoy it.

Sold only in 1 and 1/2 lb. tins. Try it for breakfast to-morrow

## PLOTTING AGAINST BRITISH IN INDIA

French Police Discover Headquarters in Paris

Paris, Sept. 12.—The discovery of the headquarters, near the Champs Elysees, of a group of Indian plotters, who seek to overthrow English rule in India, is causing some concern.

Under the mythical name of "Madame Cama," the organization is sending out its communications, one of which fell into the hands of the authorities today. Similar revolutionary groups are in Berlin and Geneva, the three working in perfect harmony. The communication found today reads in part, as follows:

## HAVE FINE PLANS

"Let us fill ourselves with the haughty spirit of our ancestors and defend Dharma to the death. Kali (British rule) shall die, and a new age shall dawn for Hindustan. Let us clear ourselves of the illusion that we are disarmed. It is true that the detestable 'Arms Act' passed by the cowardly Britons in 1879, is on our statute book, and that our men are not allowed to possess a gun even for self-protection. But let us forget not the states of the princes. These more than 60,000,000 people live. 'Arms Act' does not affect. There They may arm themselves when they choose. 'We shall start by guerilla war. We shall strike, then run away, and strike again. We can cut the telegraph wires, smash their wireless, break down their railway lines, and make the enemy powerless to move with any speed.'"

The headquarters of the revolutionists will be kept under the closest surveillance, and the French authorities are working in conjunction with the English authorities.

## NATURAL DEVELOPEMENTS COMPEL A PROFIT

The Deputy Sheriff's Tribute

L. H. UGLAND  
Deputy Sheriff

"Vernon Park is situated right where natural developments are crowding in upon it, at present prices purchasers will reap a handsome profit."

Mr. Ugland originally owned the Townsite in 1905, the advise he gave then was to buy, and so far he has not changed his command. Those that took his advise five years ago have reaped large returns on their investment.

"Buy Cheap Land near dear Land" is the maxim of the shrewdest investors. The dearest Land in Claresholm is on Railway Street, which intersects Vernon Park. The Cheapest land is Vernon Park, which overlooks the business section only three blocks distant. To buy and hold is to amass wealth—if you buy right. It will pay you to get full particulars.

## DEVOTING ATTENTION TO SMUGGLING VIA CANADA

New York, Sept. 10.—The office of the Customs Collector at this port, since Collector William Loob really began to collect, has diverted the channels of professional and amateur smuggling. General Nelson Penny, retired, surveyor of port, announced, that he has sent of his most trusted inspectors to watch the Canadian border. The general did not care to elaborate on his announcement, but there was an intimation that Inspector Walter P. Murphy may carry a roving commission. He was assigned for the purpose of observing, assisting and instructing customs men in regard to this phase of the customs attention.

If you wish to live long and be healthy and happy fill your lungs day and night with pure, fresh air, and let your system absorb all the sunshine you can possibly secure for it.

A memorial to Jacquard, the inventor of the weaving loom, was unveiled at Calais on the 18th ult.
