LIMITED.

Will issue its next Directory during the present month. Thereafter the names of all new subscribers will be published in this space. It will greatly improve the service if Subscribers will kindly add these to their Directories.

FORESTRY CONVENTION OPENS AT QUEBEC

Quebec, Jan. 18.—The Dominion Forestry Convention in session here, called by Sir Wilfrid Laurier, and opened by His Excellency the Governor General, is national in scope. It is attended by delegates from all parts of Canada and from all professions, working with the sole object of conserving the forest wealth of Canada. This is the second convention in Canada of such scope and magnitude. The first national gathering was convened by Sir Wilfrid Laurier, under the auspices of the Canadian Forestry Association in Ottawa in 1906. This was a most successful meeting and greatly advanced the cause of forest conservation. The convention this year is also held under the auspices of the Canadian Forestry Association, of which Senator W. C. Edwards, the well-known Ottawa lumberman, is president. Since 1906 there has been formed the Commission of Conservation composed of about thirty leading citizens, with Hon. Clifford Sifton as chairman. These two bodies are co-operating throughout this convention. The Commission of Conservation holds its second annual meeting in Quebec on Jan. 17, and its members will remain during the rest of the week to assist in the convention. The two bodies are not rivals, and one supplements the work of the other. The Commission of Conservation is the technical body created to get exact data to be used in advising and informing governments and other official bodies, while the Forestry Association is a popular body consisting now of over 2,500 members which any well-wisher of Canada may join, and which exists to arouse the public to the need for action on rational and scientific lines.

As soon as Quebec was suggested as the place of meeting, the Premier, Sir Lomer Gouin and the Government took up the matter enthusiastically. Hon. Jules Alard, minister of Lands and Forests, personally entered into the work of preparation in which he was ably assisted by the officers of his department. The City Council placed their fine city hall at the disposal of the convention, but even this being found too small, by the kindness of the Government and especially of Hon. A. Turgeon, President of the Council, the Legislative Council Chamber in the Parliament Buildings, one of the finest rooms in Canada, was set apart for the Convention, the Council adjourning over the necessary three days. The citizens of Quebec have also shown their wanted hospitality in many ways.

Quebec, Que., Jan. 18.—The Dominion Forestry Convention was auspiciously opened this morning by Earl Grey before a distinguished gathering. His Excellency in his opening remarks, referred to the earlier conventions in the importance of the work. In the absence of Sir Wilfrid Laurier, who was detained by Parliamentary duties, a letter was read from the prime minister, expressing his regret at not being able to be present and also his entire sympathy with the convention. He expressed the hope that the institution would become permanent.

Hon. W. C. Edwards presided, in the absence of Sir Wilfrid Laurier.

His Excellency the Governor General urged the Canadians to be up and doing in order to save this great national heritage. He drew from his own observations in various parts of the world a picture of the dangers which confronted Canada if deforestation was allowed to go on unchecked, while on the other hand he pointed to some of the older countries which are now deriving a permanent and increasing revenue from their forests.

Addresses of welcome were delivered by Sir Lomer Gouin, Premier of Quebec, His Worship Mayor Drouin. Other addresses were delivered by representatives of the various provinces, the United States, the Churches, the

Universities, Chamber of Commerce, Manufacturers, etc.

At the different stages in the meeting when the Chairman, Sir Wilfrid Laurier, was unable to be present, the Chair was taken by Hon. W. C. Edwards, upon whom the chief responsibility for the carrying out of the Convention falls.

Hon. Clifford Sifton, in his address in his usual vigorous style, said the time for talking was past and that now there should be action. He referred particularly to the loss from fires and the danger of waterpowers being alienated from the people. He pressed for the extending of the fire protection systems throughout Canada, and told what had been done in various provinces in this respect.

Next came papers on forest administration.

Hon. Jules Alard, Minister of Lands and Forests for Quebec, dealt with the improvements made in the regulations in the last few years which had resulted both in increased care of the forest and increased revenue. He took occasion to refute a statement going about that the developed waterpowers of Quebec did not exceed 50,000 h. p., and showed how large an asset the waterpowers of Quebec were.

Mr. R. H. Campbell, Dominion Superintendent of Forestry, has charge of all the forest land in Manitoba, Saskatchewan and Alberta, and in the forty mile belt along the main line of the Canadian Pacific Railway in British Columbia. Mr. Campbell told of the areas and purposes of the forest reserves in providing timber and fuel for settlers and in protecting the headwaters of streams. This latter was the main purpose of the great reserve formed last year covering the eastern slope of the Rockies. He emphasized the point that the aim was to conserve the benefits of the reserves for all the people, and to this end he said it was necessary to reserve timber lands from settlement, so that the timber might be managed for the benefit of the people generally, and that a permanent policy of management might be carried out.

At the last moment Mr. Henry S. Graves, Chief Forester of the United States, was unable to come, but sent one of his lieutenants, Mr. J. G. Peters, to take his place. Mr. Peters has had charge of the work of co-operation between federal and state governments and individuals to preserve the forests.

Hon. Frank Cochrane, Minister of Lands, Forests and Mines for the Province of Ontario, represents one of the great timber-owning communities of America. Mr. Cochrane before becoming Minister was resident for many years of Northern Ontario in the heart of the timber country. He spoke of the present conditions in regard to lumbering in Ontario and the change in the methods of sale from the bonus system to the plan of selling at so much per thousand feet on the stump. He also spoke of the reorganization of the fire fighting service of the province and what had been done in regard to making permanent forest reserves and in extending Algonquin National Park.

Hon. A. K. Maclean, Attorney General and Commissioner of Lands of Nova Scotia, dealt chiefly with the results of the forest survey of the province made during the past two years under the direction of Dr. B. E. Fernow, Dean of the Faculty of Forestry of Toronto University. The purpose of this survey is to show just where the province stands that measures may be taken to conserve what is left.

Hon. W. C. H. Grimmer, Surveyor General of New Brunswick, which province has been making advances in forestry in the last few years, told of the importance of the forests as revenue producers and the measures that are being taken to protect them, especially from fire.

CANADIAN PACIFIC RATES DISCUSSED IN THE HOUSE

Ottawa, Jan. 17.—A member of parliament had the honor of voting alone for a resolution of his own making this afternoon. W. F. MacLean attracted by the recent increase of the C. P. R. dividend to ten per cent. moved that the time had come for the government to assert its right to regulate the rates of the western section of that road. He charged the railway with taking too much money out of the people.

Hon. Mr. Graham replied that the railway had already submitted its line to the control of rates by the railway commission was established for that purpose. He could not see the need for the resolution.

Mr. R. L. Borden suggested that the government should make the temporary arrangement into which the railway had voluntarily entered, a permanent one.

Hon. Mr. Emmerson favored a plan of taxation which would compel the shareholders to make to the country some return for the great profits they received.

Mr. MacLean refused to accept a suggestion that he drop his motion and when a vote was called he was the only man to vote for it.

Hon. Rodolph Lemieux was given a hearty reception on entering the house after his long absence in South Africa and Europe.

Major Currie served notice of a resolution requiring the laying on the table of any treaty being adopted by the government.

The greater part of the Quebec estimates were passed before the house adjourned.

EXCITING SCENE IN AUSTRALIAN HOUSE

Melbourne, Australia, Jan. 17.—Extraordinary scenes have marked the progress of a redistribution bill introduced in the state parliament of West Australia. The measure incurred the hostility of the labor members of the house, and they resorted to obstructive tactics. For twenty-nine hours they kept the house sitting, delivering speech after speech, and argument after argument, until from sheer exhaustion they were obliged to give up.

During the progress of the sitting, six members of the labor party were ejected from the house. One of the laborites showed fight and the services of the police were requisitioned. Finally the labor party withdrew in a body and progress having been made with the redistribution bill, the assembly arose.

The bill will be enacted into law in spite of the opposition of the labor members.

NO TRUTH IN REPORT THAT POPE IS ILL

Rome, Jan. 17.—A current report that the Pope had experienced a serious attack of gout, was denied today at the Vatican, where it was said that the health of the Pope was excellent. During today he gave the usual audiences.

3 DEGREES BELOW ZERO LAST NIGHT

Last night the thermometer dropped lower than it has in any winter during the past few years. The thermometer at the city pumping station registered 30 degrees below zero and lower temperatures are reported from other places in and about the city. In the winter of 1904, the thermometer registered as low as 40 below zero, but since that time such extreme temperature has not been registered. Yesterday 10 degrees below zero was the highest temperature during the day. Today the weather is a little milder and at noon the thermometer registered 2 degrees below zero.

The cold wave is general all over the province and is causing much inconvenience. Trains on some of the railways are delayed through inability of the locomotives to make steam. Trains running in and out of Fredericton, however, are on time. Frozen water-pipes are numerous, however, the cold wave having caught householders unprepared.

THE UNIQUE

A Selig feature, "The Stepmother," and an Edison comedy, "A Wedding Trip to Hong-Kong," will be shown at the Unique tonight along with other excellent subjects. Remember that daily matinees are now being successfully run at the Unique and have come to stay. Every day 2.30 to 5. Saturdays 2.00 to 5.30.

Mr. John Depou, of Canterbury, is registered at the Barber House.

Mr. S. G. Brock of Toronto, arrived in the city this morning.

On Wednesday evening there will be a banquet tendered by the Government.

GREAT REDUCTIONS ON LADIES AND CHILDRENS WINTER COATS
