"Some of our Opponents say that we are Bound by this Agreement. In Reply to that let me say Tomorrow, Next Week, Next Month, Next Year, any Time that you Please, it is in our Power to Dispense with it." Sir Wilfrid Laurier at Amherst.

NEW BRUNSWICK PEOPLE WANT LARGER MARKET

Reciprocity is Gaining Ground on all Sides and Tory Candidates will be Annihilated on the 21st--Hon. John Morrissey will Stump for Loggie--Senator King at St. Andrews--St. John Lumberman Hands out Some Facts of Interest in York County

St. John, Sept. 6.—It having come to the notice of The Telegraph that Dr. J. W. Daniel, the Conservative leader for the city and county, is using the false canvas in the vicinity of Musquash that the pulp mill at that place will be closed down if reciprocity comes into force and that the canvas that Stetson, Cutler & Co.'s big mill at Indian town will also be closed by reciprocity is being quietly circulated among the workmen at the North End, an interview was sought last evening with F. C. Beattie, who is interested in the management of both concerns. What he said throws new light on the matter.

"I can hardly believe," he said, "that these ridiculous canvasses are being used. Instead of reciprocity shutting down the mills we are looking forward to the trade agreement relieving the effect of the repeal of the Pike law."

"Let me tell you that it is a serious matter for us to pay \$70,000 duty on lumber which we have cut from logs brought from the State of Maine and we have notified our men that we cannot continue to operate our mills in St. John unless this duty is remitted, which it will be under reciprocity. This is not partisanship, but a plain business view as I have told our men, and we have absolutely refused to enter into any contracts until we see if reciprocity is going through. As sure as the sun will rise tomorrow, if we do not get reciprocity Stetson, Cutler & Company's logs will be manufactured in the State of Maine next year. I cannot understand myself how anyone in any way connected with, or dependent upon the lumber industry and that means a very large part of the population of St. John, can oppose the taking off of the duty on rough lumber."

"This is the situation with regard to our Indian town mill and without hearing some of Dr. Daniels' arguments on the question of the pulp mill it is difficult to answer him, but I can say that generally the effect of reciprocity will be to secure an increase in the pulp and paper production in Canada. As I understand it, we will be allowed to ship in free pulp and paper produced from wood cut on private lands. The wood for the Musquash mill is nearly all drawn from our own private holdings and we will therefore benefit to the extent of duty from reciprocity. This part of the agreement is now in force although Dr. Daniel did not know it until he called at the Partington pulp mill and the manager showed him a check for more than \$2,000 the amount of duty paid since the agreement went into force and which was returned by the United States government."

Chatham Sept. 5.—W. S. Loggie's speech last night in the Opera House was one of the most carefully reasoned and logical addresses yet given upon reciprocity, and it made a deep impression on every thoughtful elector.

Mr. Loggie first showed how the market of 30,000,000 of people would not be affected in price by all the exports Canada can spare after satisfying local demands and that the prices ruling today would rule next year under the same conditions of supply and demand.

he saved between the shipper and fisherman.

A farmer having more potatoes than he can sell in the local market inquires as to the market prices in several cities, he finds the best price say in Bangor. He sends his potatoes there to be sold, but every carload costs \$150 in duty alone and brings down his profit. After reciprocity each farmer can pocket that 75 cents a barrel instead of handing it over to Uncle Sam.

A. B. Copp was present and gave an exceptionally fine fighting speech. Reciprocity is gaining adherents every day, as its benefits are being pointed out.

It is stated that Hon. John Morrissey will take the field next week in favor of reciprocity so thoroughly is he imbued with its good points. His sons Charles and John are both working hard and effectively for Mr. Loggie and their work is having great effect. Mr. Loggie is speaking tonight at Bay du Vin.

MEETING AT ST. ANDREWS.

St. Andrews, N.B., Sept. 5.—One of the largest and most enthusiastic meetings of the Reciprocity campaign was held in St. Andrews tonight.

The chair was taken by R. E. Armstrong, who delivered a brief opening address.

Senator Gilmor followed in a speech which aroused great enthusiasm. He traced the history of the Reciprocity campaign from its first inception, pointing out the efforts that the Conservatives had made to secure Reciprocity and emphasizing the great advantages that would follow to farmer, fisherman and lumberman.

Mr. Todd, the Liberal candidate, was received with great applause. He made a fine address.

St. Andrews may be trusted to roll a big vote for Reciprocity.

WILL ERECT NEW WIRELESS STATION

St. John's, Nfld., Sept. 6.—Plans for the erection of a wireless station of sufficient power to allow steamers plying between Europe and America to keep in constant and direct communication with land have been formulated by Inventor Marconi, who has been conducting experiments here for the past few days.

The erection of the proposed station is expected to be started within a few weeks, and its completion will make St. John's the distributing point for all wireless messages between England and America and other stations merely subsidiary.

Marconi will leave for England tomorrow to make final arrangements. Yesterday a lengthy message addressed to Premier Morris, was received from the wireless station at Clifden, Ireland, by means of a temporary station on the proposed site for the new power station here.

London, Sept. 6.—William Burgess, a Yorkshire man, today successfully swam the English Channel from Dover to Cape Grisnez.

The swimmer landed at Cape Grisnez at half past ten this morning almost exactly 24 hours after leaving Dover.

DECEIVING THE FARMER

Notwithstanding the fact that the Tory organ is able to see "the last days of Laurierism," and that Mr. O. S. Crockett has a "dead sure thing," in York, it finds it expedient to indulge in the most flagrant misrepresentation when dealing with the trade returns of Canada and the United States. On Saturday featured on the first page some statistics under the caption of "Farmers Beware the trap Baited with Reciprocity," which were false from beginning to end and were prepared with the sole object of stampeding the farmers into voting against reciprocity. The organ in the first place pictures Canada as importing from the United States in 1910 live stock to the value of \$4,087,462, and selling to that country live stock worth only \$1,246,789. In order that there may be no misunderstanding we here reproduce the organ's figures:

	Sold by U. S. to Canada	Sold by Can. to U. S.
Cattle.....	\$ 325,274	\$109,772
Horses and Mules.....	3,216,218	483,560
Sheep.....	133,294	527,687
Swine.....		6,088
All others including fowl.....	414,676	118,682
	\$4,087,462	\$1,246,789

Now compare the above with the official figures from the trade and navigation returns are published in the statistical year book of Canada:

	Sold by U. S. to Can.	Sold by Can. to U. S.
Cattle.....	\$ 57,750	\$642,674
Horses.....	779,656	453,186
Sheep.....	131,776	569,679
Hogs.....	2,464	6,088
Pure bred poultry.....	11,298	113,714
Dogs.....	11,063	
Other animals.....	91,982	
	\$1,085,988	\$1,805,341

As will be seen by the above instead of Canada importing from the United States live stock to the value of \$4,087,462 as claimed by the Tory organ, our imports totalled \$1,085,988, or about \$3,000,000 less than the organ would have the people believe. On the other hand our exports to the United States in live stock amounted to \$1,805,341, or \$558,652 less than the figures given by the graft organ and \$716,353 more than the United States sold to us. In the item of hogs sold to Canada by the United States the organ's figures are correct; in all other cases they are false and misleading. What the organ hopes to gain by such misrepresentation it is difficult to conceive.

Any intelligent man who examines the correct table as given above need not be ashamed of the showing made by Canada. Considering the fact that the American tariff is higher than that of Canada, it is remarkable that the balance of trade in live stock should be upwards of \$700,000 in our favor. It certainly bears out the statement of Sir Wilfrid Laurier that once the tariff barriers were removed "trade would flow from Canada to the United States like water over a mill race."

MAMMOTH STEAMER PUTS IN TO HALIFAX

(Special to The Mail)
Halifax, Sept. 6.—The Cunard Line Steamship Camaria arrived here this morning short of coal. Owing to the dock strike she left England with a scant supply and would have reached New York all right but for heavy gales which delayed her. She has on board fifteen hundred passengers most of whom will go to New York by rail. She is the heaviest ship that has ever visited this port with the exception of the Great Eastern.

1862—Gen. McClellan appointed to command the defense of Washington.

A LITTLE GIRL BURNED TO DEATH

(Special to The Mail)
Halifax, Sept. 6.—Mrs. Harold B. Young of Eastern Passage five miles from this city left her little children alone in the house yesterday while she went to the post office. During her absence her four year old daughter played with matches with the result that her clothing took fire. She received injuries which caused her death this morning.

PERSONAL
Mrs. Sanford Hall and three children of Wallace, Idaho, are visiting Mrs. G. A. Jarvis, King Street.

LIBERAL OUTLOOK IS VERY ROSY

(Special to The Mail)
St. John, Sept. 6.—Hon. William Fugsley, Minister of Public Works who has been in Ottawa on departmental business reached here this morning. He is most enthusiastic over the political outlook throughout the Dominion. He says that men in touch with the situation informed him that the government will come out of Ontario and Quebec with a larger majority than it has at the present time. It is possible that the Liberals may lose a few seats in Quebec on account of the Nationalist alliance but this loss will be more than offset by the gain in Ontario. The prairie provinces are solid for reciprocity and British Columbia is also swinging into line.

SPELL-BINDERS MADE SORRY EXHIBITION

The story comes from Macnaquac of a hasty retreat in not particularly good order which was beaten by two prominent anti-Reciprocity orators, Messrs. J. S. Mavor and F. P. Robinson of this city. The undignified retreat was made on Monday evening, when the intelligent farmers of the audience which heard the two spell-binders refused to credit the absurd statements made in their tirades against Reciprocity and asked for an explanation. As was expected, the experts (?) who were there to tell the people how to vote were unable to back up their statements and even went so far as to use insulting language to the more prominent "hecklers" in the audience.

The speakers touched upon pulpwood, eggs, beef and other natural products and attempted to show that Reciprocity would ruin the farmer. They were caught "with the goods on," however, when they stated that eggs were selling for six cents per dozen in the American market and were forced to confess that the price they mentioned was for condemned eggs, which could be used only for limited purposes. The admission caused the audience to roar with laughter. At the close of the meeting, when the two able orators tried to leave the hall, they were stopped by some of those present and compelled to listen to some sound Reciprocity arguments.

SAM LANGFORD WON
Madison Square Garden, N. Y., Sept. 6.—Sam Langford won his ten round bout with Joe Jeannette in the Madison Square Garden tonight but every minute of thirty in which blows were exchanged the Canadian negro knew he had a stiff problem to solve. Jeannette fought gamely and cleverly.

PREDICTS AN ERA OF STRIKES

Increased Cost of Living Causing Much Unrest in European Countries

Enormous Output of Gold Said to Have Upset the Balance of Trade--An Interesting Suggestion

(Canadian Press.)
London, Sept. 9.—An interesting suggestion is made in regard to the increasing cost of living which, like an earth wave, has sent a tremor throughout Europe, causing food riots in France, an outcry against the butchers in Belgium and protests against dearer meat and milk in Germany, while it is largely responsible for the labor unrest in England.

This suggestion is that the enormous output of gold in recent years, has upset the balance of prices and that the world has not yet shaken itself down to a true adjustment. Statistics show conclusively that in England, on the continent, and in North America, nearly all the commoner and most necessary articles of food have been steadily rising in prices since the century opened. Meat especially bacon, in England the poor man's food, milk, bread and sugar all cost more. It is calculated that there is a ten per cent. increase in the weekly budget of household expenses in England.

Prof. Chapman, at yesterday's meeting of the British Association, predicted that the next three years would be an era of strikes, due to the fact that, whereas up to 1896, the cost of living had been falling, it had since then been rising.

BIG FLOODS IN CHINA

One Hundred Thousand and People Reported to Have Been Drowned

Crops in the District Have Nearly all Been Destroyed--A Famine is Certain

(Canadian Press.)
Shanghai, Sept. 6.—The flood caused by the overflow of the Yangtze River is the most extensive and deepest in the memory of man. Nanchow Province is submerged to a greater depth than ever before, and widespread famine threatens. Besides the 100,000 persons reported drowned, millions are homeless, subsisting on herbs, facing starvation.

It is estimated that 80 per cent. of the crops in the flooded district is destroyed. The price of rice is rapidly advancing to prohibitive levels. Mobs have raided the stocks of rice dealers, at numerous places. The whole visible supply of rice will last only two weeks, it is estimated here. Foreign property has suffered heavily and trade is seriously affected. The Liao River in Manchuria has also overflowed its banks, many have been drowned and a famine in that section is certain.

Besides, China is torn by internal disorders. There are rebellions in five sections of the empire. In the province of Kansu, the Mohammedans 20,000 strong, are threatening Sining Fu. Elusive terrorists infest Canton. The British American Tobacco Company will send its own corps to Wuhu where there is a mission to distribute \$10,000 worth of rice. This amount will keep 5,000 people alive for two months.

WELL ATTENDED RECIPROCITY MEETINGS HELD LAST NIGHT

The campaign for Reciprocity is being carried on vigorously in York County and the prospects of success on election day are brighter than ever. There were five large and enthusiastic meetings in various parts of the constituency last night.

At the local committee rooms a large audience heard able addresses by Mr. N. W. Brown and by local speakers.

At Lower Line Queensbury the speakers were Messrs. R. W. McLellan, S. B. Hatheway and C. K. Stewart. The hall was crowded and the speakers received a most attentive hearing.

At Mouth of Keswick the speakers were Mr. W. B. Fawcett of Sackville and Mr. J. D. Phinney of this city. Mr. Fawcett, as a practical farmer and old-time Conservative, was cheered again and again. His arguments for Reciprocity were clearly brought out and were well received. Coun. Hanford Sloan was chairman and delivered a short but stirring speech as did also Mr. Alex. Brewer. The meeting was one of the most successful that has been held during the campaign.

At Marysville Rev. J. J. McCaskill and Mr. Michael Kelley were the speakers and the audience, which filled Hatt's Hall, showed appreciation of their arguments by frequent applause. Mr. Alfred Rowley was in the chair. Mr. McCaskill's address dealt chiefly with Reciprocity from the view-point of the workman and the consumer and was most effective.

At Upper Hainesville the speakers were Dr. Coffin and Rev. J. H. Puddington. The meeting was well attended and was a great success.

Dr. Atherton, the Reciprocity candidate, himself spoke at Hainesville, where one of the largest meetings of the campaign was held. The other speakers were Senator Thompson and Mr. Alex. Gibson, Jr., ex-M.P. The candidate received an enthusiastic reception.

OIL ENGINES FOR MARINE USE

London, Sept. 6.—New developments with regard to the employment of oil engines for marine works, are now proceeding apace, and the next six or twelve months, may possibly open out a new era in marine propulsion. The admiralty has ordered a six thousand horse-power Diesel engine which is to be placed in existing twin screw cruisers in substitution for one set steam engines.

RALLY TONIGHT
Mr. A. F. Bentley, M. P. P., of St. Martin's will address a meeting at the Reciprocity Committee Rooms, York Street, tonight. This is a good chance to hear Reciprocity discussed from the lumberman's point of view.
