OLD TIME REMEDY
DARKENS THE HAIR

Gives Color, Lustre to Faded and Gray
 Hair—Dandruff Quickly Removed

For generations Sage and Sulphur have been used for hair and scalp troubles. Almost everyone knows the value of such a combination for keeping the hair a good even color, for curing dandruff, itching scalp and falling hair, and for promoting the growth of the hair. Years ago the only way to get a Hair Tonic of this kind was to make it in the home, which was troublesome and not always satisfactory. Nowadays, almost any up-to-date druggist can supply his patrons with a ready-to-use product, skillfully prepared in perfectly equipped laboratories.

An ideal preparation of this sort is Wyeth's Sage and Sulphur Hair Remedy, in which Sage and Sulphur are combined with other valuable remedies for scalp troubles and thin, weak hair that is losing its color or coming out. After using this remedy for a few days, you will notice the color gradually coming back, your scalp will feel better, the dandruff will soon be gone, and in less than a month's time there will be a wonderful difference in your hair.

Don't neglect your hair if it is full of dandruff, losing its color or coming out. Get a fifty cent bottle of Wyeth's Sage and Sulphur from your druggist, and see what a few days' treatment will do for you. All druggists sell it, under guarantee that the money will be refunded if the remedy is not exactly as represented. For sale and recommended by George Y. Dibble, druggist, opposite City Hall.

FOR WORLD-WIDE CHRISTIAN UNION

London, June 24—In Lamberth Palace, the historic home of the Archbishop of Canterbury, a small group of English and American churchmen assembled today to confer on plans whereby unity of Christendom may be accomplished. In attendance on the conference were the Archbishop of Canterbury, the Archbishop of York and several other eminent prelates of the Church of England and a commission representing the Episcopal Church in America. The American commissioners present were Bishop Anderson of Chicago, Bishop Vincent of Ohio, Bishop Hall of Vermont and the Rev. Dr. William T. Manning, rector of Trinity Church, New York City.

The importance of this conference can scarcely be overestimated. It marks the first tangible step in the colossal scheme for the union of all Christian denominations of the world into one Church. The movement or Christian unity was started by the American Episcopal Church. It has received the support of eminent clergymen and laymen in all the leading denominations in America and the approval of the heads of the Established Church in England and the old Catholic Church on the continent of Europe.

The purpose of the present conference, which might be termed a sub-committee meeting, is to discuss tentative plans for the great world conference that it is proposed to hold some time within the coming year. New York has been suggested as the meeting place for this conference, which will endeavor to agree on a statement of what is fundamentally necessary in each denominational system of doctrine and dogma, and to evolve from these universally accepted fundamentals of faith a basis upon which an undivided church may be built.

CLUBWOMEN'S CONVENTION

San Francisco, Cal. June 24—Every train coming into San Francisco today swelled the number of arrivals of delegates to the biennial convention of the General Federation of Women's Clubs, and from present indications the prediction that the attendance would establish a new high record will be more than fulfilled. Many of those arriving today came as members of delegations from State federations, while in some cases the clubs of a single city had chartered special trains for the transportation of their representatives.

The elaborate programme of entertainment is to be ushered in tonight with a grand concert in the auditorium. Tomorrow afternoon there is to be a reception in the ballroom of the Palace Hotel, at which the delegation and clubwomen will have an opportunity to meet the officers and directors of the general federation. The first of the regular business sessions will be held Wednesday morning.

From July 1910, to January, 1912, union labor in Los Angeles, Calif., increased 160.5 per cent, or from 6,182 to 16,105.

"BETTER FARMING" STAFF
ASKED MANY QUESTIONS

(Special Correspondence Toronto Globe)

Florenceville, June 15—Next Thursday evening the "Better Farming Special" will quit New Brunswick. After more than a week's tour marked by large attendances and a hearty response from the farmers at every point, the agricultural instruction train will be abandoned by the C.P.R., the exhibits transferred into Intercolonial Railway cars and run over that company's lines between St. John and Montreal, thus affording the farmers of Quebec living along the South bank of the St. Lawrence the opportunity of seeing the numerous demonstrations and hearing the different lectures upon farm topics. The number that has visited the train since it first left Montreal has been far in excess of the most sanguine anticipations of its promoters. Five days' run through Quebec attracted nearly 14,000 men, women and children to the stations where it called, and Mr. H. P. Timmerman, Industrial Commissioner of the C.P.R., who is accompanying the train has informed us that he expects Thursday evening will see the total for the tour amount up to over 35,000.

SECTIONS NEEDING INFORMATION

Saturday morning, June 8, the "Special" reached Harvey, N.B., after an all-night's steady run through the State of Maine. A large number of farmers in the Harvey vicinity were on hand although the hour was not quite nine o'clock, to bid a hearty welcome to the better farming movement in New Brunswick. Stops were also made that day at Fredericton Junction, Welsford and Westfield Beach. The country through which the train passed was mostly uncleared bush land with only a patch of agricultural ground to be seen here and there but at each place where the "Special" was advertised to lay over for the usual two hours and a half surprisingly large numbers of farmers were on the station platform awaiting its arrival.

The New Brunswick farmers were, speaking generally, very appreciative of the information volunteered by the experts upon various questions, and at a number of places some were to be observed with notebook and pencil taking down jots of knowledge and words of counsel on subjects in which they were keenly interested. Fruit growing and dairying topics seem to attract them most, and at the thirty places visited probably hundreds of questions were asked and answered. Farm crops, live stock and poultry information was at all times strongly in demand and in many cases the instruction took the form of a question bureau. This was not regretted by the officials as they appreciated the fact that to clear up doubt in a farmer's mind on a number of problems in farm work was perhaps the most substantial aid that could be given him. Our representative on the train made a note of a number of the more important questions asked, with the answers they received and these we have quoted below.

QUEBEC PRODUCTS IN N. B.

The exhibits making up the various displays in the cars were almost entirely from Macdonald College at St. Anne's, Quebec, and were specially well chosen to demonstrate the different matters upon which the instructors laid special stress. But it was felt in New Brunswick that they might not have the same effect in conveying the intended impression to the farmers, as they were products of another province, and had been grown on different soil. New Brunswick unfortunately has no agricultural college of its own and was not in a position to furnish the necessary exhibits. The difficulty was largely overcome by the resourcefulness of the lecturers, however, as they invariably called attention to the varying conditions of the two provinces, and left the idea clear in the New Brun-

wick's farmer mind that in almost every case the same methods could be followed to advantage, and the final product either inferior or superior to that raised on the Macdonald farm.

NEW BRUNSWICK'S POSSIBILITIES.

New Brunswick is not even today a great agricultural province, so far as the extent of her production is concerned, but, as the instructors on the "Better Farming Special" took pains to emphasize, the possibilities are there, and all that is required to move New Brunswick to the front rank is more extensive operations, with the adoption of more intensive methods by individual farmers. Much of the land requiring clearing has a natural drainage, and for this reason the total cost of converting bush land into cropping area is not more than \$25 per acre. The soil is in the majority of cases of a rich loam, so spurs on the growth of crops, years of forest mold. The climate is very suitable to the growing of most grains, of many fruits, apples particularly, and for the raising of all kinds of live stock. The markets are within easy reach of the greater part of the province and the apple market of Great Britain is not much more than a week's journey away.

WHY THE "SPECIAL" WAS RUN.

It was realizing the possibilities of the province and regretting the actual facts of production that lead the C.P.R. and the local Department of Agriculture to run a "Better Farming Special" through New Brunswick. The plan was a most commensurable one and all who are interested in the advancement of the east will be gratified to learn of its success. Some who have seen or have heard about the enterprise have been in doubt as to the purpose of the C.P.R. in running the "Special" through the different agricultural districts of the east. The explanation of Mr. Timmerman, who is largely responsible for the enterprise, should make the company's position clear.

"The Canadian Pacific Railway has a direct interest in the progress of agriculture in the different provinces where it is operating, and it realizes that larger production of farm stuffs means bigger earnings for the road. In running the "Better Farming Special" we have been duly appreciative of the fact that any movement that tends to improve methods of farming and increase the production on the same acreage will result in a greater freight traffic over our lines, as well as contributing to the general prosperity of the district which affects the railways, as well as any other local interest."

KNIGHTS OF ST. JOHN AT TORONTO

Toronto, June 24—The international John began in this city today and a convention of the Knights of St. John will continue until Thursday evening. It is estimated that not fewer than 20,000 delegates and visitors are in attendance, representing all parts of Canada and the United States. The morning was taken up with a visit in a body to St. Michael's Cathedral, where high mass was celebrated. Later the delegates assembled in Canadian Foresters' Hall for the formal opening of the convention. Ad O'Connor, Sir James Whitney, Mayor Dreesen were delivered by Archbishop Geary and others. The regular business convention will be taken up tomorrow morning.

"In the Case of MY Little Girl—"

In choosing and using a soap for your "Little Fairy" you will find no soap so mild, so neutral, so agreeable to tender skins as FAIRY SOAP.

Being made from products that you could eat, FAIRY SOAP agrees with even the tender skin of a babe.

FAIRY SOAP

is white—pure—floating. It comes in a handy oval cake. We could charge you five times the price asked for FAIRY SOAP and we could add nothing to its quality.

In higher-priced soaps you are paying for high-priced perfume and fancy wrappers—not better soap.
