

## Clothing Satisfaction

If you haven't experienced the pleasure of buying clothes where your satisfaction is more important than your money, you'll learn something when you come to us. We esteem good will more than profit and handle only such Clothing as speaks for itself. A wizard couldn't keep you from buying once you see style and qualities we have ready. They give expression and character to a man's figure, and have an argument past the common in the beauty of designs and materials. We're selling the highest quality of really fine clothing at the lowest margin of profit ever attempted hereabouts, and crowding in all we possibly can of value bring you twice as many. Give us an opportunity to prove it. Your good judgment will do the rest.

Marysville, N. B., Jan. 14th, 1911.

Will issue its next Directory during the present month. Thereafter the names of all new subscribers will be published in this space. It will greatly improve the service if Subscribers will kindly add these to their Directories.

## HON. SYDNEY FISHER DISCUSSES RECIPROCITY

### Says it Will Keep Our Dairymen Busy-- Minister of Agriculture Looks for Passage of Agreement in Both United States and Canada.

Oowansville, Que., Feb. 1.—Considering the unfavorable weather, there was a satisfactory attendance at the opening sessions of the Dairymen's Convention here Monday. There were several addresses delivered at the opening session, principal of which was that of Hon. Sydney Fisher, Minister of Agriculture, who incidentally gave some interesting views on tariff and reciprocity matters.

President H. Sewell Foster occupied the chair at the opening session, and in the opening address expressed the conviction that the shipping of cream as carried on for the past couple of years in an unmanufactured form was a damage to the country as a whole, for it was not wise to kill off the cheese factories and creameries. The Dairy Board had been damaged by the same thing. Cheese, if cured for one or two years before consumption, could be made here of better quality than anywhere else in the world. The plants for the proper cool curing of cheese at our seaports should be erected by the government. Mr. Foster announced that he had arranged for the sampling of properly cured cheese at the table of the Ottawa Hotel on Tuesday, the 31st of January.

#### MINISTER OF AGRICULTURE HEARD.

Hon. Sydney Fisher, in his opening remarks, referred to the selection and improvement of dairy cows. He had asked Prof. Ruddick, the Dominion Dairy Commissioner, to prepare an enlarged program of work for the future and he had no hesitancy in asking parliament for an increased appropriation to carry this work through. Mr. Foster had declared that too many herds in the district were on the wrong side of the list, with half of their cows struggling to overcome the loss sustained from the other half of the herd. There were certainly too many cows not paying their way or working to their full capacity. This was largely the fault of the owners. The difference between good and poor cows is twofold. Firstly, the poor cow does not produce enough. Some individual owners were ashamed of the record of their cows and were doing better, but the most of them, know much better than they practice. Cows in this district are not wintered well enough to make them profitable the following summer. The farmer must know whether his herd is of a milk and butter fat producing strain that will pay to feed. The first thing is to find out if a cow is worth feeding. Ensilage and clover can be easily grown here, but alfalfa and lucerne cannot. These latter can, however, be grown with a little extra care and work. Roots cause more work than ensilage, but they are well in their place.

#### SHORTAGE OF COWS.

The Eastern Townships are short of cows today. The farmers must raise more heifer calves. A farmer must know from which cow it is wise to keep his heifer calves, and if he does they are saleable at splendid prices. The dairy bulls must be of fine and first-class breeding. Farmers should raise heifers themselves, as their neighbors will not sell their best.

The hill pastures of the Eastern Townships were getting poorer and poorer each year and more infested with noxious weeds. Either these pastures must be cultivated and a rotation of crops practiced or more

corn must be grown and fed cows from and after the middle of July. Otherwise, the farmer was losing a lot of money. Some pastures are so poor that fifteen acres of land will not support a cow. By cultivation of a meadow and allowing it to pasture for a year, it gets a rest and the cows get all they can eat, which is the only way to make cows earn their living. At MacDonald College, they have fixed up sixty-four acres in pasture and on that sixty-four acres they are keeping seventy cows, and forty sheep and cutting fifteen tons of hay.

#### NOT PARTY QUESTION.

For the last two years, said Hon. Mr. Fisher, the exporting to England has fallen off, on account of the increase of home market and shipping of unmanufactured cream to the United States. The cream has seemingly paid the farmer better. At any rate, he has perished in doing it, regardless of the manufacturer. Factory men suffered, some had to close their factories. Reciprocity was not a party question, but a national one, in which Conservative press was as fair as Liberal.

"We have made an arrangement with the United States for the free entry into their markets of our butter and cheese, milk and cream. That at one blow gives you not only the markets of Montreal, Sherbrooke, St. Hyacinthe and such towns, but the markets of New York, Boston, Worcester, Lowell and the New England States. You know that in the last two seasons instead of making up our cream into butter, large quantities have been sent across the line, that cream has paid five cents a gallon entry into the States to be there made up into butter. Some of our factorymen have had to close their factories, but now, under the suggested arrangement, not only does the cream go in cheaper than butter, but the cream goes in free of duty and the butter also, so that there will no longer be any inducement for our people to send their cream across the line and pay five cents a gallon, but they can make it up into butter, as butter goes in the same as cream.

#### THINKS IT WILL BE RATIFIED.

"This is a solution of a difficulty which has worried me, for I saw the cream going from this side and our factorymen being deprived of their business. This arrangement is not completed, but it is completed as far as the government of Canada and the executive of the United States are concerned. Some people say it is not likely to be ratified. I am not going to prophesy, but I can only say that the president and executive of the United States who made that arrangement with us at Ottawa have reason to believe that it will go through. I think they know more about the conditions than some of the people on this side who are saying it will not be ratified. I appreciate that there are difficulties, but I believe the parliament of Canada will ratify the agreement and I have reason to believe that congress at Washington will do so."

#### GOOD FOR DAIRY PEOPLE.

In the event of this agreement being concluded, continued Mr. Fisher, the dairy people would have a market opened up three or four times the size of the present one. The dairy question was not the only one affected. Canadian mutton, which had been at a premium in the United States, would be obtainable as well

## TENDERS INVITED FOR CANADIAN WARSHIPS

Ottawa, Feb. 1.—The government has called for tenders for the construction of ten new vessels for the Canadian navy, contemplated in the initial building programme, viz.: Four Bristols and six destroyers of the latest improved type.

The plans and specifications are, as has already been stated, based on the plans received from the admiralty last fall and embrace the very latest advances in naval science.

The tenders are not publicly advertised since, following the rule of the admiralty, details have to be kept secret, and the only firms in whom the department has confidence and who might be bona fide tenderers, will have access thereto. Letters have been sent to all the leading British and Canadian firms who are in a position to tender, inviting them to inspect the plans and put in tenders.

It is stipulated that all the vessels must be built in Canada. Tenders must be in by April next. When submitted they will be gone over by the experts of the naval department and probably some time must elapse before a decision is reached as to which tender shall be accepted, all conditions being considered.

As an evidence of the fact that there is to be no patronage list or any opportunity for graft in the purchase of supplies, etc., by the naval department, it may be noted that in calling for tenders for any supplies the department communicates with all Canadian manufacturers dealing in the items in question.

The Canadian Manufacturers Association was first communicated with, with a view to obtaining the names of all the Canadian manufacturers of the articles required by the department. On the advice of the association the department adopted The Canadian Trade Index, a book published by the manufacturers association and which contains the name of practically all Canadian manufacturers.

Thus no distinction whatever is made between Conservative or Liberal firms in the matter of being invited to tender.

## THE TYPHOID SITUATION AT THE CAPITAL

Ottawa, Jan. 31.—At the opening of the House this afternoon, a notable figure was missing. It was Dr. Thomas B. Flint, M.A., LL.B., D.C.L., Clerk of the House of Commons. Enquiry revealed the fact he was quarantined and could not leave his residence. Typhoid is not the only evil that has temporarily reversed the condition of things in the Capital. A maid in the home of the Clerk of the House was taken ill with smallpox Saturday afternoon, and was removed to the isolation hospital. The Clerk cannot now, get out. A special meeting of the Board of Health has been called for this afternoon to consider the case. It is stated that the young girl was not seriously ill and that the Clerk will probably be allowed to resume his duties at once.

Typhoid is doing its worst. There are now over 350 cases in the city. The hospitals are over-crowded and additional rooms have been placed at the disposal of the civil authorities by the government.

as store cattle and potatoes, which could now be sent into the States duty free. No doubt, Mr. Fisher pointed out, this change would result in conditions being changed. The dairymen had been in the habit of sending their produce to England and there were men whose business it was to handle these goods. Now the producers might want to send to the United States and some of these merchants might try to persuade them that the old system was more advantageous both for the farmer and the merchant.

#### ADVANTAGE TO FARMERS.

Any changes in trade must, however, lead to the dislocation, but the speaker did not hesitate to say that for the farmers and dairymen of Bedford the advantages resulting from this free entry would be infinitely greater than any slight disarrangement of trade consequent on the change of a few months. It was a friendly arrangement, considered by the two governments, and he was glad to see it had been dealt with so far from a non-party standpoint. The two leading Conservative papers of Ottawa and other Conservative papers had endorsed the arrangement, and the minister of agriculture, while desirous of treating it free of partisanship, expressed the belief that for the whole people of Canada it presented a splendid opportunity for commanding the New England market.

**Wood's Phosphorine,**  
The Great English Remedy.  
Tones and invigorates the whole nervous system, makes new blood in old veins. Cures Nervous Debility, Mental and Brain Worries, Despondency, Sexual Weakness, Emissions, Spermatorrhoea, and Effects of Abuse or Excesses. Price \$1 per box, six for \$5.
