LIBERAL VICTORY APPEARS CERTAIN

(Ottawa Free Press)

As the result of the coming election it may be stated with positiveness that Sir Wilfrid and his followers never went into any contest with greater confidence of victory or greater enthusiasm for the issue they stand for. Not a single doubt as to the outcome is heard from the Liberal ranks. One significant fact in proof of this may be given. Election bets are already on and the Liberals are offering even money that the opposition will come back with fewer members than they have in the present house. Even Conservative members privately admit that they do not think the party has much chance of victory in the coming contest although they count on considerably reducing the government's majority. Publicly of course, for tactical reasons, they profess confidence that the outcome will be the defeat of the government. Mr. Borden probably sincerely believes that he will win but the older political heads among his followers do not share in his rosy dreams and already are discussing what will happen when he comes back after suffering defeat. His personal desire to leave the storm and stress of politics for which he has little real inclination will probably be gratified. Indeed it is confidently asserted by Nova Scotia Liberals that Mr. Borden with the junior member for Halifax, Mr. Crosby will be badly beaten there. The present provincial elections are one indication of that.

As to result by provinces, while of course pre-election prognostications are always uncertain, it may be stated that the oldest and most astute politicians here look for comparatively few changes in the net result outside of the prairie provinces. There the Liberals look for a clean sweep in Alberta and Saskatchewan with at least a gain of two seats in Manitoba.

The other provinces are expected to remain about as they are the vote running Liberal and Conservative along the line of the election of 1908 with each side making a few gains depending largely on the personal popularity of the candidates. As far as all reports received here indicate there is certainly no Liberal slump on in any district on the reciprocity issue. Advances in fact are the other way round and one hears more of troubles of Conservative members with their pro-reciprocity constituents than of recalcitrants among the Liberal voters.

LUMBER USED BY CAR AND FURNITURE MANFRS.

Statistics of the lumber purchased by furniture and car manufacturers in Canada in 1910, have been compiled by the forestry branch of the Department of the Interior; 117,533,000 board feet of timber were used, worth \$2,987,210, at an average value of \$25.35 per thousand; of this 65 per cent was native wood at \$20.82 per thousand, while the imported wood cost \$33.86 per thousand. Ontario was the principal consumer, using over 50 per cent. of the total amount. About one-third was used in Quebec and the remaining 15 per cent. was consumed in Nova Scotia. Prince Edward Island used a negligible quantity. The timber used in Ontario, both native and imported, was more expensive than in the other provinces, while Nova Scotia is a particularly cheap lumber province.

Yellow pine and oak are the most important species used by these industries, forming over one-third of the total consumption. It is regrettable that all of the yellow pine and 95 per cent. of the oak has to be imported from the United States. Credit will be due to any manufacturer who supplants these two species with native wood. However the next ten species in importance, maple, birch, spruce, pine, basswood, elm, ash, beech, Douglas fir and hemlock, are native woods and practically make up the remaining two-thirds of total consumption. Thirteen other species are used in small quantities. Statistics of various industries thus collected are expected to be a benefit to private owner, timber seller and manufacturer by giving a better understanding of volume of business done.
