### TAYMOUTH

Feb 23—Mr. John A. Young, M.P. P. is considerably improved and his friends are now hopeful for a complete recovery in the near future.

There is a great deal of sickness at present. Mr. Albert Hall is very ill with la grippe and Mrs. Benj Stewart is also ill, while so many of the children have whooping cough that it makes the attendance at school is very small.

Miss Laura Young who has been nursing Mr. John A. Young returned to her home today.

Mrs. Angus Edney is spending a few weeks with her mother Mrs. Jas

Norrad at Boiestown.

Mrs. Annie B. McBean who has been suffering from neuralgia is much improved.

Some of the lumber parties including Messrs Harold Young and Angus Urquhart have already come home. Messrs James McBean and John R. Young are expected Saturday and Mr. R. L. Young next week.

To sweep a stair carpet hold a dust pan under each step and brush with a whisk-broom.

To polish aluminum, make a mixture of borax, ammonia and water. Apply with a soft cloth.

## SENATOR KING ON LUMBER AND LOYALTY

To the Editor of the Toronto Globe: I feel confident that every person who is at all conversant with the conditions under which lumbering is prosecuted in British Columbia, or farming in Alberta, must have been greatly surprised on reading the report of Sir Edmund Walker's speech, as reported in your paper of the 16th. In that report he is said to have spoken as follows:—

He touched on the British Columbia coast fisheries, alluded to the open theft of halibut in those Pacific waters, and also to the fact that the lumber business of the coast Province was in danger of being swamped by the bringing in of inferior and cheap lumber from the adjoining States of the South. He predicted ruin for Alberta, and the railways of Canada would lose the long train haul to the eastward, as the grain flowed to the South, with the surplus going on to Chicago.

I assure you, Mr. Editor, if this statement had been made by almost any other member of your Board of Trade it would not have attracted my attention. It receives authority however, coming from a gentleman occupying so high a position as Sir Edmund Walker does at the head of one of the largest banking institutions in Canada and whose annual reports are accepted as an authority by all who peruse them, and that, I think I may fairly say, includes the majority of Canadian business men from the Atlantic to the Pacific.

Now, as to the lumber business in British Columbia, what are the facts? If you will oblige me by turning up the Canadian tariff you will find that for about eighteen years back this cheap and inferior lumber has been coming into the Northwest, including Alberta, entirely free, and in order to meet the wishes of the people of Alberta and other Provinces the American manufacturers was allowed to plane lumber on one side thereby lessening the freight and making the lumber more saleable in the Northwest. This, as I understand it, is what is provided for the reciprocity agreement, no change whatever having been made in this respect.

Now, what was the situation with regard to lumber going into the United States market from Canada? During all the years referred to the Canadian lumberman—and that certainly included British Columbia—was compelled under the American tariff to pay a duty of \$2 per thousand superficial feet in every thousand of rough lumber he shipped to the United States market, and 50 cents additional if the lumber was planed on one side. This was a great handicap to the British Columbia manufacturer. The adoption of the Payne tariff two years ago reduced the duty on rough lumber to \$1.25 and planed on one side to \$1.75. The reciprocity agreement, if it becomes law, leaves Canada's tariff as it has been all along, but gives free entry in the American market to Canadian rough lumber. Now, I do not claim that at the present time with low prices prevailing in the United States market, this concession means much for British Columbia millmen and yet I am firmly convinced that as prices improve in the United States market a good many of the British Columbia manufacturers will appreciate the change.

Having said this much about lumber, I must now admit I am at a loss to know what Sir Edmund Walker meant when he predicted ruin for Alberta. I am sure from my knowledge of the lumber business that the Albertan has no cause to complain. He still has the privilege of buying this cheap and inferior lumber on the same terms as he has been getting it for years past, and the only prospect ahead for the British Columbia lumberman is that he looks forward to a very greatly enlarged market in the prairie country consequent on the adoption of the reciprocity agreement, and if one-half of what is being said about the famine in lumber in the United States can be relied on, his chances are good for selling some, at least of his surplus across the line under free trade.

Sir Edmund Walker should have devoted a part of his time to explaining to his audience what plan he would suggest to prevent grain in Alberta from going South, provided on the free list. Would it favor the low tariff party get control at this agreement is not adopted and export duty? Nothing short of this,

## Another Modern Miracle Locomotor Ataxia Cured

The Sufferer Had Been Given Up as Incurable by Several Doctors—Hospital Treatment Also Failed—Dr. Williams' Pink Pills Worked the Miracle.

Before the discovery of Dr. Williams' Pink Pills, locomotor ataxia was considered an incurable disease. It is that this disease can be cured through treatment is persisted in, and the discovery of Dr. Williams' Pink Pills is a self in an inability to stand erect and dark. It is characterized by peculiar curvy in governing the motions of the earliest signs is a tired feeling, paralytic. This sensation is provoked by rest often a numb feeling is as symptoms are always present in the gresses there is an increase in the dings, covering at times the foot also disease is usually of slow growth a symptoms is not noticed, but its approach a total lack of feeling in the entire inability to govern the stomach loses all control over bowels helpless and has to be cared for like a child.

In proof of the power of Dr. Williams' Pink Pills to cure this terrible malady, Mrs. Sarah Jane Ruller, of Ant from 1900 to 1907, my son James was During that time he was treated by West, but their treatment failed to improve worse and worse, till finally he could not move at all. I had to carry where I would have to tie him, to be less as an infant; he lost all control daily looked for death to relieve him to the Brandon Hospital, hoping benefit him. In this though, we were advised me to take him home, a for him. At this time a friend advised Pills. Being willing to try anything, I bought a supply. In less than improvement in his condition. In six and from that on the improvement, and once more able to attend school. What Dr. Williams' Pink Pills have I would strongly recommend them to have saved my boy's life.

In substantiation of what Mrs. Ruller known lumber and coal dealer of Ant Mrs. Ruller writes concerning her son's cure by Pink Pills, I have no hesitation in saying that what she is particular, as I am personally acquainted with the case. This great cure is not the only one. Pills. They have brought thousands some of the best doctors in the country as incurable. Not only in cases partial paralysis, sciatica, acute rheumatism have they been successful. The success is in their power to make the essential far good health. The pills a direct by mail at 50 cents a box, or Williams' Medicine Co., Brockville, Ont.

## AMHERST BURGLAR MADE GOOD HAUL

Amherst, N.S., Feb. 23.—A burglar made a successful break on the store of W. L. Ormond last night. The door is fastened by an inside bolt, and an auger hole was bored above the bolt and an opening sufficiently large was made to enable the burglar to introduce his hand and pull back the iron bar that secured the door. This would only admit him to the back store, and another door was similarly guarded. He performed a like operation on the inside door, which gave him admission to the store.

Both Mr. Ormond and his clerk were at the C.M.B.A. ball last evening and had left over \$200 in the cash register, which had been left unlocked. Mr. Ormond cannot determine whether any goods were stolen or not. It looks very much as if the robbery was the work of a local party.

Olive oil is an excellent fattener. Some can take a tablespoonful after each meal easily. It stimulates and makes active digestive organs, clears the complexion and makes the eyes bright and sparkling.

so far as I am able to see, could Washington and decide to put wheat prevent it. Coming as I do from the Maritime Provinces, and knowing as I do the advantages we are deriving from the western trade coming to our ports over the Canadian Pacific Railway, I am some times inclined to believe that the loyalty of at least some Torontonians is more largely made up of loyalty to Toronto than of loyalty to Canada as a whole or loyalty to the Empire of which we form a part. I may be mistaken, but I am strongly of the opinion that if the western products could in some way be filtered through Toronto they would be willing to contribute towards the building up of a Canadian city a Portland, Maine, in the United States of America, in preference to St. John or Halifax.

One wonders how it is that Canadian ports are today getting a fair share of American exports. Only last week the Empress of Ireland left the port of St. John with a cargo valued at almost a million dollars. 60 per cent of the cargo being made up of the products of the United States. Every bit of this cargo that originated in the United States had to pass in bond through Ontario and Quebec and part of New Brunswick. It would be interesting to know why this could not be continued even if we had free trade between the United States and Canada.

G. G. KING

## WILL CARRY OUT FRENCH'S SUGGESTIONS

Ottawa, Feb. 23.—"We intend to carry out Sir John French's report so far as the whole force in Canada is concerned. Perhaps not as rapidly as we would like, but not less rapidly than we have been progressing in this department in the last seven or eight years. The artillery will be recruited and increased to the strength it should have and the cavalry and infantry also. The necessary armament will be supplied as rapidly as possible and divisions made as the general's report suggested."

This announcement was made by Sir Frederick Borden, minister of militia and defence, to the annual meeting of the Canadian Artillery Association in the railway committee rooms of the house of commons this afternoon.

Sir Frederick stated that the report had been eminently pleasant reading to him in so far as the artillery of Canada was concerned, and he thought should be very satisfactory to the militia as a whole. General French had not considered in his report and had not been expected to do so, the difficulties existing in Canada as regards the forming of regiments. He had been expected to report on the force as he found it, as a unit ready to take the field, and he had done so.

"Our friends of the press published all about the report before they knew anything about it," said the minister, "but since it was issued we have not heard so much about it. They have quieted down."

"It was a most fortunate thing for the militia of Canada that such a great authority as General French should have visited. I consider that his opinion is of more use to Canada than that of any other living man. It was apt his business to look into the difficulties. He looked at it as a fighting force."

Sir Frederick told the association that he was submitting estimates to the cabinet for the sending of an artillery team to Great Britain this summer, and had great hopes that they would pass. He would be able to answer their request definitely by the end of the week.

On motion by Colonel Costigan and Colonel Macdonald, the government will be asked to increase the per diem allowance for horses. Colonel Renouf and Major Odell carried a resolution which will ask for the appointing of instructors for artillery in training at local headquarters free of expense.

**Dr. de Van's Female Pills**  
A reliable French regulator; never fails. These pills are exceedingly powerful in regulating the generative portion of the female system. Refuse all cheap imitations. Dr. de Van's are sold at \$5 a box, or three for \$10. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.
