

# A "TO-MORROW" GOVERNMENT HOLDS SWAY AT CAPITAL

Ottawa, Feb. 17.—Precipitate haste in dealing with public questions and public business is dangerous to the welfare of any country. But danger does not lie in haste alone. There is equal danger in the other extreme. Procrastination in taking up the important public problems which press for attention must hold back and imperil national prosperity. It is this latter danger which threatens Canada today.

Much was expected of the new government when Mr. Borden and his colleagues took office. Many pledges had been given to the people on its behalf. Its party friends had confidence in the ability and progressive-ness of the ministry. The Liberals were ready to suspend judgment upon the cabinet until the new blood had been given fair opportunity of proving its worth.

That was more than two years ago. Admittedly, the welfare of the Dominion has not been endangered since then through any government haste in dealing with public questions and public business. But it has suffered and it is still endangered by the shilly-shallying tactics and procrastination of the premier and his ministers.

The ministry has won its right to the title of "The Tomorrow Government." It is a government, the first in Canada, which has one reply to every question as to which which will be taken or the policy which will be laid down in regard to important public matters. That answer is terse—and well-nigh meaningless. It runs as follows:

"Announcement will be made and action taken in due course."

Again and again, the government has been pressed to declare its permanent naval policy. Again and again the government has given the same answer:

"An announcement will be made in due course."

"What is the government's tariff policy?" the ministers are asked.

"That policy will be announced in due course," comes the answer.

"What does the government propose to do in regard to the natural resources of the three prairie provinces which Mr. Borden promised to hand over to the respective provincial governments?"

The answer of the government to this question is in effect the same as its reply to other questions:

"The government's intention will be made known in due course."

When the free wheat resolution was offered in the House a few days ago, the government complained of its introduction at that time.

"The government's policy will be announced in due course," said Hon. Mr. Rogers.

When Hon. Mr. Crothers was questioned as to whether or not the government will act upon the report of the Technical Education Commission the familiar answer was given:

"The intention of the government will be announced in due course."

Premier Borden had the same reply to make the other day when questioned as to the appointment of a successor to Lord Strathcona as high commissioner for Canada in London. Virtually the same answer was given by him when he was asked as to the intention of the government in regard to the redemption of his pledge to take action to check electoral corruption.

In this respect, at least, the government keeps to a consistent course. It does not deal promptly and aggressively with public problems. The public may press for action but the government does not hasten to meet the public demand. The need for action may be clearly evident but the ministry delays. In time it may make some move but only at its own good pleasure.

"In due course" has become the Borden motto—a wise enough motto under ordinary circumstances but a motto which is against the public interest when, as in the present case, "in due course" means indefinite delay and inaction while national problems go unsettled and national needs unsatisfied.

Canadian welfare is endangered today because great questions are played with by the premier and his colleagues when the need for action is all too clear. The injury grows steadily greater at such a time as

## A BRONCHIAL COUGH, PERHAPS WEAK THROAT USE "CATARRHOZONE"—DEAD SURE CURE

Wonderful Success Resorted to in  
Thousands of Bad Cases

How many thousands are there who would gladly pay any sum to be cured of bronchitis or catarrh. Many could be cured if they would just use common sense in selecting their remedy.

Bronchitis of course is an inflammation of the bronchial tubes which were made for the passage of air alone, and neither moisture of an atomiser, nor the liquid of a cough syrup can get where the trouble really is. The diseased parts can only be reached by a remedy that can force its way through all the breathing organs. Doctors who have used "Catarrhozone" say it is the only rational cure for bronchitis. It cures by inhalation.

You breathe in its healing balsams, inhale its soothing antiseptic vapor and relief is immediate.

Simple to use, delightful and pleasant—nothing compares with Catarrhozone which is the cure of the day for all bronchial and throat troubles.

Mr. H. B. McLaughlin, the well known representative of Parks and Blackwell, Toronto, says:—"I have used Catarrhozone for years and can honestly say it is the only remedy that relieves me from a painful attack of Bronchial Catarrh. The inhaler for Catarrhozone is always in my pocket and I simply couldn't get along without it. I firmly believe Catarrhozone is a wonderful remedy."

Large size sufficient for two months use, guaranteed \$1.00; small size, 50c.; sample or trial size 25c. Sold by dealers everywhere.

### Next To Consumption.

There Are More Deaths From  
**PNEUMONIA**  
Than Any Other Lung Trouble.

Pneumonia is nothing more or less than what used to be called "Inflammation of the Lungs."

Consumption may be contracted from others, but as a rule pneumonia is caused by exposure to cold and wet, and there is only one way to prevent pneumonia, and that is to cure the cold on its first appearance.

Dr. Wood's Norway Pine Syrup will do this for you if you will only take it in time.

Mrs. Wm. M. Steeves, River Glade, N.B., writes:—"Please allow me to express my gratitude for the presence of Dr. Wood's Norway Pine Syrup in the house, for I believe it saved our little boy's life. Three years this fall we were in the lumber woods, and it was very hard to get a doctor to us, and our little boy got pneumonia, and was very ill. The only relief he could get was to take Dr. Wood's Norway Pine Syrup, and with the combined use of the Syrup, and your British Troop Oil Liniment, he soon got better, and was around in a couple of weeks. It certainly is a great remedy." Price, 25 and 50 cents.

Be sure and get "Dr. Wood's" when you ask for it. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.
