

DIZZY HEADACHES CURED IN ONE NIGHT

If Troubled With Head Fullness, Ringing Noises, specks Before the Eyes, the Stomach is at Fault

"I had terrible pains in my head. My appetite faded away and when I ate anything it disagreed and made me very sick for hours after each meal. The pains in my stomach and the dizzy headaches I had to endure almost set me wild. Sometimes attacks came on so severely that I had to go to bed. I would feel so worn, depressed and utterly miserable that for hours I wouldn't speak to my family. My system was poisoned with wastes and nothing helped me till I used Dr. Hamilton's Pills. Without this grand system-cleaning remedy I would still be sick but each day brought me better health and spirits. I was cured and made strong, ruddy and healthy and will always use and recommend Dr. Hamilton's Pills."

"MRS. B. C. CURRAN,
"Westport P.O."

Thousands who are in an ailing, low state of health need nothing else but Dr. Hamilton's Pills. 25c. per box or five boxes for \$1.00 at all druggists and storekeepers or the Catarhzone Company, Buffalo, N. Y., and Kingston, Ont.

Miss Pearl Lewis as Roxie with THE TEXAS CATTLE KING, City Opera House, Friday evening, June 12.

LIGHT SLEEPING BAG

Only Waterproof Material Obtained From Seed Pods

For his Antarctic expedition Sir Ernest Shackleton had made a sleeping bag said to be the lightest in existence. It was constructed of Kapok, a fibrous, silk material, obtained from the seed pods of a tree grown largely in Java. It is six times as light as cotton, and is so oily that it is quite waterproof.

The reason why Kapok is not more generally known is because hitherto the attempts which have been made to invent machinery for the purpose of making Kapok of real commercial value have met with indifferent success. It is reported, however, that a new machine has now been invented, with the assistance of which it will be possible to "card" Kapok fibre, so that it can be used for coat linings, bed quilts, and so on.

A mattress, stuffed with Kapok was tested in the water, and though only weighing 10 pounds, it supported a man weighing 200 pounds lying on it. As a matter of fact, for some years now, owing to its peculiar waterproof nature, this vegetable fibre has been employed as stuffing for life-buoys and life-belts.

Although Kapok is mostly produced in Java, it is also grown to a small extent in India, British Honduras, and Ceylon, and there is little doubt that if the latest machines prove a success they will bring fortunes to the lucky inventors.

Noiseless Streets

An inexpensive method of abolishing the noise of city traffic is being tried at Frankfurt. The street paving is of stone blocks, and the spaces between the blocks being cleaned out to a depth of about an inch, asphalt is flowed over the street in a layer an inch thick. Sand being sprinkled on, the surface is smoothed. Thus an almost noiseless surface can be produced simply and rapidly, and repairs can be easily made.

Daily Floral Tribute

In the cloisters of Westminster Abbey is a tombstone which has been polished every morning and decorated afresh with a bunch of flowers for nearly five years. It is over the grave of the late Mrs. Wilberforce, wife of the present Archdeacon of Westminster, who died five years ago. Never a morning has passed but a fresh floral tribute has been laid on it.

WORD CONFERENCE OF Y. W. C. A.

Stockholm, June 10—Delegates from more than twenty countries, including the United States and Canada, were in attendance at the opening here today of the fifth world conference of the Young Women's Christian Association. The sessions will continue for one week. The conference has selected for the main topic of discussion "the unfolding of the true plan for women in God's purpose for the world."

OBITUARY

The late Edmund Basil Reid, passed away on Saturday, May 9th, after a lingering illness at his late home, 206 Douglas Ave. St. John, N. B. The deceased was employed as a brakeman on the C.P.R. and was a member of E. W. Allingham Lodge No. 854, of the Brotherhood of Railway Trainmen. The late Mr. Reid is survived by a widow, and one infant son. His father and mother, Mr. and Mrs. John Reid, three sisters and two brothers residing at Trace Station also survive.

The funeral took place on Tuesday afternoon at his late residence and was largely attended. Rev. B. H. Nobles conducting the service.

The late Mr. Reid was very popular among his fellow workmen, and a highly respected young man. The following were the floral tributes:

Broken Wheel—E. W. Allingham Lodge.

Wreath—Mr. and Mrs. S. W. Mc Mackin.

Crescent—Mr. and Mrs. Harry Niles Boquet—Misses Ada and Mary Gas kin.

Bouquet—Mr. and Mrs. Angus McLean.

IN MEMORIAM

Can it be, dear Edmund's left us? Edmund, that we loved so dear; Changed the earthly joys forever For the heavenly home above.

But no more we'll hear his laughter Never more to hear his voice. Gladly would we keep him with us If we could but had our choice.

Dearest Edmund, he has left us Left this world of pain and sin, Oh, how bright his soul is shining In that world of love with him.

Oh, how sadly do we miss him In the dusky eventide: For his chair is sitting vacant By the lonely window side.

And we look in vain to see him As we oft, have done before But our hearts they fill with sorrow For we can never see him more.

But in heaven, dearest Edmund, Far from this cold world of pain There we hope once more to meet him And see his loving face again.

He has gone to meet the loved one Who has gone not long before How we think we see him standing Close beside the golden shore.

And we hope at last to meet his Smiling face, so bright and fair For we know that he is waiting Happily, to greet us there.

Though we'd gladly keep him with us, Not our will, but God's be done. But we hope to meet thee Edmund When our work on earth is done.

But we never will forget him Never will thy memory fade Flower's of love will bloom forever On the grave where he is laid.

Composed by his sister Viola.

MASONS MEET IN HALIFAX

Halifax, N.S., June 10—Many high-degree Masons of the maritime provinces were present here today at the opening of the annual Grand Lodge meeting of the order. The sessions will continue until Friday.

HAD INDIGESTION.

Almost Despaired of Ever Getting Well.

When your food has not been properly digested, your body has not received the benefit it should. The exertions of the gastric juice have been confined entirely to removing the unassimilated, undigested portions of food, which they cannot properly digest as speedily as possible from the body, therefore only giving the blood a small percentage of nourishment with which to feed the tissues. No wonder then that Indigestion and Dyspepsia attack the stomach. No medicine can surpass Burdock Blood Bitters as a cure for this particular disease. It regulates the bowels, promotes perfect digestion, makes pure blood, tones the stomach, and thus restores perfect health to the debilitated system.

Mrs. Mary MacKay, Hunter's Mountain, N.S., writes:—"I was troubled with Indigestion for more than ten years. I tried several Doctor's medicines claiming the power to cure, but all without success. Having heard of the many cures effected by Burdock Blood Bitters, I decided to give it a trial. After taking two bottles I was completely cured. My appetite which was very poor, is now good, and I can eat most everything without any disagreeable feelings. I can strongly recommend B.B.B. to any, one suffering from Indigestion."

POPULAR ASTRONOMY

Some Interesting Information About Eclipses of the Sun

Although the moon looks about the same size as the sun, it is very much smaller and nearer. The sun is 865,000 miles in diameter and 93,000,000 miles away, while the moon is 2,163 miles in diameter and 239,000 miles away. On account of the moon's small size compared with the sun, the shadow cast by the moon in the case of an eclipse of the sun, is in the shape of a cone, and the point of this cone just barely reaches the earth in most cases. Usually the diameter of the cone at the earth's surface is only about 85 miles, so that a total eclipse is visible as such only in a belt about 85 miles wide.

Wherever a solar eclipse is seen as total, the sky becomes nearly as dark as full moonlight, and a few of the brighter stars and planets are seen. In the most favorable case a total eclipse may last over 7 minutes at a station, but such occasions are very rare.

As the glare of the sun in the sky is removed, and yet the moon hardly more than covers the sun, it is possible at times of total solar eclipses to see all the celestial objects near the sun. These cannot be seen at other times because they are lost in the bright sky light. It is this which makes astronomers so eager to observe total eclipses. The most striking thing seen is the solar corona, a beautiful pearly light stretching away from the sun in all directions, something like the Aurora Borealis seen in northern countries.

The corona extends from one to three solar diameters away from the sun. Its form changes from year to year in connection with the number of sun spots which prevail.

Formerly it was believed probable that one or more planets of the solar system existed nearer the sun than Mercury, and it was hoped to discover these during total solar eclipses. But the sky has been so carefully searched that no such objects large enough to be worth counting exist.

Formerly also it was regarded as necessary to wait for eclipses and to see and study the beautiful rosy flames of hydrogen and other gases, called prominences, which surround the sun. But these may now be observed at any time by means of a special apparatus.

A Shrinking Sea

The surface of the Caspian, which lies 88 feet below sea level, has, since June, 1910, been continually sinking, without a plausible explanation having hitherto been found. No great importance was at first attached to the phenomenon, but the shrinkage went on, and is now even beginning to be inconvenient for navigation, as steamers in many places cannot reach the landing stages. It is believed that the river water flowing into the sea is not sufficient to make good the loss caused by evaporation.

An Astute Advertiser

It is not generally known that the late Mr. Thomas J. Barratt offered Mr. Goschen, then Chancellor of the Exchequer, \$500,000 if he would print a soap advertisement on all the census papers for 1891. His proposal was, however, refused.

A running ear means an infection of the deeper or inner part of the ear. Often there is a perforation of the drum of the ear. There are many, many deaf people who must bear this affliction because they treated a running ear with some useless cure-all, instead of ascertaining the cause and curing that.
