

## KINGSCLEAR INDIANS ON A HOLIDAY

MANY CANADIAN BOYS  
IN THE IMPERIAL ARMY

Ottawa, Aug. 5.—If the British regulars go into action, Canada will be well represented on the fighting line. There are at least one hundred and twenty-five Canadian officers in the various branches of the regular army and thirty or more in the reserve. The first would be ordered into action at once with the regular force, and the latter would join the colors for service in the second line.

These figures may be taken as a minimum. They include only the graduates of the Royal Military College, who now hold commissions in the British regular army. They do not include Canadians who may have joined His Majesty's regular forces, otherwise than by the gateway of their own military college; nor do they include Canadians who may be serving as privates. Of neither of these latter classes has the militia department here any record. It is probable that these additional officers and privates would not be numerous; but any there maybe would be additional to the figures given above.

## ALL OVER THE WORLD.

Canadian officers are found attached to the British army all over the world. Staff Capt. D. H. O. Armstrong is Director of the Fortification and Works Office at the War Office in London. Lieut. F. A. Wentlyn of the Royal Artillery, is Fight Commander of the Royal Flying Corps on Salisbury Plain. Major G. H. Johnston is Director of Ordnance in New Zealand, and Colonel G. B. Kirkpatrick is Inspector General of the Militia in Australia. Lieut.-Col. R. K. Scott is chief Ordnance Officer in Bermuda, and Capt. C. M. Stephen holds a similar office in Jamaica.

Capt. F. H. Courtney is in com-

mand of a detachment of the Royal Garrison Artillery at Khartoum. Lieut.-Col. G. B. Laurie commands the First Battalion of Royal Irish Rifles at Aden. Major R. J. Macdonald is in command of a company at Malta. Lieut. C. G. G. Mackenzie is with the Royal Scots Fusiliers at Gibraltar. Lieut.-Colonel Joly de Lotbiniere, C.S.I., C.(E.), is superintendent engineer of the Public Works Department at Calcutta.

This enumeration might be extended indefinitely. There are quite a number of Canadian officers attached to the British army in India and some in China, but there are not quite so likely to see active service as those nearer home. Erevet-Major G. R. Frith is right in the heart of things at the War Office and Lieut. J. D. Gemmell is in the vital fortress of Gibraltar.

## SERVED WITH DISTINCTION.

The most famous of Canadian officers in the British service is now in the reserve. This is Sir E. P. C. Gourard, who served with distinction in the Sudan and in South Africa and who recently retired from the High Commissionership of Nigeria to enter the business world. It is possible that in case of war he may return to the service.

## Cook's Cotton Root Compound.

A safe, reliable regulating medicine. Sold in three degrees of strength—No. 1, \$1.10; No. 2, \$3; No. 3, \$5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor.)

Mme. Nazimova has withdrawn from the management of Charles Frohman for that of the Lieblers.

Cool Food  
for Hot Days

Better health comes with less meat and greasy food during warm weather.

By proper and pleasant food one can feel cooler than his over-fed neighbor.

## Grape-Nuts

and Cream

---some fruit and a soft boiled egg or two is sufficient for the hot weather breakfast

An ordinary portion of Grape-Nuts and cream contains nourishment to sustain one until the noonday meal; and being a partially pre-digested food, it does not over-tax the stomach and heat the system as do heavy, greasy foods.

These suggestions, if followed, should show that one can have a cool body, active brain and energy---even in hot weather.

## "There's a Reason" for Grape-Nuts

Canadian Postum Cereal Co., Ltd., Windsor, Ont.

## CHINESE COAST PIRACY

Government Helpless to Stop Evil on Account of Lack of Funds.

Seventeen Chinese pirates shipped as passengers the other day on a small steamer plying the China Sea, overpowered the crew and made off with \$30,000.

As a matter of fact, the China Sea is the only part of the globe where this ancient and bloodthirsty means of livelihood is still in a flourishing condition. There ancestor worship is still practised by the pirates and it would be considered scarcely honorable for a man to give up the profession by which his forefathers have subsisted for generations.

At present, according to officers of the Japanese liner Nippon Maru piracy is in a more flourishing condition than it has been for years, for the Government is without funds to operate a coast patrol. The whole coast of China is infested with sea bandits, who lie in wait in the mouths of creeks and rivers, and pounce upon small native boats. So far their activities have been confined to Chinese vessels, although the steamer Shang hai, which was robbed by the 17 who shipped as passengers, was flying the British flag.

During the days of the opium traffic Chinese piracy was in its glory. The pirates chose the opium ships as their special prey, and those who did not pay tribute before their ships sailed were very likely to have the cargo confiscated before it ever came to port. An anonymous writer in Chambers' Journal, an English publication, told of one adventure of this sort in which the pirates were beaten off. A German bark, the Etienne, had started from Hong Kong for Tien-Tsin. It had six chests of opium aboard. The second day out the vessel was becalmed, and lay "like a painted ship upon a painted ocean," within a mile of Mrs Bay, a pirate stronghold.

Through marine glasses the crew of the Etienne could see a crowd of men swarming like ants down the shore at sunset and preparing to launch boats. The Chinese carried spears, and they propelled their boats with long sweeps. There was one bit of artillery aboard the Tienne, a cannonade, which is a short gun of large calibre, useful only at close range.

The cannonade was fired once, in the hope of bringing assistance, then reloaded and preparations made to receive the pirates. On they swept in three big boats, black in the sunset glow, and yelling loudly. The pirates were naked to the waist. The crew of the Etienne were served with rifles and cutlasses, and three barrels of bottled beer which had been sent aboard the ship just before it sailed as a gift to the officers, were brought on deck. The beer was emptied into tubs on deck and the bottles smashed. The deck was then strewn with broken glass.

The pirate ships as they approached fired several times, and one 12-pound shot struck the main mast of the Etienne. When they were within 100 yards the cannonade of the European ship was discharged and there was a thinning of the Chinese aboard one of the vessels. The short cannon was hastily reloaded, and when another Chinese ship crew alongside was fired point blank into its bows. Then the Etienne's crew, very small in comparison with the number of the pirates, swarmed into the rigging in order to pick off the Chinese with more ease.

As the barefooted Chinamen swarmed upon the deck of the Etienne they were thrown into the greatest confusion by the broken glass and leaped howling about the deck nursing their wounded feet, while the crew aloft poured down an effective fire upon them. But it was not long before the pirates began to clamber up the rigging. With rifles and revolvers the Europeans picked them off. "They fell like overripe fruit into the sea," says the author. But there were plenty more waiting to take the places of those who fell. Eventually, however, the pirates were repulsed and forced to flee after heavy loss in the sharp sea battle.

## How to Cut Glass

There is a method of cutting glass without the aid of a diamond which is very little known. Take a piece of common string and dip it in alcohol and squeeze it reasonably dry. Then tie the string tightly around the glass on the line of cutting. Touch a match to the string and let it burn off. The heat of the burning string will weaken the glass in this particular place.

While it is hot plunge the glass under water, letting the arm go under well to the elbow so that there will be no vibration when the glass is struck. With the free hand strike the glass outside the line of cutting, giving a quick, sharp stroke with any long flat instrument, such as a stick of wood or a long-bladed knife, and the cut will be as clean and straight as if made by a regular glass cutter.

## CURIOUS FISH

Some Finny Creatures Croak; Some Hum and One Shrieks

Fishes have often been referred to as "voiceless, emotionless creatures," but scientific investigation has demonstrated that like land animals they are largely swayed by the same emotions, and that in a limited way they give expression thereto. There are more than 300 species of fish which are known to produce sound. One particular kind of fish, which are called "mullet," emit sounds having a duration of about twenty-two seconds, and also various notes, usually degenerating into a mere humming, either from excess or want of intensity. When these fish are travelling in shoals the sounds given out by them may be heard from a depth of twenty fathoms. More than once it has been suggested that the story of the sirens had its origin in the utterances of these fish.

When captured, the sea-dog, or horse-mackerel, the globe fish, the grunt, the pig-fish, and the hog-fish all emit sounds resembling the grunt of a pig; while one, well known along the Atlantic coast as the croaker, derives its name from the croak it gives when taken into a boat. The barbel and the carp also croak when taken from the water.

There is a species of "sea-frog" found by the natives of Malabar, and so-called on account of the noise it makes when captured. The red gurnard has been dubbed the "sea-cock" by reason of its crowing. The armadillo, a fish found in the Rio Parana, is most remarkable for the harsh, grating sound it emits when caught with hook and line. It is said that this noise can be heard distinctly while the fish is yet beneath the surface.

There is a fish in the Tagus that emits sounds resembling the vibrations of a deep-toned bell, gong, or pedal pipe of an organ. Herrings, when the net has been drawn round them, have been observed to do the same, and similar accounts are given of the river bulthead. An amphibious silurid fish, on being taken into the hand, is said to shriek, and certain of the blennies emit similar sounds. In the Gulf of Mexico the big jewfish breaks the stillness of the night and the waters with his sonorous "boom! boom!"

## Photographic Invention

Of European invention is a device which enables a reel of magnesium ribbon to be burned any length of time its intense light may be desired by a photographer to make a timed exposure.

GIVE US A CALL

VER THE NEW ROAD TO MINTO AND NEWCASTLE BRIDGE.

Royal Black Knights  
OF FREDERICTON

will run an excursion to Newcastle Bridge.

August 12th, 1914

Train leaves Fredericton 8 a.m. Leaving Newcastle Bridge 8 p.m.

Tickets--Adults \$1.00  
Children 60c.

Refreshments provided at Newcastle Bridge by the Royal Black Knights there.

Mr. H.F. McLeod, Capt. Guthrie and others will give addresses.

Picnic on the beautiful grounds of the Orange Lodge there. The Fredericton Brass Band will accompany the excursion.

All kinds of games will be provided. Come and help us, and have a good time

By order of the Committee.

## CLASSIFIED

## ESTATE NOTICE

All persons having claims against the estate of the late JF Stewart Campbell, must file same duly attested, with H. S. Campbell, 394 Queen St. on or before September first.

CLARA J. LOGGIE,  
Administratrix.

## Notice to Contractors

Sealed Tenders, marked, "Tender" will be received by the undersigned until WEDNESDAY, 5 p. m., AUGUST 19, 1914, for the construction of a brick or concrete block Building, Fredericton, N. B.

Plans and specifications may be seen on and after TUESDAY, 11th AUGUST, at the office of W. E. Minue, Architect, or at the warehouse of Messrs. Johnstone & Kitchen, corner Queen and Westmorland Streets.

The lowest or any tender not necessarily accepted.

J. V. JOHNSTON,  
248 Smith St.

## For Sale

Double tenement house on King street known as the Limerick property. Good barn in connection. Lot freehold. All modern conveniences.

Also house and lot at Stanley Village known as the Sanson property. As the subscriber is about to move away the above properties must be disposed of.
