SEALED LEAD PACKETS ONLY—  
NEVER SOLD IN BULK.

## Do you Believe

in going straight to the weak spot in treating disease? If so, you will never use anything but Peps for coughs, colds, bronchitis, and throat and lung troubles. Listen why!

Peps are tiny tablets, which contain rich medicinal ingredients, so prepared that they turn into vapour in the mouth, and are breathed down to the throat, the breathing tubes and lungs direct.

Cough mixtures go—not to the lungs and chest at all, but to the stomach. There is absolutely no direct connection between stomach and lungs.

When you have a bad cold, your digestion is weakened. You lose appetite, and if a man, your usual smoke does not "taste good." In other words, your digestive system is lacking tone. All cough mixtures make this condition worse.

Don't ruin your stomach to heal your lungs. Take a remedy that goes right to the spot—Peps.

Surprising how they end coughs, catarrh, bronchitis, sore-throat, "clergyman's throat," asthma, and all lung troubles. Contain no poison, and are best for children.

Dr. Gordon Stables says:—"If you wish to ease and end a cough, if you desire to loosen tickling phlegm, and clear the throat and the breathing tubes, use Peps. The pine fumes and balsamic fumes, so beneficial in throat and lung trouble, which are liberated when a Peps is put into the mouth, also serve another good purpose. They are strongly germicidal, and germs of disease in the mouth, on the palate, in the throat, and in the breathing tubes, are at once destroyed by their action."

Have you tried this famous remedy? If not, cut out this article, write across it the name and date of this paper, and mail it (with 1c. stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps at 50c. box.

## NEW SUPERINTENDENT AT U.S. NAVAL ACADEMY

Annapolis, Md., Feb. 7.—With the customary salutes and flag-raising ceremonies, Captain William F. Fullman today assumed his new duties as superintendent of the United States Naval Academy, succeeding Captain John H. Gibbons, who has been assigned to sea duty. The new superintendent is regarded as one of the most brilliant officers of the navy. When he graduated from the Naval Academy in 1877 he stood at the head of the class. For more than twenty years he was stationed at the academy as an instructor in different departments and as head of the department of ordnance. It is the training of enlisted men, however, that Captain Fullman has achieved his most conspicuous success. It was under his command that the naval training station at Newport attained its present high standard of efficiency. His record there resulted in his assignment as the first commander of the new training station on the Great Lakes, where his success at Newport was duplicated. His experience an unusual success in the training of the young men who make up the enlisted personnel caused his selection by Secretary Daniels to head the institution for the training of naval officers.

### Canada's Egg Production

The value of Canada's annual egg production is officially placed at \$23,509,000. The hen coop, therefore, is a great deal more to the nation than a hobby of the farmer's wife. It is one of the big agricultural industries of Canada, as the following comparative figures indicate:

Value of eggs.....	\$23,509,000
Value of barley.....	14,606,000
Value of corn.....	14,510,000
Value of fruit.....	12,723,000

Nevertheless Canadians do not produce nearly enough eggs for themselves.

"This is to warn you, friend of my youth, against excessive credulity. When a fellow tells you that the cartridges in your revolver are damp, however great your confidence in that fellow may be, never allow yourself to be taken in. Fire first, and if the fellow hops the twig you will have acquired the proof that the cartridges are not damp."—From "The Confessions of Arsene Lupin" by Maurice Leblanc.

## A Mounted Policeman Found Many of These in the Far North

One of the mounted Canadian police who patrol great stretches of almost uninhabited land in the northwest discovered a band of Indians, who had breweries and were making "fire water" constantly for their own use east of the Hay River, and 600 miles from civilization. The Hay River is a thin black line running through the white terra incognita south of the Great Slave Lake.

The patrolman made a personal investigation and found a happy lot of Indians among whom "fire water" was quite as common as it used to be down in Kentucky. He found that nearly every "buck" was the proprietor of a "brewery," and that life south of the Great Slave Lake was one long and joyous spree.

A strange white man had sold the secret of making "fire water" to the Indians, and they were making a "brew" of potatoes, hops, sugar and yeast, which, when allowed to ferment, was strong enough to cause intoxication. During the warm summer months the Indians raised potatoes for this brew, but in scarcely any instance could they be persuaded to grow anything for food.

## Two and a Half Hours on Operating Table

Specialist Could Not Remove Stone in the Bladder

### GIN PILLS PASSED IT

JOLIETTE, P. Q.

"During August last, I went to Montreal to consult a specialist as I had been suffering terribly with Stone in the Bladder.

He decided to operate but said the stone was too large to remove and too hard to crush. I returned home and was recommended by a friend to try GIN PILLS.

They relieved the pain. I took two boxes and went back to the specialist. He said the stone was smaller but he could not remove it although he tried for two hours and a half. I returned home and continued to take GIN PILLS, and to my great surprise and joy, I passed the stone.

GIN PILLS are the best medicine in the world and because they did me so much good, I will recommend them all the rest of my life."

J. ALBERT LESSARD.

50c a box—6 for \$2.50—at all dealers, and money back if they fail to give relief. Sample free. National Drug & Chem. Co. of Canada, Limited, Toronto.

## BEQUEATHED BY RED MEN

The Original Inhabitants Have Given us Many Place Names

Long after the Indian himself has disappeared the Indian language will continue to be spoken in our geographical terms. No one can turn to the lake, or river, or stream, to which the original lords of the land have bequeathed a name, without confessing that the Indian has perpetuated himself by a monument more eloquent and more imperishable than could be erected by mere human hands.

In a list of the lakes of the United States, published in 1885, two hundred and eighty-five bear Indian names. In a list of the principal rivers, flowing into the Atlantic and the Gulf of Mexico, but excluding those of the St. Lawrence basin, seven hundred and twenty-four have Indian names. If we added to these the Indian names of the St. Lawrence valley, those attached to the waters of the Great Lakes, the Saskatchewan, and the numerous other great northern and north-western watersheds, and the lakes and streams of the Pacific coast, the list might easily be doubled.

One must bear in mind that these have all not the true pronunciation but have been disfigured by the early voyageurs and trappers, who by mispronunciation destroyed and rendered them incomprehensible, in spite of the reclamation work of Indianologists who were anxious to preserve the true pronunciation.

## INDIGESTION, GAS OR SICK, SOUR STOMACH

### Time "Pape's Diapepsin!" In Five Minutes all Stomach Misery is Gone

"Really does" put bad stomachs in order—"really does" overcome indigestion, dyspepsia, gas, heartburn and sourness in five minutes—that just that—makes Pape's Diapepsin the largest selling stomach regulator in the world. If what you eat ferments into stubborn lumps, you belch gas and eructate sour, undigested food and acid; head is dizzy and aches; breath foul; tongue coated; your insides filled with bile and indigestible waste, remember the indigestible waste, remember the moment "Pape's Diapepsin" comes in contact with the stomach all such distress vanishes. It's truly astonishing—almost marvelous, and the joy is its harmlessness.

A large fifty-cent case of Pape's Diapepsin will give you a hundred dollars' worth of satisfaction or your money back.

It's worth its weight in gold to men and women who can't get their stomachs regulated. It belongs in your home—should always be kept handy in case of a sick, sour, upset stomach during the day or at night. It's the quickest, surest and most harmless stomach doctor in the world.

"In every big enterprise there comes a critical time when everything depends upon one man; strong as the structure seems, he's really supporting it. You see the whole thing depends on credit and confidence. An ill-considered word, a little unfriendly shove, and down comes the whole works. Then some financial power steps in, reorganizes the wreckage and gets the result of all the other fellow's efforts, for nothing."—From The Iron Trail by Rex Beach.

## PEOPLE SHOULD GUARD AGAINST APPENDICITIS

Fredricton people who have stomach and bowel trouble should guard against appendicitis by taking simple buckthorn bark, glycerin, etc., as compounded in Adler-ika, the German remedy which became famous by curing appendicitis. JUST ONE DOSE relieves sour stomach, gas on the stomach and constipation INSTANTLY because this simple mixture draws off such a surprising amount of old foul matter from the body. George Y. Dibblee.

## INFINITELY SMALL

Billions of Billions of Atoms Make up a Pinch of Salt

We know that the big telescopes, aided by the photographic plate, reveal stars to the number of at least one hundred millions lying utterly beyond the confines of unaided vision, wrote Dr. Henry Smith Williams. Now it appears that a pinch of salt which one could hold on the point of a pecknife, is made up of atoms numbering not hundreds of millions merely, but billions of billions.

The population of atoms in the smallest particle of matter visible under the microscope is greater by far than the total human population of the globe since the race developed. And a little instrument composed of two fragments of gold-leaf makes it possible to perform the miracle of counting these denizens of the realm of infinite littleness.

Within the smallest atom there is a something almost two thousand times smaller than the atom itself—a something that is detachable from the atom, and susceptible of being measured as to its mass, and tested as to its electric charge with the aid of apparatus actually in use in the laboratory. This ultimate particle of matter is called the electric corpuscle of electron. It is the smallest thing in the world, and it is probably the basal substance out of which all matter of whatever character is built.

As regards bulk, the electron is, according to the French physicist, Jean Becquerel, billions of billions of times smaller than the atom. To make the comparison vivid, Becquerel likened the electrons in an atom to a swarm of gnats gravitating about in the dome of a cathedral.
