Commercial credits, Foreign Drafts, Money Orders, Travellers' Cheques and Letters of Credit issued and available in all parts of the world. Collections effected promptly at reasonable rates.

G. W. HARRISON, MANAGER, FREDERICTON BRANCH

ST. JOHN VIEW OF POLITICAL SITUATION IN YORK COUNTY

(St. John Telegraph)

Mr. J.K. Pinder sometimes styled "the king of Nackawick," a practical statesman whose activities in York county have excited the envy of some and the amazement of more, now finds himself at war with the forces of Premier Flemming and Mr. H. F. McLeod, M. P. An organ of the Flemming government, quoted elsewhere in this issue, denounces Mr. Pinder as a traitor to the Flemming cause, and declares him unfit to occupy a seat in cabinet. Many complimentary statements have been made about Mr. Pinder hitherto, but those who are well acquainted with the members of the Flemming cabinet will regard the assertion that Mr. Pinder is barred from that shining circle by virtue of his character as exceedingly harsh. It is a terrible thing to say about anyone, true or false.

The head and front of Mr. Pinder's present offending is that he has been active in promoting the candidacy of Mr. Scott, who is to oppose Mr. Guthrie, the Conservative machine candidate in York who would succeed Mr. McLeod. The attack upon Mr. Pinder contains dark references to

the the railway he built at public expense, a suit concerning which recently occupied the courts. Also it is intimated that Mr. Pinder's business relations with the government have not been wholly admirable.

Seemingly the Flemming government is going to look into the case of Mr. Pinder. Either that, or it is bluffing. So long as he was a quiet follower his business practices were not found questionable by the gentlemen who are now determined to have his blood. Mr. Pinder it may be assumed, will fight. He has the disposition and the tools. Now that the government press has begun to tell what it knows about Mr. Pinder, there is thrust into public view the horrible probability that Mr. Pinder may tell all that he knows about the Flemming government and the Conservative machine of York County. And if he should do so he would pull down the pillars of the temple. From the standpoint of the public interest it may be hoped that the machine will keep up the war upon "the King of the Nackawick" until he tells the whole story. Then there would be a chance to clean up York County. That chance is long over due.

Suffered Intense Agony With His Back.

Kidneys Were The Cause.

Weak back is caused by weak kidneys, and on the first approach or evidence of kidney trouble Doan's Kidney Pills should be used, and serious trouble avoided.

Doan's Kidney Pills go right to the seat of the trouble, cure the weak aching back, and prevent any further complications arising.

Mr. John Briggs, Whitewood, Sask., writes:—"I am sending you this testimonial out of pure gratitude, as I am not a believer in patent medicines, but I got so run down, that I became quite willing to give anything a trial. I paid a visit to our local druggist, and told him I was suffering intense agony with my back. He told me I had kidney trouble, and handed me a box of Doan's Kidney Pills, saying it was the best thing he could possibly give me. I tried them, and the effect was certainly marvelous. They are worth \$10.00 a box of anybody's money, and I would not be without a box by me. I certainly owe my present condition to Doan's Kidney Pills."

Doan's Kidney Pills are 50 cents per box, or 3 boxes for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

SALT FOR COWS

Increases Flow of Milk and Acts Like Condition Powder

Dairy cows in milk require salt daily to do their best work. A lump of rock salt thrown somewhere in the yard may do for the young stock but cows need a greater quantity than they can get by occasionally licking rock salt. Cows will take a tablespoonful of salt every day, and when they get this quantity they will drink more regularly and give more milk.

Salt is required in the system and animals that are deprived of salt entirely lose their vitality. In "Henry's Feeds and Feeding," an experiment on the use of salt for dairy cows is described, and the following facts are cited: "In every case the cows exhibited an abnormal appetite for salt after having been deprived of it for two or three weeks, but in no case did the health of the animal, as shown by the general appearance, the live weight, or the yield of milk, appear to be affected till a much longer time had elapsed. There was finally reached a condition of low vitality in which a sudden, complete breakdown occurred. This stage was marked by a loss of appetite, a general haggard appearance, lustreless eyes, a rough coat and a very rapid decline in both live weight and milk. If salt was supplied at this period recovery was rapid." The time from which the salt was withheld until bad results showed varied with different animals, from a month to a year.

FRESTON TOWER

Each Storey Was Designed For A Specific Purpose

At Freston, near Ipswich, stands a picturesque building known as Freston Tower, which was constructed under somewhat romantic circumstances. The owner of the estate upon which the tower stands was Lord de Freston whose beautiful daughter, Ellen, possessed intellectual abilities of a high order. Fearing that in actual achievements would be attained at the expense of her natural graces and beauty, advice was tendered to the anxious Lord de Freston to "build a tower six storeys high, each one with purpose known." Accordingly Freston Tower was erected as a place of study and recreation for the gentle Ellen de Freston. The six storeys of Freston Tower were originally designed for the following purposes: Lower room for the dispensation of charity from seven to eight o'clock; the second room for working tapestry and fancy work from nine till ten; the third for music from ten to noon; the fourth for painting from twelve to one; the fifth for literature from one till two; and the sixth and highest for the study of astronomy and the heavens in the evening. It will thus be seen that Ellen's pursuits and occupations were much diversified. Beautiful scenery is visible from the tower, which overlooks the River Orwell.

FOSSILS IN THE YUKON

Geologist Discovered Bones of a Camel in the North

At the time of the discovery of America horses and camels were entirely unknown in the western hemisphere. The Indians had never seen a horse, and the nearest living American representative of the camel was the llama. It has long been known to zoologists, however, that both horses and camels existed in North America, in a geological age, not very remote, though one would hardly look for them in Arctic regions. However, discoveries have been made which indicate that camels once inhabited the Yukon region of Canada, and a skull of an Alaskan horse has also been found.

In the summer of 1912, while collecting specimens of modern land animals along the Yukon-Alaskan boundary, Copley Amory, Jr., obtained a small collection of fossil bones of the Pleistocene age, or that immediately preceding the age of man. These bones included several parts of a mammoth horse, bison and camel and altogether proved to be of no little importance, since the bones of a camel had never before been found in this region. There is little doubt, however, that the camel is Pleistocene on account of the fact that the bone found by Mr. Amory agrees exactly in color and degree of fossilization with those of the mammals known to be of that epoch, which were found with it.

BODY MADE LOP-SIDED

Sitting Cross-legged is a Very Harmful Habit

Fully 80 per cent. of the men and women who travel in the trains and street cars sit cross-legged, and this habit is responsible for many ills according to a prominent London physician. The prime objection against this habit, he says, is that the return flow of blood from the leg is stopped at the knee, the result being that the veins in the leg swell up. All the weight is thrown on one side of the body, and the under leg goes to sleep owing to the pressure put on the sciatic nerve. The body should be equally balanced. Then there is an other danger. Too much crossing of the legs is sure to bring lop-sidedness. Let the legs rest limply. In that way the muscles become eased while the flow into and the return of blood from the legs is naturally done and the body is equally balanced.

MOTHER! THE CHILD IS COSTIVE, BILIOUS

If Tongue is Coated, Breath Bad, Stomach Sour, Don't Hesitate!

Give "California Syrup of Figs" at once—a teaspoonful today often saves a sick child tomorrow.

If your little one is out-of-sorts, half-sick, isn't resting, eating and acting naturally—look, Mother! see if the tongue is coated. This is a sure sign that it's little stomach, liver and bowels are clogged with waste. When cross, irritable, feverish, stomach sour, breath bad or has stomach-ache, diarrhoea, sore throat, full of cold, give a teaspoonful of "California Syrup of Figs" and in a few hours all the constipated poison, undigested food and sour bile gently moves out of its little bowels without griping and you have a well, playful child again.

Mothers can rest easy after giving this harmless "fruit laxative" because it never fails to cleanse the little one's liver and bowels and sweeten the stomach and they dearly love its pleasant taste. Full directions for babies, children of all ages and for grown-ups printed on each bottle.

Beware of counterfeit fig syrups. Ask your druggist for a 50-cent bottle of "California Syrup of Figs" then see that it is made by the "California Fig Syrup Company." Don't be fooled!

INDIAN HEAD BARN

On the Experimental Farm at Indian Head there is a wonderful barn. Cement work was very largely used in the construction of both the stable—which was completed last autumn—and barn, as both have a 10 foot wall of cement. This material was also used in the floor and stalls of the horse stable and of the basement of the barn, which will be used for the winter feeding of cattle.

The horse stable, which is a huge affair, is splendidly fitted up in every way, while the barn is the last cry in barn-structure. Its dimensions are 48 feet by 112 feet with an elevation of 52 feet. This height gives the building an added appearance of immensity, especially from inside, but there are no pests; the barn is framed with eight large boms, with hip roof.

A goodly space on the ground floor is reserved for work shop, and granaries have also a generous allowance; the windows are hung on weights, and can be easily lowered, indeed, taking it all in all, the barn is so very fine a structure that the fire which destroyed the old buildings may now be regarded as more of a blessing than a curse.

"The narrow neck of the pass opened and descended into a valley half a mile wide, and perhaps twice that in length. It had apparently no scaleable slopes of weathered rock leading up to beeting walls. With floor base and hard white except for a patch of green near the far end it was a lurid and desolate spot, the barren bottom of a desert bowl." From a descriptive portion of "Desert Gold" by Zane Grey.

Looking Both Ways
A new motor cycle rear light, to be mounted on a handle bar, can be covered with a mirror in the day time so a rider can watch the road behind him.

DOMINION JOTTINGS

It is said that eighty per cent. of the population of Saskatchewan is engaged in agriculture.

A Prince Edward Island man was induced to part with \$700 by a "Spanish Prisoner" fraud.

Out of 86 samples of maple sugar examined in the laboratory of the Inland Revenue, only 43 were the genuine article. The other samples were adulterated with other sweetening materials. Out of 128 samples of maple syrup, only 86 were pure.

Seldom has a man broken more Statutes, acts or by-laws by a single act than Bernard Wright of Saskatoon, who shot a duck on Sunday. He broke the Sunday law in that he was shooting on Sunday, he broke the city by-law, in that he discharged a firearm inside the city limits, he broke the game act, in that he was shooting out of season, and he broke another section of the same act, in that he shot game without a license. His duck might have cost him \$102.75, but he got off with \$12.75, and a warning.
