#### Valuable Fisheries

With respect to the fisheries of  
Canada, it may be surprising to some  
to be told that since 1870, the first  
year for which figures are available,  
Canadian fishermen have taken from  
the seas, rivers and inland waters of  
this country, fish valued at nearly  
a billion dollars, the exact figures be-  
ing \$829,910,756.

#### Many Telephones in Toronto

Toronto has 120 telephones for every  
1,000 of population as compared with  
105 in New York.

NEW GLASGOW

BEAT SOCIALS 8 TO 4  
IN SLUGGING MATCH

Police Were on the Ice Twice During  
Match---Free-for-all at One  
Stage

New Glasgow, N.S., Jan. 21.—To  
the tune of eight goals to four the  
New Glasgow team defeated the  
Halifax Socials in the Arena rink  
here last night but it was not all hockey.

The last period was punctuated by  
displays of publicistic efforts that did  
not tend to increase the admiration  
of the audience for the combatants.  
Twice in rapid succession the police  
had to rush on the ice and separate  
the fighting players, the game clos-  
ing with only four men on a side.

The game was in charge of Referee  
R. McGregor and H. J. Grant, and  
they did their utmost to keep the  
players in line. They had little  
trouble until near the end when Greg-  
ory and Hague, the Halifax goal  
tender, had a set-to with "Mag"  
McGregor and Myra taking a hand in.  
The atmosphere no sooner cleared  
than W. McGregor and Cartoll hook-  
ed up for a free-for-all and again the  
blue coats had to charge over the  
boards and cause peace to prevail.

### IN MEMORY OF QUEEN VICTORIA

London, Jan. 22.—The customary  
observances were held today to mark  
the thirtieth anniversary of the  
death of Queen Victoria. King  
George and Queen Mary, with other  
members of the royal family, this  
morning attended the annual mem-  
orial service in honor of the late  
Queen, which was held in the Frog-  
more Mausoleum at Windsor.

#### MAZERALL.

Mazerall, Jan. 8th.—We are having  
delightful weather at present. The  
roads are in an excellent condition  
and the men who are lumbering near-  
by are doing a bustling business.

The young people of New Market,  
who had a driving party to the home  
of Mr. and Mrs. J. L. Mazerall on  
Monday night, spent a very enjoy-  
able evening in dancing and games.

Mr. Charles Mazerall disposed of  
his beef cattle to the St. Mary's  
butchers.

The many friends of Mr. Harry  
Mazerall will be pleased to hear that  
he is recovering.

Miss Augusta Mazerall has taken  
charge of our school for the coming  
term.

Our bachelors expressed themselves  
as being very favorably impressed  
with the sermon preached by Rev. F.  
X. Cormier Sunday last. Arthur  
and Allen say that they hope no one  
will accuse them of being in the fault  
and George expects that there will  
be "something doing" next leap  
year.

Messrs. Charles and Gilbert Bur-  
goyne and Mr. Allen Mazerall are  
felling the lofty spruce for Mr. Ed.  
Feeney at Hanwell.

Our intrepid miner, Mr. S. Mazer-  
all, reports that gold digging in win-

### RUSSELL FORD SIGNED BY FEDERAL LEAGUE

Chicago, Jan. 20.—While represen-  
tatives of organized baseball again  
predicted its early demise, the Fed-  
eral League today continued collect-  
ing major league players, sign-  
ing three pitchers as well as com-  
pleting a quartette of umpires.

The pitchers signed are Russell  
Ford of the New York Americans,  
who will be with the Chicago Fed-  
erals; Edward Carnitz of the Phil-  
adelphia Nationals, who will go  
either to Indianapolis or Pittsburg,  
and Edgar Willett of the Detroit  
team, who was signed by 'Mordani'  
Brown, manager of the St. Louis  
Federal team.

Negotiations with Al DeRue, the

New York Nationals pitcher, were  
ended soon after they were begun,  
when Demaree informed Joe Tinker  
over the telephone that he had al-  
ready signed a Giant contract. The  
Federal also made an offer to out-  
fielder Welter of the New York Amer-  
icans.

#### SALARY HAD BEEN CUT

New York, Jan. 20.—Pres. Farrell  
of the local American League Club,  
would not discuss tonight the jump  
of Russell Ford, the club's part-time  
star pitcher, to the Federal League.  
It is understood that the local club  
had cut Ford's salary under the con-  
tract sent to him for 1914.

Game was Fast and clean  
---Marysville Tied score  
in Second Half But Le  
Clair Squeezed in Win-  
ning Goal---Sandy Sta-  
ples Made Good Re-  
feree

N.B.H.L. STANDING.			
	Won.	Lost	P.C.
Fredericton	1	0	1.000
Campbellton	1	0	1.000
Chatham	1	1	.500
Marysville	0	2	.000

Chatham, N. B., Jan. 21.—The first  
game in the N. B. Hockey League  
played in Chatham, took place here  
tonight in St. Thomas College rink  
and was won by Chatham by a score  
of five to four. The game was the  
cleanest and swiftest seen here in  
years and the large new ice surface  
where there was plenty of room for  
good combination work, raised the  
enthusiasm of the crowd to fever pitch. Referee Sandy Staples handled  
the whistle and made an ideal official. The teams lined up as follows:

Chatham	Goal	Marysville
Rogers	Point	McDonald
Currie	Cover Point	Brogan
LeClair	Rover	Hughes
Synott	Centre	McMorris
Toms	Right Wing	Robertson
S. Veno	Left Wing	Arnold
G. Duncan	Goal judges	Hovey

Goal judges, Wade of Marysville;  
Skidd, of Chatham.  
In the first period Chatham scored  
twice and Marysville once. In the  
second period Marysville through  
Robertson's good work, scored three,  
leaving the total at the beginning  
of the third period, three to two,  
in Marysville's favor. Marysville  
got first blood in this period but  
Chatham started in and in three min-  
utes notched two, tying the score at  
end of the fifteen minutes. LeClair,  
in the fifth and winning tally after  
a run of three-quarters of the way up  
the ice and shooting far out from  
the ice and shooting far out from  
goal.

#### LOWER HAINESVILLE.

Lower Hainesville, Jan. 12.—We be-  
lieve winter has come to stay as the  
weather at present is very cold and  
we had quite a heavy fall of snow on  
Saturday last and today it looks as  
if we will get more snow before long.  
Miss Bertha Webb of Marysville,  
spent Christmas with her parents in  
this place.

For some cause the telephone in  
this place has nearly all been out of  
commission for some time past. Mr.  
McCarroll of Fredericton, has been  
here and found it necessary to re-  
move some of the old boxes and in-  
stall new ones. Others have under-  
went a series of repairs and they are  
now giving better satisfaction.

The friends of Mr. Walter N. Rey-  
nolds of Middle Hainesville, are  
pleased to hear that he is doing as  
well as can be expected, he having  
on Tuesday last underwent a very  
serious operation at Dr. Prescott's  
private hospital in Woodstock.

Colds seem to be prevalent here at  
present.

Our school will re-open on Febru-  
ary 1st with our former teacher, Miss  
A. Luckner, again in charge.

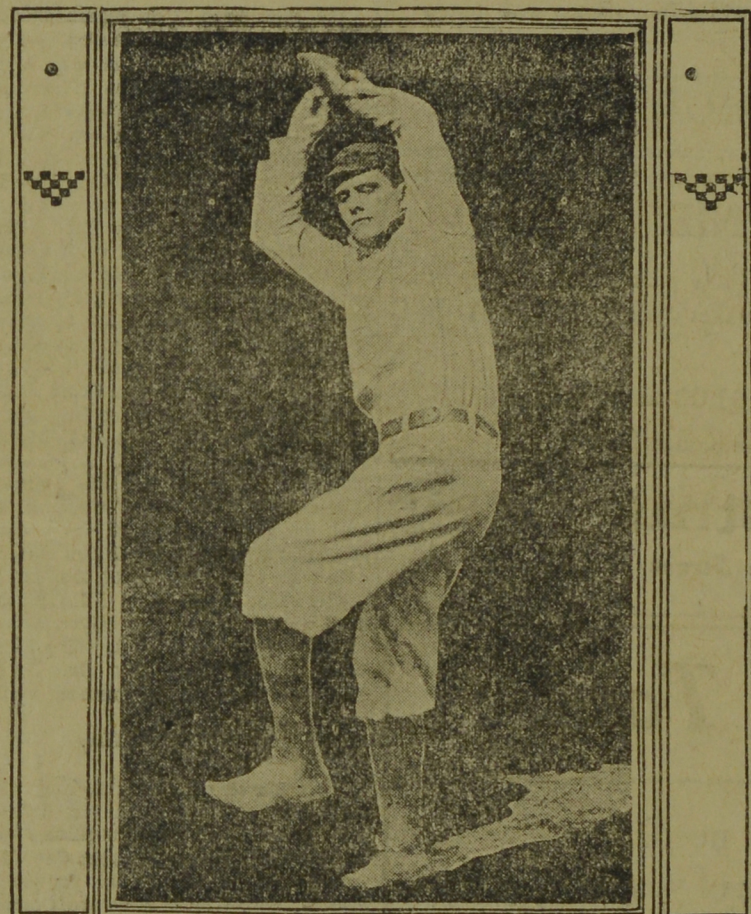

Mrs. John Foss is visiting her  
parents, Mr. and Mrs. George A.  
Clark.

Mrs. Wellington Chute and son,  
Harley, of Symrna, Me., have been  
spending a few days with Mr. and  
Mrs. Arthur Chute.

Mr. and Mrs. Percy Chute, also of  
Symrna, are spending the winter  
with Mr. A. Chute.

Mrs. John Elliott has been visiting  
her sister, Mrs. Perley Haines of  
Tripp Settlement.

**Wood's Phosphorine**  
The Great English Remedy.

places for a party of buffoons to raise  
an outlandish uproar but they should  
remember to let off their surplus  
vocal powers before arriving at the  
respectable vicinity of King Settle-  
ment.

#### VALUE OF MAN'S SIZE

Modern Achievements Would be Im-  
possible to Tiny Men

If man were much larger or much  
smaller than he is he could not have  
accomplished many of the most im-  
portant feats of civilization. For  
man, by his stature, is just the right  
size to make the best use of every-  
thing around him. If a man were the  
size of an ant, for example, he could  
have made none of the machines with  
which he has conquered the world. The  
dimensions of such machines as  
he could have built would condemn  
them to uselessness, as the surfaces  
upon which friction must take place  
would be out of all proportion to the  
volume of the apparatus.

Such a man could not make a bal-  
loon that would float in the air. The  
delicacy of the materials he would  
have to employ would prevent this,  
for when a certain point of tenuous-  
ness is passed the gas diffuses quick-  
ly through the envelope. He could  
not build ships that would cross the  
ocean or float on any large body of  
water, because the dimensions of such  
vessels would have to be so inferior  
to the length and height of the waves  
as to make certain the immediate  
swamping of the tiny craft.

He could not even produce great  
heat, because the external surface of  
his furnaces would be so large in pro-  
portion to their volume that most of  
the heat would be lost. This would  
cut him off from all the chemistry that  
involves high temperatures, and there-  
fore from metallurgy and mechanics
