#### THE HEIGHT OF MAN

Measuremen's Show That Average Stature Remains the Same

It appeared from the results of scientific measurements made in France that the average stature of man is neither increasing nor decreasing. The skeletons of the men who inhabited France at a period when Europe was the home of lious elephants, rhinocercs, Lyenas, Loc reindeor, are of nearly the same size as those of the French people to-day

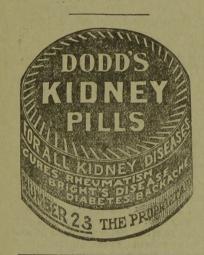

Yet the surroundings amid which these early men lived were remarkably different from those enjoyed by their successors. The best abodes of the trip was \$20,740. were caves, and to hold persession of them they had to wage warfare upon such fierce beasts as the saber-toothed

One interesting fact shown by the measurements is that there has been a perceptible gain in the stature of women as compared with that of men since the days of the tiger fighters
