Commission on Treasure
When operations are carried on for the recovery of treasure at great depths divers are usually paid weekly wages, plus a commission on the value of the stuff actually recovered. One has received as much as \$50 in wages alone, and a diver has brought up in his hand a "find" worth no less than \$35,000. This was a hunting-knife studded with diamonds, and it was recovered from the "Cadiz," which was wrecked near Ushant, on the French coast.

DEVICE TO PREVENT
RAILROAD ACCIDENTS

A device has been patented which is intended to reduce the list of fatal railway accidents. It has been established that a majority of fatalities are the result of persons being struck and run down by cars.

This safety device consists of a revolving wooden spool, hung upon springs and attached to the corners of the trucks above the rail. The spool is concave. Experiments show that an object which would roll under the wheels, when struck by the trucks, is thrown out of harm's way when struck by the spool.

Winter Stores in Labrador

The Indians of the barren lands of Labrador rely almost entirely upon the migrating caribou for winter sustenance. When the great herds of reindeer go south in the fall, the Indians lie in waiting for them, killing sufficient meat to keep them from starvation during the months of darkness and desolation. The meat, as killed, is packed into caches—either high in the trees, well out of reach of wolves, or in some natural cave, which is barricaded with rocks and timber. When the last deer have south, the barren lands are almost destitute of life, and should anything happen to their store the Indians are confronted with starvation.

FISH IN HOT SPRINGS

Thrive in High Temperature But Die in Cool Water

In certain parts of Jamaica and Cuba there are hot springs so torrid that the hottest noons of a mid-summer sun in Toronto is lower in temperature than these same ponds. An eminent Harvard scientist found that dozens of varieties of strange fish inhabit these hot baths and when these same fish are placed in ordinary river water they very soon die. None of these fish can survive in tepid water, let alone the moderately cool waters of the ocean, rivers, and brooks. The fish are closely related to trout, sun-fish, perch, bass, and the common prey of the American angler.

When the investigator took the well known pisciculturists of the nearby waters and put them in these west Indian hot springs they were all killed and looked as if they were "partially cooked." Yet the fish native to these thermal waters were disporting themselves most happily.

To Smokers.

You know that unpleasant, dry, "throaty" feel after a hard smoke? Peps will remove it. Some smokers try gum, but gum has no effect whatever upon the membranes of the throat. Not only so, but that chewing habit is so disagreeable.

When next you have a sore mouth, "smoker's throat," or a heavy breath, try Peps! One little Pep allowed to dissolve on your tongue will liberate pleasing pine essences which will bathe the inflamed throat membranes in a medicinal vapour bath. This will give you instant ease, and at the same time will sweeten the breath.

For a bad cold, sore throat, bronchitis, asthma, or any allied trouble, Peps is the latest and best treatment. They are "the breathing treatment." When throat and lungs are ailing, don't you see how useless it is to swallow medicine into your stomach—an entirely different and unconnected organ. Get to the lungs and throat direct, and Peps alone do that.

FREE SAMPLE

If Peps are unknown to you, cut out this article, write upon it name and date of this paper, and mail it with 1c stamp for return postage to Peps Co., Dupont Street, Toronto. We will send you free sample. Your druggist or dealer sells Peps at 50c box; 3 for \$1.25. Remember the name "Peps" and take no substitute.

PEPS

FIRST EUGENIE BABY BORN IN ENGLAND

Eugenie Peps, the first baby born in England in accordance with the laws of eugenics. Her father is an Austrian descent, and her mother is English. For a seven-month-old youngster Baby Bolce displays remarkable intelligence and has a pronounced sense of humor. From birth she was reared under the healthiest conditions. The photograph shows the physical perfection of the young lady.

Greater than Panama's Bridge of Water

The Panama Canal is the logical outcome of the trend of modern commerce—it is monumental evidence of the present-day need for shortening distance—for lessening time and for reducing cost of distribution between maker and consumer.

In point of distance, the Panama will bring the Pacific nearer to the Atlantic by 1,000 miles. In point of time, the sea voyage between Halifax and Vancouver will be shortened by 24 days. In point of cost, the canal will very materially lessen the expense of carrying freight between these places. But there is a stronger factor than even the Panama in shortening distances, lessening cost and saving time between manufacturer and user.

It is Advertising—

It is the quickest—It is the most direct—And it is the cheapest—

means of communication between the maker and user of goods.

For instance, Advertising enabled a manufacturer in Nova Scotia to carry a demand for his product

from his factory to the Pacific Coast

— in a few days

— at an insignificant cost

compared with slower and more laborious selling methods.

In one week, thousands learned of his product where it would have taken years for the news to get around without advertising.

To the Manufacturers of Canada:

You will be alert to take advantage of the Panama route for the physical transportation of your goods. Have you considered how quickly, how far, and at what small cost the Advertising Trade Route will carry demand for those goods?

If you are doing a local business talk over your advertising problems with the Advertising Department of this newspaper.

If you are doing a provincial or national business it would be well for you to have the counsel and assistance of a good advertising agency. A list of these will be furnished, without cost or obligation, by the Secretary of Canadian Press Association, Room 503, Lumsden Building, Toronto.
